

GULLINE'S FOLDING FRUIT BOX

The strongest, lightest, and most economic fruit box ever offered to fruit growers

In placing **Gulline's Folding Fruit Box** on the market we beg to call your attention to its special features:

The illustration shows the box packed ready for shipment as well as folded flat for transportation to the shipper. All parts are pivotally and permanently attached together, there are no nails to drive or take out; the four screws we send with each box serve to complete it for shipment. It is cheap and exceedingly strong, the sides and ends are recessed into the frame pieces, and the box is made of hardwood entirely. The frames, which project all round the body of the box, serve as handles by which to pick it up; they also form an air space round the contents, regardless of how closely the boxes may be placed together for transportation.

The surfaces are all sufficiently flexible to allow for the usual shrinkage of the fruit in transit.

The economy to be effected in storage room, and the convenience in handling them in the orchard and packing room is self-evident. Special machinery has been installed for the rapid production of **Gulline Boxes**. Orders should be forwarded immediately as the production for this season is limited to a few hundred thousand. We will be specially pleased to send a sample box and quotations to the cooperative associations. See our box and know our prices and you will not buy the old-fashioned, cumbersome kind.
