uilt. You know that the mountain was no small for the temple, and so they built he mountain out on pillars, and I saw ight of those pillars, each one strong mough to hold a mountain. Here we mer the Mosque of Omar, a throne of Mohammedanism, where we must put on lippers before we take a step further, lest ur feet pollute the sacred places. Yonde's a curve of stone which is part of a bridge rhich once reached from Mount Moriah to dount Zion, and ever it David walked is rode to prayers in the temple. Here is, the wailing place of the lews, where for centuries during the day ime whole generations of the Jews have tood, putting their heads or lips against he wall of what was once Solomon's temple. It was one of the saddest most colemn and impressive scenes I ever withchecks, and lips trembling with emotion, a book of paslms open before them, bewailing the ruin of the ancient temple and the captivity of their race, and crying to God for the restoration of the tomple. But I must get back to the house-top where I stood early this morning. Here I see that the city was built for military safety. It stands on a hill 2,600 feet above the level of the sca, and of military trenches. Compact as no other lower than the captivity of their processors. From this housetop I see in imagination Hered's temple built for the one purpose of cellpsing all its architectural predecessors. From this housetop I see in imagination Hered's temple built for the one purpose of cellpising all its architectural predecessors. There it stood, covering nineteen acres, and 10,000 workmen had been 46 years in building it. The temple! The temple! Dox. From this housetop I see in imagination from fountain to gilded pinuacle, the frozen prayer of all ages! And I imagine I see the king's palace covering 160,000 square feet. O Jerusalem! Jerusalem! Mountain city! city of God! joy of the whole earth! stronger than Gibraltar and Schastopol, surely it never could have been captured.

Mountain city! city of God! joy of the whole earth! stronger than Gibraltar and Sebastopol, surely it never could have been captured.

But while standing there on the housetop I hear the crash of the 23 mighty sieges which have come against Jerusalem in the ages past. The siege that most absorbs us is that of the Crusaders. England and France, and all Christendom, wanted to capture the hely sepulchre and Jerusalem, then in possession of Mohammedans, under Saladin. Against him came the armies of Europe, under Richard Cœur de Lion, King of England; Philip Augustus, King of France; Tancrecd, Raymond, Godfrey and other valiant men, marching on through fevers, and rlagues, and battle charges, and sufferings, as intense as the world ever saw. With all the world looking on, the armies of Europe come within sight of Jerusalem. At the first glimpse of the city they fall on their faces in reverence, and then lift anthems of praise. Then the battering rams rolled, and the catapults swung, and the swords thrust, and the carnage raged. Godfrey of Bouillion is the first to mount the wall and the Crusaders, a cross on every shoulder or breast, having taken the city, march barehead and bare-footed to what they suppose to be the Holy Sepulchre and kiss the tomb. Jerusalem, the possession of Christendom. But Saladin retook the city, and for the last 400 years it has been in possession of cruel and polluted Mohammedanism!

Another crusade is needed to start for Jerusalem, a crusade in this nineteenth century greater than all those of the past centuries put together. A crusade in which you and I will march. A crusade without you and I will march. A crusade without weapons of death, but only the Sword of the Spirit. A crusade that will make not a single wound, nor start one tear of distress, nor incendiarize one homestead. A crusade of Gospel Peace! And the Cross again be lifted on Calvary, not as once an instrument of pain, but a signal of invitation, and the Mosque of Omar shall give place to a Church of Christ, and Mount Zion become the dwelling place not of David, but of David's Lord, and Jerusalem, purified of all its idolatries, and taking back the Christ she once cast out, shall be made a worthy type of that neavenly city which Paul styled "the mother of us all," and which St. John saw, "the holy Jern salem descending out of heaven from God."

A Good Appetite

Is essential to good health; but at this season it is often lost, owing to the poverty or impurity of the blood, derangement of the digestive organs, and the weakening effect of the changing season. Hood's Sarsaparila is a wonderful medicine for creating an appetite, toning the digestion and giving break to the whole system. Now a straight of the whole system. You shall be sure to get Hood's Sarsaparila. Properly Defined.—Teacher—Can you tell me what a secret is? Little Girl—Yes'm. It is something somebody tells everybody else in a whisper.

