PORT CREDIT HARBOR BOUGHT. Policy of Public Ownership is Carried Out.
Out.
OTTAWA, June 23.—The Dominion Government has purchased a harbor at Mckin-Dar.-Savage
Fort Credit, Ont., for \$30,000, It was Object. Policy of Public Ownership is Carried

of London, England, While it is not generally known, a system obtained in the old days of selling harbors to private parties, who built wharves, etc., and collected tolls on them. It is the policy of the gov-ernment to make the few privately owned harbors public.
For years the Port Credit harbor has been little used except for a few fishing

TONIGHT'S BAND CONCERT:

The band concert in Dovercourt Park, which was postponed from Friday night on account of rain will be given tonight, when the City Band. under the direction of J. Andrew Wig-Rea Mines ......

### IRON FOR LEAD HEMLOCK FOR PINE

lead weights was double that of iron. He had put in lead weights himself in small jobs a long time ago. "But." he declared, "I was green then."

In the absence of Mr. Geary, Judge Winchester conducted the cross-examination, his questions being supplemented by those of C. A. B. Brown of the board of education.

Another contractor, Fred Armstrong, declared that he had understood that the clause in the estimates specifying lead weights was only inserted so that if a condition showed up where lead was necessary it could be put in without extra charge. However, Mr. Armstrong and Mr

Williamson alike admitted they had used hemlock where pine was specified and made no reduction or allowance on that account. The investigation showed as well that carpenters engaged at 30 cents per hour had been charged up to the board at 45 cents, and that the profit on materials ran to 40 or 50 per cent to 40 or 50 per cent. Who "You charged a profit of 50 per cent. \$1.00.

on your men's time and 50 per cent. on material," stated the judge in the course of his examination of Fred Armstrong. "Look what we've done for them," replied Mr. Armstrong, with a bene-volent wave of his hand. "You always charged extra for any-thing you did," declared his honor. Court adjourned shortly after lunch and the investigation will be resumed when Corporation Counsel Geary re-turns from Ottawa.

#### AEROPLANE TURTLED AVIATOR DROWNED

ROCHESTER, June 23 .- (Can. Press.) -Fred F. Gardiner, an aviator, was drowned in Lake Kenka this afternoon, according to a despatch from Bath, when his aeroplane fell about 150 feet. Gardiner is said to have lived in Portland, Me. The aviator had been in the air for some time and had executed a series of brillant manoeuvres. Turning to go back over his course he banked too sharply and the machine fell upside down into the water. Divers failed to recover the body.

## **NEBRASKA YIELD RECORD BREAKING**

THE TURONTO WORLD

to become a total failure. Later, how-ever, good authorities contradicted the damage reports in regard to at least a part of the ground spoken of. It was also learned that millers, north-west who were buying a good deal of cash wheat from elevators, had been reselling future options to speculators. According to Nebraska advices, thirty bushels of wheat to the acre was proy-

According to Nebraska advices, thirty bushels of wheat to the acre was proving to be a common yield there, and forty bushels was met with frequently enough to exceed all records of yield outside of the Pacific slope.

Rains in Corn Belt.

General rains covering the chief producing states and affording relief from drought, made the corn market sink. A notable increuse in stocks on hand tended also to encourage selling. Ideal weather for the growing crop put oats under bear control. Besides the visible supply increase was heavy. Influential buying lifted provisions. Business, however, did not reach a large total.

#### EUROPEAN MARKETS.

The Liverpool market closed unchanged on wheat and ¼d lower on corn. Antwerp wheat was unchanged, Budapest %c high-er, Berlin ½c lower.

ST. LAWRENCE MARKET.

Receipts of farm produce were 200 bushels of grain. 3 loads of hay and 1 load of rye straw.

### CARE IS TAKEN WITH THE FILMS

"Quo Vadis" Pictures Guarded as Carefully as Any Star.

KEPT IN SPECIAL TRUNK

Safer From Fire Than in Any Safety Deposit Vault.

No prima donna was ever guarded with more care by her manager, than are the films used in the presentation of the Kleine-Cines picture drama "Quo Vadis," now in their final week at the Princess. No tenor's tender throat was ever protected from the damp night air more zealously than are these same films.

