YOUNG CANADIAN TANGLES.

A beautiful copy of " Robert Burns' Grave " will be given for the best
Solutions in August. Answers to Tangles will be published two
weeks after insertion, and all Competitions must be mailed before
the Answers are inserted. Address solutions to

Tangle Editor, Young Canadian, Box 1896, Montreal.

12. Active.
13. Promoting growth.
My initials, read downwards, form the name of a magazine
you all like.

(Answers in No. 33)

It is always a genuine pleasure for me to hear from my young friends
on any point on which they have anything to ask.—Ed. Post Bag.

PET-FANCIER.—Make your birdlime by boiling linseed oil till it
gets thick enough, stirring it well and having patience till it is
properly made. Pour it into cold water.

SAM. WOODS.— To varnish your walking stick, buy 10 cents
worth of hard varnish. Put it on very carefully. The less you use,
the finer the effect will be. A useful varnish, and one that will
serve you for your summer's cutting of sticks, may be made from
2 ounces gum mastic, 1 of gum juniper, ½ an ounce of turpentine,
and 1 quart spirits of wine. Mix them well. When you stop var-
nishing, set your brush in a small pot of cold water to keep it soft.

POULTRY KEN —You may tell the age of fowls by the look of
the leg, the spur, and the comb.

STUDENT The Young Canadian has nothing whatever to do
with politics in any shape or form. What we want to do is to draw
all our young people together, to solder them up a little, and to
teach them as much as we can about their country. When they
grow up, they can choose their side of politics as they please.

HENRY M.—To judge of the time to allow for a train in its stop-
pages, give five minutes per station. That is : if a train runs from
A to B without stopping and takes two hours, it would take two
hours and five minutes if it had one stoppage on the way. If it
had six stoppages the time would be two hours and a half.

SEASIDE.—The tides are caused by the attraction of the moon.
Hence it is that they vary in time and intensity with the position
of the moon.

MAID W.— At the equinox, the days and nights are equal all
over the world. The word equinox means equal day and night.
There are two in the year, namely March 22nd and Septem-
ber 22nd.

CHARLIE M.—You say your canary is losing its feathers round
the neck Try plain seed, a little green food, and a bit of a sweet
ripe apple. Paint the neck with pure olive oil. Keep the cage out
of a draught, and have the cage big enough to let the bird take
exercise.
