FARM FOR SALE.

FOR sale, a bush farm in the Township of Garafraxa, being East half of Lot 16, Con. 5, consisting of 100 acres. It is well watered, and there is access to it by good roads. The land cannot be surpassed in quality. The lot is about 20 miles from Guelph, 9 miles from Elora, 6 miles from Orangeville. When the Wellington, Grey and Bruce Railroad, and the Toronto Central Railroad are finished, it will lie between the two lines of railroad. Cash price \$2,000. For particulars apply

\$100 REWARD

STOLEN from my Truck on the evening of Wednesday last, 9th inst., \$100, about \$500 of which are in silver, the balance principally in Gore Bank \$10 bills. The supposed thief is a young man, apparently about 17 years of age, full face with keen blue eyes, pleasant, open countenance, with "cut hair" cut short, is about 5 feet 3 inches high, very stoutly built, and on light coloured clothes, small checked trousers, red flannel shirt with horse-shoe prints, speaks with a strong English accent, gives his name as Ephraim Heston, works at the baking business, had a black glazed travelling bag. The above reward will be paid on recovery of money and apprehension of thief by applying to CHIEF-CONSTABLE KELLY.

He had his name stamped in India Ink on his left arm.

GEORGE COPP, Printer.
Guelph, October 10, 1867.

FARM FOR SALE.

THE subscriber offers for sale a first-class farm, being Lot No. 5, East half 3rd Con., Township of Erin, containing 100 acres, from 75 to 80 of which are cleared, and with the exception of about 10 acres, free of stumps. This farm is well fenced, and in a high state of cultivation. There is a never-failing creek and a good well and pump across the Concession about ten rods from the corner of the lot. There are two good barns—a log 30x50 and a frame 36x60—and a good log house 20x30 feet, with a back kitchen and a frame stoop, four bed rooms, &c. Also, a good young orchard of choice fruit trees, many of them bearing. This farm is about five miles from Acton Station, and about a mile and a half from the Edgemoor road. The farm will be sold on liberal terms, and a good title given. For further particulars apply personally, or by letter (post-paid) to the subscriber, on the premises.

Erin, 26th July, 1867. JAMES BROTHIE.

FARM FOR SALE.

FOR sale, in the Township of Colborne, County of Bruce, 101 acres of splendid land, about 35 acres cleared, with log houses and stables, being lot No. 24, 4th Concession of the Township of Colborne, 2 1/2 miles from Teeswater, and near the gravel road. There is a fine spring creek running through the lot, and the timber is growing. It is one of the finest well improved sections of Canada. The soil is limestone and clay. This eligible farm is now offered for the low price of \$1,700, for which a clear deed from the Crown will be given. Address (post-paid),

SAMUEL SOTLEY,
Guelph, 29th July, 1867. (4m) Guelph P.O.

CREDIT SALE

IN ERIN TOWNSHIP.

THE SUBSCRIBER will sell by Public Auction on Lot No. 22, 9th Con., E. 1/2,

On Thursday, October 24, 1867

The following stock, viz: 1 Bull three years old, nearly through-bred, 1 aged Cotswold Ram, 6 shorn ewes, 20 ewe lambs, 35 Ewe Lambs, 25 breeding ewes. All of the above bred by Sheep & well-bred Cotswolds and Leicester.

Terms—12 months' credit will be given on furnishing joint notes. Ten per cent discount for Cash. Sale to commence at 1 p.m. precisely.

Guelph, 23rd Sept., 1867. (d.w.4f)

INFORMATION.

Information is given to produce a luxuriant growth of hair upon a bald head or bald face, also a recipe for the removal of Pimples, Itches, Eruptions, etc., on the skin.

TO SUBSCRIBERS.

Subscribers wishing to take the Evening Mercury by the week, or for a longer period, will please leave their names at the office, and it will be regularly delivered at their residence. Subscribers who have not regularly left by the Carrier Boys, will please call at the office at once and inform us of the defect.

Evening Mercury.

WEDNESDAY EVENING, OCTOBER 16

Local News.

The "Weekly Mercury."

FORTY COLUMNS.

