

TABLE OF CONTENTS

FOREWORD	ii
PREFACE	iii
GLOSSARY	iv
1.0 INTRODUCTION	1
1.1 Emerging Biological Threats	1
1.2 Technical Progress on Peptide Toxins and Bioregulators	2
1.3 Toxins and Biological Weapons Control	4
1.4 Novel Toxins and Bioregulators	6
1.5 Terminology: Distinctions and Ambiguity	7
2.0 TECHNOLOGICAL CHANGES AND PEPTIDE TOXINS AND BIOREGULATORS	12
2.1 Peptides	13
2.2 Genetic Engineering and Peptides	14
2.3 Chemical Synthesis of Peptides	16
2.4 Commercial Production of Peptides	20
3.0 NOVEL TOXINS AND BIOREGULATORS	25
3.1 Conotoxins	25
3.2 Sarafotoxin-Endothelin	26
3.3 Bioregulators	27
3.4 Substance P	30
3.5 Thyroliberin (TRF)	31
3.6 Gonadoliberin (LRF)	33
3.7 Somatostatin (SS)	34
3.8 Neurotensin (NT)	35
3.9 Bombesin (BN)	37
3.10 Endorphins and Enkephalins	38
3.11 Dynorphin	41
3.12 Oxytocin and Vasopressins	41
3.13 Other Peptides	42
4.0 POTENTIAL DANGERS DUE TO CHANGES IN TECHNOLOGY	44
4.1 Changes in Potential Military Utility	44
4.2 Proliferation	48
4.3 Novel Toxins and Bioregulators as Incapacitating Agents: The Evolution of a Novel Category of Agents	49
4.4 Extrapolation of Current Technological Trends	50
5.0 CONCLUSIONS: IMPLICATIONS FOR THE BIOLOGICAL AND TOXINS WEAPONS CONVENTION	52
REFERENCES	55
