The Kingsclere Literary and Debating Society held its regular weekly meeting on Thursday evening, 7th inst., at the residence of Mr. James Burnett. A goodly number were present, including several city visitors. The subject for debate, "Resolved, that marriage is preferable to single life," was both amusing and instructive, and called forth several able efforts on both sides. The remarks of the various speakers were listened to with great attention by the ladies, whose sympathies were apparently with the affirmative.

After an exciting discussion about an hour and a half, the chairman, Mr. Garrie, whose feelings in the matter are well known, yielding to the weight of argument, decided in favor of the negative. The meeting then adjourned until the following Saturday.

We must decline to publish the letter of "Veritas," reflecting, as it does on the private character of the party against whom it is directed. The FARMER never has admitted, nor does it intend to admit into its columns, attacks on the private lives of its readers. It is, however, much to be desired, that the public be not interested in that kind of journalism, and while the FARMER may not positively refuse to publish such attacks, it has, as it has done in the past, and will continue to do in the future, to omit them, and to publish only such communications as are of a character of public interest.

For these reasons, our correspondent will understand, that even though he subscribed his real name to his communication, we would decline to publish it.

Thorne of St. John, Mrs. O. J. Lyman, Miss Duggan, and Mr. A. J. F. Parker who took part in the business sessions, Miss Beal Logan who gave a recitation in excellent style, and Mr. J. M. A terrible accident occurred at the Brayley House, Sunday afternoon, shortly before five o'clock. A number of men, including Thomas Thompson, were engaged in pulling down the remains of the out-buildings, when a roof heavily coated with ice fell on Thompson, killing him instantly. It appears that William Aiken, who had charge of the men, had prepared to pull down the roof with horses, and had cut away nearly all the support preparatory to hauling it out of position. He asserts that while absent for a moment, Thompson and a companion, Hedley Boller, commenced cutting away the remaining supports, until the whole mass of timber and ice fell with a crash. Boller was able to escape, but poor Thompson was unable to do so, and he was killed by the falling mass.

The body was taken to the residence of Mr. Boller, and the wife of the deceased, who was a widow, was left in a state of great distress. The body was taken to the residence of Mr. Boller, and the wife of the deceased, who was a widow, was left in a state of great distress.