THE WEEKLY MERCURY for the English mail will be ready to-morrow (Thursday) at 7 o'clock, and may be had at the office of publication, Macdonnell Street, and at the Bookstores of Messrs. Day and Shewan. As usual it is full of attractive reading matter, embracing a very thrilling portion of the serial tale, "Norah Cushman," Editorials, Local, Foreign and Miscellaneous News. THE WEEKLY MERCURY is the great family newspaper of Ontario. Be sure and get a copy, and after you read it send it to your friends.

"MENDING THEIR WAYS."

Our town fathers have at last taken the initiative to "mend their ways." To-day parties are busily engaged in laying down a new sidewalk on the East side of Wynham Street. This was much needed for the street was absolutely dangerous.

TO CORRESPONDENTS.—We are in receipt of a very long letter from Mr. R. Taylor of Elora, on the Centre Riding election, which we have not had time to look over.

THE NEW BANK.

The Hon. W. McMaster, President of the Bank of Commerce and some of the Directors were in town to-day. The work on the new bank is being pushed forward rapidly, and the building will be ready for business by the end of this week.

THE PROVINCIAL EXHIBITION PRIZE LIST.

An error occurred in our list of prizes for Galloway stock at the late Provincial Exhibition. For the three year old cow Mr. Wm. Hood got the first prize, not the third as we had it.

THE POST OFFICE AND THE LOCAL GOVERNMENTS.

The Post Office Department holds that the Local Governments occupy a similar relationship to the municipalities, and they must therefore pay postage on their correspondence with the public.

A LARGE SHEEP.

On this (Wednesday) morning, Mr. C. Ferguson, the well-known sheep-breeder of Nichol, took through town a shearing ram; which he had bought of Mr. John Jackson, Chinguacousy. The animal was a fine specimen of the pure Leicester breed, and weighs about 490 lbs.

HARMONIC PIPES.

We would remind our readers of Mr. C. Ferguson's performance on the Irish Harmonic Pipes in the Town Hall last night. Though he does not, like Scott's minstrel

"tune to please a peasant's ear,
The harp a king has loved to hear,"

still it is known, for this is not his first visit to Guelph, that he gives a very pleasing entertainment. Perhaps there is none of the senses, the loss of which should give the unfortunate individual so strong claims to our compassion as that of vision. Mr. Ferguson is blind, and tunes his pipes to earn a subsistence. Pleasure and charity then may go hand in hand, and we have no doubt that the generosity of Guelph will yield a willing response to the claims of Mr. Ferguson, the blind piper.

TEA MEETING.

The annual tea meeting in connection with the Congregational Church of the town came off in the Town Hall last night. The attendance was large. The tables in the Hall were laid twice, and supplied with the best refreshments that could be procured, to which the company did full justice. This part of the programme having been satisfactorily gone through, the excellent and admirably trained choir of the church gave a piece of sacred music, being led by the organ, Mrs. Budd presiding. It is needless to say that this and several other pieces which they gave at intervals during the evening were beautifully rendered and loudly and deservedly applauded. The Rev. W. F. Clarke, the pastor of the church, presided, and made a short and appropriate introductory address. The Rev. Messrs. Ball, Hogg and Griffin followed with suitable and excellent addresses; in which they congratulated the congregation on the rapid progress their new church was making, and the prospect they had of occupying it about the new year. The evening was pleasantly spent, and the proceedings terminated at a seasonable hour.

"BIRDS OF PREY."

We have received from Messrs. Tunis & Co., Clifton, the novel bearing the above title. It is the work of the highly-gifted authoress Miss Braden, who has long ago earned her laurels in the literary world, and it has been running until lately through the numbers of the new English Magazine, *Belgravia*, of which she is editress. The book is for sale at T. J. Day's bookstore, opposite the Market, Guelph.

LAMPS! LAMPS! LAMPS!

A new lot of Lamps, Lamp Glasses, Lamp Globes, Lamp Shades and Wicks, also, pure COAL OIL for Family use,

AT JOHN HORSMAN'S.
Guelph, Oct. 10, 1867. 6d-w1

Police Court.

