

In addition the Board provides a photographic story service for all films distributed commercially and non-commercially.

Films,
Filmstrips:

Theatrical films and newsreels for distribution in 35mm black and white are issued by the National Film Board in English, French, Spanish and Portuguese and occasionally in other languages for distribution in Canada and other countries of the world. Many films are also televised in the United States. In addition, the Board produces documentary films and filmstrips. Its films (16mm and 35mm, sound and silent, black and white and colour, English, French and other languages) cover a wide range of subjects such as agriculture, arts and crafts, economics, education, engineering, geography and travel, history, labour, manufacturing, medicine, natural resources of Canada, physics, psychology, public health and nutrition, social problems and planning, transportation and communications, war effort.

Graphics:

The Board maintains a photographic library consisting of 125,000 negatives dealing with various aspects of Canadian life, industry, agriculture, with the Canadian people, landscape and national character. It also produces posters, wall-hangers and other graphic material as well as large and small displays on basic aspects of Canadian life today.

27. NATIONAL RESEARCH COUNCIL.

SOURCE: - The Officer-in-Charge,
Research Plans and Publications Service,
National Research Council,
Ottawa, Ontario.

MEDIA:

Publications: Periodicals: *Canadian Journal of Research* (monthly, English).

Other publications: The Research Plans and publications Section of the National Research Council issues lists of publications and supplements of a specialized scientific character.

These publications are reports of experimental work carried on by the Council in the fields of technology, physical, chemical, botanical, zoological and medical science.

An illustrated folder on "Aeronautical Facilities at the National Research Laboratories" was produced for limited circulation.

Filmstrips:

A filmstrip dealing with Canada's research facilities in general was produced and is being distributed on behalf of the Council by the National Film Board.
