Read what Principal Smith, of Rose Avenue School, Toronto, says about the instrument:

Your 'Helioterra' is a gem. Soon after receiving it I gave some lessons on mathematical geography in several of the classes in my school, using the Helioterra to illustrate my remarks. Both the pupils and teachers are delighted with it. Indeed, it is in such demand that I can now seldom get it for use in my class, without making special arrangement. The little explanatory pamphlet that accompanies the Helioterra excels in merit. It is both concise and ample, and suggests the order in which the subject may be wisely taught. The Helioterra should be in every classroom, and in every home where there are young children."

The Patented Actual Business Plan

Of teaching is the one in operation in this school, and we know it to be infinitely superior to the old plan. By means of it a student will get a better business training in three months' work than he could get by an unlimited amount of text-book study and mechanical copying of imaginary book-keeping records.