Before T. W. Saunders Esq., Police Magistrate.

WEDNESDAY 16th.—*Wm. Humphrey* was charged with an assault on a son of Mr. Oakes. The little boy is about eleven years of age. His Worship considered the case as of a trivial nature and dismissed it.

THE PETROLEUM OIL INJECTOR.

A VALUABLE INVENTION.

Within the past few months we have occasionally seen notices in several newspapers of experiments being made for employing petroleum in place of wood or coal for generating steam, and for other purposes where a great degree of heat was required. Some of these experiments were partially successful, but after being thoroughly tested, some defect was found, which could not be overcome, and after repeated attempts one plan after another has been abandoned, though in some cases we believe the persons whose attention was first called to the value and economy of petroleum as fuel are still engaged in experiments to accomplish that object. Among others who have made this subject their study are Mr. Ananias Smith and Mr. Adam Robertson, of this town, and from a minute inspection of the apparatus in actual operation, as well as from the opinion of competent judges, we are pretty confident these gentlemen have, after five months of careful study and repeated trials, succeeded in perfecting an invention which answers the purpose admirably, and which, when we take into account the immense saving which it will accomplish in fuel to all requiring motive steam power, will be followed by most important results to the country.

The apparatus now in operation at Messrs Robertson & Sons' foundry, and at Messrs Hodgert & Smith's Refinery, we paid a visit to the latter place yesterday, and in as brief and intelligible a manner as possible will give a description of it.

The apparatus consists partly of what is called a retort, or cylinder, made of boiler plate and riveted like a boiler. This is set on end, stands close to the boiler, and into it the oil or paraffine is fed. The refuse of the refinery that is used is pumped. Inside this cylinder is a coil of pipes, which is connected with the boiler for the purpose of heating the oil to allow the water to settle. The steam is carried by the pipe through the fire-box of the boiler, where it is exposed to all the heat. The portion of pipe in the fire-box is considerably larger than the rest, in order to afford the largest heating surface possible, and in this portion is placed iron filings, &c., which by some chemical process deprives the steam of all its non-inflammable matter. It is then carried by pipes within pipes to the point of the burners. Atmospheric air is also employed to assist combustion in connection with the decomposed steam, both of which are forced through a pipe leading from the cylinder to the fire-box, and distributed with the oil or oil vapour in proper proportions. The vapour from the oil, and whatever of the oil will not vaporize by the heat from the decomposed steam and atmospheric air, are all brought together by pipes enclosed in each other, and conducted to the fire-box, into which they are inserted, and the quantity required for generating heat supplied by means of cocks. There are two jets in the apparatus used at the Refinery, and when both are discharging their full quantity the heat is intense, so much so that the water were present the steam raised 200 lbs. by the indicator in about three minutes, and that with a good supply of water in the boiler, the engine doing its ordinary work. Scarcely any fire is required in the fire-box—only sufficient to ignite the oil.

In former experiments the chief difficulty encountered was in the pipes, after a short trial, getting clogged up, so that the oil could not get to the burners, and the heat could not be raised. This is entirely obviated in Messrs Robertson and Smith's apparatus. In practice it is found that the more dense the oil used the better and longer it burns, and that the refuse oil, tar, &c., from the ordinary stills is as good fuel for this apparatus as crude oil, and it is believed that a refinery can be run by using this refuse alone, which for all other purposes is entirely valueless. It must be borne in mind that perhaps nine-tenths of the flame created by this apparatus is from decomposed steam—consequently the amount of oil required for consumption as fuel is very small, a few gallons a day being all that is necessary to keep up steam for fifteen-horse engine. When desired the retort or cylinder may be utilized for raising steam by having it so arranged that a fire may be applied to it, thus producing steam from water placed in the lower portion of it. Steam can be raised until there is sufficient generated to work the apparatus by the apparatus itself. As soon as this is done the fire under the retort may be discontinued.

