—The Dominion Atlantic Railway Company's new steamer for the Blay of Fundy service have materialized and to-day makes har first trip between St. John and Digby, According to reports she it to make two trips a day each way, creasing the bay in two hours. This is certainly a marvellous improvement upon the service of a few years ago, when as some one fease isolarly remarked, we had a tri-weekly service, the beat trying to get base the sew. It is not the trip to get over some owers and trying to get base the sew. It is not service when the sew of the rain, would not have the train cancelled, see will make the search of the word of the sew of the carried as she will make on several trying. Gladstone risked all to satisfy Ireland. His policy upon that question hopelessly divided the liberal party, causing several of his ablest and most influential supporters in parliament to go over to the enemy, the conservatives ide, leaving his government to the mercy of the Irish members who contacted his majority. The general election ed to sustain the Salisbury.

Day has come to be regarded more as a day to be celebrated and held in honor. This county has for several years largely observed the first as a holiday, some one or other of our towns taking the lead in providing sports and entertainment of various kinds. In these calchesting, each of both political proclivicelebrations people of both political proclivities join with equal spirit and fervour, so that it is now safe to say that antipathy to the union and to the celebration of Dominion Day is a thing of the past.

Agreeable to Tourists. A change of great interest to those who travel between Boston and the Maritime Provinces will shortly be made in the immigration regulations. At the urgent request of Pres. L. E. Baker, of the Yarmouth Steamship Company, and officials of other Boston-Nova Scotia steamship lines, who recently visited Washington for the purpose the immigration department has decided to place an official on each steamer during the height of the tourist travel, and passengers will be examined on board, thus obviating The new rule, it is understood, will go into Herald.

-A magnificent 5-storey building of stone, brick, iron and glass, is to be erected in New York, near Central Park, to be used as an equestrian and bicycle academy—the most extensive and handsomely equipped building of the kind in the world. The site cost \$321,500, and the total cost of the building, when completed, will be \$400,000 exclusive of the land. The roof will be fitted up as a sort of roof garden, the outer circle being laid as a great bicycle course, where the wheelmen may exercise under the starlight and flashing rays of electric burners. The building will be completed by the first of January next.

—On Monday last the Dominion of Canada celebrated its twenty-eighth birthday. Some of our readers doubtless still have fresh in mind the incidents connected with its birth, while to most of us knowledge of those stirring times have come second-hand or as memories of our earlier years. To these latter the bitterness of that period has never been realized, while year by year Dominion Day has come to be regarded more as a day hald in honor. This

State of Trade.

New York, June 29.—Bradstreets says: Exports of wheat (flour as wheat) both coasts the United States and from Montreal, amounted to 1,946,402 bushels this week, the United States and from montreal, amounted to 1,946,402 bushels this week, against 2,857,000 last week. The decrease is largely of flour shipments from Newport News, Boston, New York and San Francisco. Exports in the like week a year ago were 1,717,000 and 3,971,000 two years ago. General trade prospects in the Canadian Dominion remain favorable as heretofore, a steady improvement being reported from Montreal in dry goods, groceries and liquors. At Toronto trade is quiet. Grop prospects in Ontario are fair. A large volume of business is expected in the autumn. Bank clearings at Winnipeg, Hamilton, Toronto, Montreal and Halifax were \$19,661,000 this week, compared with \$16,175,000 the like week last year. The failures in the Dominion of Canada for six months in 1895 were 934, or 20 fewer than the total in the first half of last year.
