OBITUARY

Mrs. S. A. Poirier.

The community was greatly grieved on Saturday Oct. 1st, to learn of the death of Mrs. S. A. Poirier which event occurred that morning at two o'clock. The late Mrs. Poirier who was in her 60th year was highly respected and much esteemed and her passing will be deeply mourned by a large circle of friends. The deceased had only been ill a week, and although all that loving hands and careful nursing and medical skill could do for her she passed peacefully away as above stated on Saturday morning. She leaves to mourn the loss of a kind and affectionate wife and mother a bereaved husband six sons Alonzo, Albert, Lionel, Emory, Pamille, Louis, and three daughters Louise, Simone and Margaret, to whom the heartfelt sympathy of the entire community is extended in this their hour of sore bereavement.

The funeral services were held on Monday morning at the Church of Our Lady of the Snows, after which the remains were tenderly borne to the railway depot and placed upon the Ocean Limited to be forwarded to Sheldiac, the deceased's former home, for burial. The services here were largely attended, and the many and beautiful floral offerings testified to the general high esteem in which the deceased lady was held.

Mrs. John McNeil

It was with deep regret that friends learned of the death of Mrs. John McNeil which occurred at her home at Seaside. She was formerly Miss Margaret Ann McNeil of Pointe à la Pivoine, was born May 21st, 1866, and has lived at Sea Side for the last twenty-five years. She leaves to mourn her loss a husband, two sons, William and Alfred and one daughter Jean, also two sisters Mrs. G. E. Fraser of Montreal and Mrs. T. A. Morrison of Victoria, B. C. and four brothers, John of Emmet, Idaho, Tom of Slocan, B. C., Dr. Alex. of Leicester, Mass., and William of Pointe à la Pivoine. The funeral, which was conducted by Rev. M. McLeod was largely attended.

FISH STARTED THE SHIMMY.
(New York Sun.)

The "shimmy dance" was originated by a fish, is of the opinion of Dr. W. A. Murrill of the New York Botanical Gardens. Dr. Murrill has in his office two large glass tanks in which are aquatic plants, snails and tropical toy fish, and since April he has raised forty-three of the little fish. Dr. Murrill gazing through the glass tank has observed the intimate side of a fish's life, and the human characteristics have been more than surprising to him.

He remarks that the males outnumber the female and the number in which they attract to win the admiration of the female.

They haven't the feathered plumes to spread and shake like the proud peacock, therefore they do the "shimmy."

"The fish curls himself into a crescent shape, and then as the sun glimmers his iridescent sides he shakes all over, first and all, and sometimes the female does the same thing to attract the male."