The above brief but necessarily imperfect sketch may give our readers, and especially those interested in the subject, some idea of this valuable invention. Those wishing to see it for themselves can have an opportunity, any day, either at Messrs Robertson's Foundry or at the Refinery. A patent has been secured for it in Canada, the States, Britain, and France and Germany. The inventors will in a short time be in a position to sell either the right to make and use the apparatus, or to manufacture them for sale. They can be fitted on to a boiler with very little trouble and expense. Should it continue to be as successful as the previous trials have found it to be, we have little doubt it will be almost universally used for generating steam, and will completely revolutionise this branch of mechanical industry.

The advantages claimed for the "Petroleum Oil Injector" as a steam generator over all fuel now in use are amongst others as follow: 1st—Cheapsness, 2nd—Space occupied. 3rd—Less weight. 4th—Safety from fire; no sparks, cinders or smoke. 5th—Intensity of heat produced will raise steam from 35lb to any given pressure, at the rate of 5 lbs. per minute. 6th—The complete control held over it by the engineer or tender, to regulate the amount and intensity of the fire, or its immediate extinguishment or ignition. 7th—No waste of fuel, if short stoppages are as no time required. 8th—The apparatus is its working and surroundings; no choking tubes with ash, and no cinders about boiler front. 9th—It can be applied to any boiler now in use without alterations. 10th—Lessening of the hard labour to the engineer; no wood or coal to handle; no trouble from wet or snow; no bad or changeable draught.

ERAMOSA PLOUGHING MATCH.

This ploughing match is to be held on Monday the 21st inst., on the farm of Mr. Robert Dryden. The prizes in the first class for men are, \$6, \$5, \$4 and \$3. In the second class, for competitors between the

Guelph Township Council.

This Council met on the 14th, pursuant to adjournment, George Murton, Esq., Reeve, in the chair; present, Messrs. Anderson, Benham, and Campbell. The minutes of last meeting were read and confirmed. A number of Patmasters reports were presented and passed. As there are yet a great many overseers of highways who have not made their returns, they are requested to forward them to the Clerk without delay. Mr. Robert Knowles, patmaster, was present and rendered an account of \$700 for cutting thistles on land owned by Robert Jackson, in accordance with the 4th section of the Provincial Act for preventing the spreading of Canada thistles. The Reeve drew the attention of the Council to the allowance for road leading to the Victoria Bridge, part of the approach to the bridge being on Mr. Coghlan's land. It was considered that it would be necessary to have any alteration to be made till the ensuing year, as the appropriation made for improving roads and bridges for this year are already expended. Mr. Anderson stated that Mr. Shortreed laid a complaint with him that the culvert made at the corner of his farm was not in the proper place. The Road and Bridge Committee are of opinion it is made in the proper water course, and recommended that if Mr. Shortreed considers himself injured, to call the fence viewers, who are the proper parties to decide in all matters of dispute respecting water courses. A communication from C. H. Hemming, patmaster, relating to parties taking timber off his road division, also that Arch'd Thomson has not removed his shanty off the road as already notified. The Clerk was instructed to notify Mr. Hemming that it is his and other patmaster's duty to allow no materials to be taken off the road, allowances over which they are overseers, and also to notify Arch'd Thomson to remove from the allowance for road within one month.

The Reeve presented the following accounts which were ordered to be paid: From Mr. George Pirie, for printing \$24.74; from Mr. Robt. Knowles for cutting thistles on Robt. Jackson's land, \$7; from Geo. B. Metcalf for gravel, \$6; from D. Barclay, \$3; from Mr. Zimmerman, \$1.64; from A. McCorkindale, for lumber to cover culvert, bought of S. Boul, \$1.50. It was then moved and seconded to adjourn till Monday the second day of December.

A. MCCORKINDALE, Tp. Clerk.

Improved Stock.