If his silver-throated soprano is not solicitously cared for between performances, the manager must an-nounce with great regret that the ex-pected treat must be forgone. A tenor's indisposition means the entire operatis thrown out of its accustomed highclass rendition, and maybe has to be abandoned altogether. Many imagine that the "Quo Vadis" films are merely hauled from an old cracker box before each performance, attached to a machine and reeled off, and then left piled on the shelf. Nothing could be further from the

When the American rights to this supreme masterpiece of motion photo-graphy wers secured by Mr. George Kleine, he told his staff that they must look upon him as an impresario and themselves as his assistants in presenting in the best possible way the remarkable films telling Henryk Sienkiewicz's story of the last of the Caesars.
The first step in the caring for the

prima donna of the production, the films, was the construction of a specially designed trunk with eight com-partments, each lined with soft mater-ial that would have delighted the heart of a Farrar to have had it about her neck. These trunks may be tossed about at will, but the films are fully

There are only two keys to the trunk one kept constantly by the manager and one by the chief operator. Each night the trunk is locked in the booth containing the machine. and they are safer here from fire than

in the biggest safe deposit vault.
Then the "tener" of the production is the iens that is placed on the front of the machine. A particle of dust on the surface of the glass might mean a disfigured picture so one of the operators has the special commission to keep the "tenor" in first-class condition for all performances. The other operator must keep the "prima donna" tuned up for use at a moment's notice.

## MADE A ROUND-UP OF HIGH-GRADERS

Three Women and Two Men Arrested at Cobalt-Elaborate Plant.

COBALT, June 23 .- (Special.) - One of the biggest high-grade seizures made in the camp in some time has been made in Cobalt by Inspector A. r. Rowell and Provincial Constable Jerry Lefebvre, whereby five persons are locked up in the provincial jail.including three women. From the seizures of tools made, the police are certain they have found the place from which sliver rings, crucifixes, ets.. have been manufactured for some

time past.

John Borock and Joseph Matiazuik, Polish miners, working in Cobalt. were taken into custody on Saturday, by the provincial police, and at the time of the arrest, about 10 pounds of silver necklace, maitese crosses, swas silver necklace, mailese crosses, swas-tiks luck charms, hearts, ets. With the seizure on Saturday were found various moulds and rings partly com-pleted, and several ounces of dust from the filings were also taken by the police, who believe that in this raid they have put a stop to the manu-facture of solid silver charms, which facture of solid silver charms, which has been going on illegally in camp for some time.

Tried to Hide Silver.

This morning a visit was paid to the house in question, situated on Lacrosse street, just off Lang street, and on the side of the railway tracks with the result that the three women were arrested and the police are now looking for Harry Partnoik alleged to to implicate in the wholesale

The arrival of the police caused a The arrival of the police caused a flurry among the three women in the house. Mary Partnoik a girl of 17 years, ran out of the house and hid a tomato can containing a couple of pounds of silver, while the other women showed great agitation. In the cellar of the house the police found fresh diggings and a few feet from the surface uncovered saws, chisels, files and other tools with which work had been done. A small furnace work had been done. A small furnace was also found in an outhouse at the rear. More silver was found secreted in tins and altogether, the police have between 12 and 15 pounds

#### JUDGE HAS VIEWS ON POKER ETIQUET

But His Honor Doesn't State Them in Case Arising From I. O. U.

"Now, would you like to know my private opinion of persons who don't pay poker lebts-not my judicial opin-ion?" asked Judge Morson yesterday, and even the court officials were interested. But the judge edged off. "I'm sure, tho," he remarked, "that Mr. Varcoe must have had some very good reason for refusing to pay this

L O. U." The case arose out of the claim of Mrs. J. C. Riach against J. A. Varcoe for \$190, the amount of an I. O. U. made out by Mr. Varcoe, which came into the plaintiff's possession.

Mr. Varcoe stated that the note was by statute non-collectible. He said he would not pay simply because Mrs. Riach had bothered him so much. After some argument an argument an argument an argument was related by which Mis. Riach and bothered by which Mis. Riach argument was related by which Mis. Riach argument was able to fescue him.

A Branch of this Bank has been opened at the Northeast Corner of Eglinton Avenue and Yonge Street.

It is equipped to transact banking business of every description.

SAVINGS DEPARTMENT

As in all Branches of the Dominion Bank the Savings Department receives special care. It may be made a convenience for household accounts, and a safe depository for always available money earning interest throughout at current rates.

