The high price of butter is undoubted ly the direct result of the largely in creasing cheese manufacture in every section of the Province. It is a fact well known among dairymen that the milk required to make one pound of butter will make three pounds of cheese the year round; so that to be equal to the year round; so that to be equal to it, butter must realize from 30 to 33 cents. As the demand for cheese is practically unlimited, its manufacture will undoubtedly increase, and as farmers and one of the Huron and Quebec Railway to this place, when speeches were made and a resolution of the first of the place. practically unlimited, its manufacture will undoubtedly increase, and as farmers are not slow in finding out what pays best, the price of decent butter is not likely to sink below 25 or 30 cents; at least in sections where the manufacture of cheese is largely carried on.