We noticed the success of M. H. Cochrane, Esq., of Compton, P. Q., in the importation and raising improved stock, as indicated by the great number of prizes which his animals took at the recent Provincial Exhibition. We have made inquiry concerning some large sales which he was reported to have made there and since, and are enabled to give the following particulars, which will be read with interest by the farmers of the Dominion, and all others who care for this important interest.—Mr. C. sold to the Hon. A. B. Foster, of Lower Canada, Durham, Hereford, and Ayrshire cattle, and Cotswold and Leicester sheep to the amount of about \$3,000. An imported Cotswold ram and ewe, at \$500, formed part of the lot; also a Leicester ram and two ewes, at \$400. To Professor Lawson, of Nova Scotia, who purchased for the government of that province, he sold Durham and Ayrshire cattle, and Berkshire and Yorkshire pigs. To John Snell, of Ontario, he sold a first-prize imported Cotswold ram, for \$350. To S. Tozier, Quebec, a first-prize heifer, for \$200, pronounced by the judges to be the best fattest animal they had seen for years. To Hon. J. J. C. Abbott, Montreal, three fine short-horned cattle, Mr. Cochrane's sales at and since the exhibition amount to about \$8,000, though he has not, we understand, parted with his best animals. All this is very creditable to Lower Canada; and we wish Mr. Cochrane, and all others who are endeavouring to improve the live-stock of the country, every success.—*Montreal Witness.*

Elora Items.

Our correspondent says:—The want of water is still severely felt notwithstanding the rains, there is little perceptible difference in the height of the river and more than half of the wells in the village are dry. Buyers seem shy to give the best prices for grain and in consequence the greater part of it that comes in passes on to Guelph in spite of the bad roads. The population of Elora has increased rapidly this Fall for during the Spring and Summer months there was any number of empty houses and now a single room can hardly be had for love or money.

ENGINEERS, & MECHANICS' Pocketbook.

Messrs Tunis & Co., have sent us this new publication by Harper Bros. It is strongly bound in morocco, and of a convenient size for being carried in the pocket. It is a compendium of knowledge useful not only for mechanics but for persons in almost every avocation of life. As may be readily surmised by the title, the contents are altogether of a mathematical nature, but the illustrations are plain, and easily turned to account. For sale at Day's bookstore, Market Square, Guelph.

MERIT MARKS.

The following is the list of pupils in the Senior Girls' School, who have obtained the highest number of good marks during the last quarter: 1st, Scripture History, B. Cunningham, A. McLagan, B. Wilkie, P. Rowe; 2nd do. J. Graffley, R. Findlay, C. Crowe, S. Shaw. 1st Derivations, P. Rowe, A. McLagan, B. Wilkie, A. Cooper, L. Grenside; 2nd do. S. Hayward, P. Barclay, M. A. Wheatley, J. Galbraith, Roman History, L. Grenside, A. Cooper. Fourth Book, Reading, J. Galbraith, J. Graffley, H. Bruce, M. Andrews, C. Crowe. English History, P. Rowe, A. McLagan, B. Wilkie, A. Cooper, L. Grenside. Natural Philosophy, A. McLagan, P. Rowe, L. Grenside, B. Wilkie. Modern History, L. Grenside, A. Cooper. 1st French, A. Cooper, L. Grenside, 2nd do. A. McLagan, B. Wilkie, 1st Grammar, A. McLagan, P. Rowe, B. Wilkie, L. Cooper; 2nd do. P. Holden, J. Collins, L. Grenside, J. Graffley; 3rd do. C. Crowe, H. Bruce, K. Findlay, J. McCrae. 1st Geography, P. Rowe, A. McLagan, B. Wilkie, A. Cooper, L. Grenside; 2nd do. M. Andrews, J. Graffley, A. Newby, M. Wheatley; 3rd do. K. Findlay.

TO-DAY'S TELEGRAMS.

Special and Exclusive Despatches to the Evening Mercury.

From New York.

New York, Oct. 15.—A Havana special despatch to the *Herald* says advances from Venezuela of the 24th Sept. announce that the oligarchy had been annihilated. It is feared that new revolts will occur and the militia is busy organizing to resist further revolutionary attempts. A strong government has been formed.

New York, Oct. 16th.—The proposition to raise a subscription for Mrs. Lincoln has secured her a host of sympathizers. About five hundred letters have been addressed to prominent politicians and colored clergymen, calling for donations. A book has also been opened in Mr. Brady's rooms, where her wardrobe is on exhibition for the same purpose. The sum of \$155.50 was subscribed yesterday, in amounts varying from 25c. to \$50.