The Kentucky Stock Farm, published at Lexington, Kv. occupies among journals of the class a unique and commendable position, in that it caters to the breeder of trotting horses, and not to the sporting man. The aim of the publishers is to get all the trotting horse news of the day, and a skim through its handsomely-printed pages shows that they are neck and neck with everything of that sort going on in the country. Strong ecitorially, it has also a clever staff of contributors, who thoroughly ventilate the very latest topics in the horse world.

The write payer at the wire payer to fix expression in the trotting horse. The write payer at the wire payer to fix expression in the trotting horse. The sufficient track is as regular as the beat of a clock. The action of the horse is as perfect as a chronometer, and when half a dozen trotters swing in the home stretch, every nerve in their sleek-coated bodies strained to the utmost, and rush past the wire, it is difficult to refrain from cheering."

Harris and buggy of Mr. John Telford, of Southamp and never returned it, all the way to Toronto and took him back for trial at Walks erton. Cooper pleaded guilty and Judge Kingsmill sentenced him to serve one year and ten months in the Central Prison.

An accident which might have resulted seriously occurred on the fair grounds at Thorndale on Wednesday last. Mr. Mc. Lean was speeding his horse on the ring when one of his sulky wheels went down and his horse ran away, plunging through the crowd and knocking down a little girl; but she was uninjured, though greatly frightened. Mr. McLean received a slight injury to one of his legs.

Last week the American tup Parks was seized by the customs authorities at Amherstburg for infringement of the customs regulations. On the Thoseday reviews the contraction and finish of the Long-distance on the ring what sort of a cross will result from an admixture of the two bloods. His attention was turned to this point several years ago, and he has already a few cross-breds which cortainly afford og orgound for the belief that the "nick" will be a success, so far at least as the production of a throughly useful driving horse is concerned. Just how missing the crowd and knocking down a little girl; but she was uninjured, though greatly trighten much speed can be attained is, of course, an open question, but that a long-distance trotter can be evolved by this method seems entirely within the range of probability. The two chief trotting-bred sires in service are Floren, by Piedmont, out of Flower Girl (own sister to Manzanita, 2:16, and Widflower, 2:21), by Electioneer, and Aubrey, by Epaulet, 2:19, dam Bonny, by Kentucky Prince; second dam, Bonnie Lassie, by Rysdyk's Hambletonian. A track has been provided at the farm with a view toward developing somewhat the youngsters in the stud, and it seem probable that ere long Hillhurst will acquire quite as much prominence as a horse-breeding establishment as it has so long cnjoyed as a headquarters for choice Herefords and Aberdeen-Angus cattle.

long enjoyed as a headquarters for choice Herefords and Aberdeen-Angus cattle.

The Kentucky Stock Farm, commenting on the stallion Nelson's remarkable mile in 2:11½ on the kite-shaped track at Kankakee, says: "That horse now holds the world's stallion record. Nelson, 2:11½, is a bay horse, foaled in 1882. He was sired by Young Rolfe, \$517; dam, Gretchen (dam of Susie Owen, 2:26), by Gideon, son of Ryssies Owen, 2:26), by Gideon, son of Ryssies Owen, 2:26), by Gideon, son of Rysdyk's Hambletonian; second dam by Black Hawk, 5. Young Rolfe, his sire, was by Tom Rolfe, 306; dam Judith, by Draco, 116; his grandam. Lady Balch, by Rising Sun. Tom Rolfe is a son of the great pacer, Pocohentas, 2:17½, the first animal, trotter or pacer, to beat Flora Temple, 2:19½. Nelson is bred in the purple, and is a good illustration of what a sensible course of breeding, pursued through reservations, will do. He is a trotting-bred trotter. Nelson's mile was a great one, and while it gives him the stallion record, it must yet be conceded to be inferior in actual merit to Axtell's 2:12, on a track that lacks at least three seconds of being as fast. Axtell's record was made as a 3-year-old, Nelson's by an S-year-old horse, another very important distinction. It would be an interesting experiment to send Nelson a mile on the Terre Haute track, when both the track The W. M. S. closed their session of the Triday.

My daughter, after a severe attack of
Scariet Fever, was completely broken down.

I spent hundreds of dollars in doctors' bills
with but little satisfaction. Before she had
taken one bottle of Burdeck Blood Bitters
there was aremarkable change, and now she
entirely cured. Mrs. HOPPERTON.