C. A. BOGERT,
General Manager.

# Does Mining Pay?

Search the realms of "Foolish Questions" through and through and it would be utterly impossible to find one more foolish than "Does Mining Pay?" An idea of the magnitude and importance of the mining industry may be gleaned from the following extracts from the editorial relative to mining dividends in the issue of April 5th of The Daily Mining Record: "The true measure of the prosperity now apparent in the mining regions of the west may be found in the dividends being disbursed to the holders of mining securities. During the first quarter of 1912 there were 83 companies in the list of dividend-payers, with a total disbursement for the quarter of \$21,700,390. Approximately the same amount was distributed during the corresponding quarter for 1911. For the current year, however, reports compiled by The Mining World show the number of profitearning companies has been increased to 114, and the amount paid out to shareholders has been raised to \$23,304,820.

"It is interesting to note that, since organizing, the companies participating in the payments during the first three months of the present year have paid out a total of no less than \$712,197,042. This is a return of \$108,629,690 in excess of the combined issued capital of the 114 companies, a record of which any industry might well be proud. There are 84 of these 114 companies which are producers of gold, silver, quicksilver, lead and zinc, of which 54 have property in the United States, 18 in Canada and 12 in Mexico. With this as a start upon the new year, the mining industry might well expect a very prosperous year."

Remember, this is all new wealth extracted from the earth's vast store of treasures. In earning these hundreds of millions work was given to tens of thousands of men with excellent wages, and not a cent of the money came from the pocket of any man, but came direct from the earth, the source of all true wealth.

Notwithstanding these facts, it is no uncommon event for some "eminent banker" to break into print with the timeworn fabrication that it costs two dollars for every dollar dug from the ground. These men should, and often do, know that their statements are utterly and absolutely untrue. Unassailable statistics prove positively that intelligent mining has paid greater profits than any other industry. Moreover, the improved science of mining and metallurgy assures even more gratifying profits in the future. Many ore bodies which were not commercially valuable & few years ago can now be very profitably worked. Naturally enough, the bankers of the country would be pleased if the people would be contented to deposit their money in the savings banks at the interest rate of 3 per cent. per annum. Real, live human beings, however, know that the true earning power of money is very much above three per cent. per year, and there are hundreds of thousands of men and women throughout the country who insist upon investing their money where it has a chance at least of paying them a profit really,

The question now naturally arises, How can I find a good mining proposition that will pay me good returns on And here is where we wish to call to your attention the opportunity afforded you for a safe, sound and profitable investment in the purchase of the shares of the King Quicksilver Mining Company, Limited. The Company's property is not a prospect, but a thoroughly proven mine, which has always demonstrated its earning powers. although only operated in the crudest manner. Under the new management the property has been thoroughly proven by driving tunnels into the ore body, and the Company have already blocked out sufficient ore to keep a 30-ton furnace going to its fullest capacity for the next nine years. New and up-to-date furnaces and concentrators are now being installed, which will enable an output of over 600 flasks of quicksilver per month, for which there is a ready market at a handsome net profit. You could not find anywhere a mining investment that qualifies more thoroughly in every important particular than King's Quicksilver Mining Company, Limited. The mine is rich, the Directors are strong financially and reliable men, and the mine is being vigorously developed under the direction of a highly efficient mine manager.

Knowing these statements to be true, and believing implicitly that the King's Quicksilver Mining Company, Limited, has a great future, we advise you to seize this opportunity of securing a block of this stock at the present selling price of 70 cents per share. Illustrated booklet, containing the fullest particulars regarding this investment, will be cheerfully mailed to you upon request. Write us at once. J. A. #### ASSESSMENT REDUCED BECAUSE OF SKEETERS

Revision Court Sympathized With Plea of Kippendavie Ave. Resident.

Kippendavie avenue is very near the lake and not far from Ashbridge's Bay. The location has advantages in point of scenery, but there are marked disadvantages in point of mosquitoes. And that is why A. P. Buckner, who lives on Kippendavie avenue, will pay henceforth only \$15 per foot assessment instead of \$22 as formerly. "I daren's walk around my hous without thigh boots," he declared yesterday in the court of revision. "The mud comes up to my knees."

Mr. Buckner also pointed out that the swarms of mosquitoes which in-fested the swamp were a plague to the neighborhood, and a detrimen; to property. ENGLISH AVIATOR DROWNED.
