SIMPLE TRICK TO HOLD RUNNERS

Some of the simplest tricks are most effective in baseball. For instance, while every effort has been bent for years to devise a way to keep runners close to the bases, nothing is more effective than a bluff throw to either first or second, followed by a quick delivery to the plate.

The illustration shows how a runner is forced to return to second base by the pitcher's bluff to throw. While the runner is still going toward the bag, or is near it, the pitcher, hastily resuming h is position facing the batter, delivers the ball before the runner has opportunity to get a long lead.

MISLEADING NAMES.

A vast number of incorrect notions are acquired by reason of misleading names, but after all is it of any particular importance, so long as we get what we are after? For instance, we go into a store the tails of Russian and Siberian squirand ask for a Dutch clock. We get a clock, the kind we are after, so it does not really matter that it is not a Dutch clock at all, but a German manufacture. Practically all the wooden clocks called Dutch are made at the village of Freyburg, in the Black Forest. It is all due to mispronunciation; "Deutsch" in Ger-

man means "German." Nothing is more natural than to assume that india ink comes from India, but it does not, and never did, any more than did india rubber. The first originated in and comes from China, and should be called Chinese ink, as it is in France, and | we are misled by the name. Count 'em. the latter comes from Central and South

America. "Let's have an old style country ever, is simply a corruption of "contra Angeles Herald.

dance," from the Latin contra, or opposite, and means a dance in which the partners are arranged in opposite lines. and has nothing to do with the country. Camel's hair brushes are not made from the hair of camels, but from hairs from rels. The hair of camels is, however, used for making fine fabrics, such as shawls. rugs and underclothing, and is sometimes mixed with silk.

"Genuine French briar root pipes" are not made from the roots of briars, but from the root of a white heath which eaches a considerable size and is cultivated in the South of France for pipemaking purposes. The name is derived from the French bruyere, the dialect form of which is briere, means heath