New York, Oct. 16th.—An experiment was made last night with the new Eber Light, recently invented by a Frenchman, with which he claims to be able to light up the city with a single lamp more completely than gas companies can do. The light was so brilliant as to be painful to the eye, and cast bright flames all over the bay.

From Louisville.

Louisville, Oct. 15th.—There were two races to-day. The first race, three mile heats, was won by Lepaul, in 3 straight heats, beating four others. Second race, mile heats, won by Low Down, in two straight heats. Time 1.47 and 1.47.

From Milwaukee.

Milwaukee, Oct. 15.—The small propeller Waukasoo was lost at the mouth of the Kalamazoo River, on Saturday. The passengers and crew were all rescued except two children, who were lost.

Cable News!

OF TO-DAY.

Important from Italy!

NOTH. & BATTLE WITH THE PAPAL FORCES.

The Garibaldians Victorious.

The Pope Preparing for Flight!

LONDON, Oct. 14, evening.—The continued agitation in Italy, and the determined desperation evinced by the party of action to persist in its attempts at an invasion of the Roman territory, cause much financial uneasiness and depression in this city and in Paris.

PARIS, October 15.—It is reported that if the condition of affairs around Rome should become critical, the Pope will leave the city and take refuge in Bavaria, where he has been offered an asylum.

FLORENCE, October 15.—Garibaldi has sent out another address from Caprera, in which he earnestly calls upon the Italian nation to arm.

FLORENCE, October 15.—The revolutionary battles which entered the Papal States at different points on the eastern and southern frontier have concentrated in Frosinone, under the leadership of Menotti, in accordance with the directions of Garibaldi. The report that Menotti has been arrested proves untrue.

Exciting news from the south has just been received; a battle has been fought near Vercoli, in the province of Frosinone, between the Garibaldian volunteers and the Pontifical troops, in which the former were victorious. A strong detachment of Papal Zouaves was sent from Rome during the latter part of the week, to prevent the junction of the insurgent bands in Frosinone with the party under Menotti, who were unsuccessful in accomplishing this object, and were obliged to meet the united forces of the insurgents under the command of Menotti Garibaldi in person. A desperate fight took place outside the town of Vercoli, the Papal Zouaves were badly beaten, losing heavily in killed and wounded. The Garibaldians lost five killed fifteen wounded. No report is given of the numbers engaged on either side. The news is received with great rejoicing by the people here.

Turin, Oct. 15, evening.—Mazzini has issued a manifesto in which he exhorts the Italian patriots in Rome to rise and proclaim a republic.

Paris, Oct. 15, evening.—Great activity prevails in the naval arsenal at Toulon.

Florence, Oct. 15, evening.—Later—Many people here believe that Gen. La Marmora, who is in command on the Papal frontier will order his troops to cross the line and occupying the Pontifical territory, and possibly march on Rome.

New York, Oct. 15.—Special cable despatches both evening news, dated London, noon, say Jim Mac, the champion who was to have fought O. Baldwin, the Irish giant for £200 and the champion's belt, was arrested in bed last night at Shorehitch his headquarters, and bound over to keep the peace.

[To-day's Despatches.]

Paris, Oct. 15.—The official *Moniteur* to-day says the Papal troops operating in the Pontifical provinces on Sunday, the 13th, attacked and defeated a large force of Garibaldians who barred the passage of advances to Monte Liberte.

New York, Oct. 16.—The *Herald's* Florence special account of the engagement at Verona, says:—After obtaining the first advantage, the Garibaldians advanced from the town and the retiring soldiers of His Holiness were driven to Monte Maggiorie in disorder.

WALLACE MONUMENT.

The monument on the Abbey-Craig at Stirling, has now attained its altitude, the pinnacle or cope stone having been placed on the summit in presence of the architect, Turrington and other details remain to be done, as also the building of the

WEDNESDAY 16th.—*Wm. Humphrey* was charged with an assault on a son of Mr. Oakes. The little boy is about eleven years of age. His Worship considered the case as of a trivial nature and dismissed it.
