RAPS SIR WILFRID

Unionists Damned by Faint Praise and by Controller McBride.

"There have been too damned many orders-in-council for the good of the "I'm thru with Union government, and stand a Tory, first, last and all the time." The Canada Food Board, which Mr. McBride designates the "fool board," also came in for a scathing fire. Speaking on police matters he said: "Inspector Mulhall, who was discharged from the police force because he refused to draw his baton on a returned soldier, ought to be reinstated." The controller also had several suggestions for ridding Toronto of the alien sur-

feit. A letter was read from Herbert M. Mowat old-time Liberal and now Mowat old-time Liberal and now ment with faint praise, and then took sent and supplied the music, and a rap at his old chief, Sir Wilfrid Lau- songs in Italian and English were rier. The letter in part read:

fers of grants, no matter how sub-DECEMBER stantial, and that these governments should undertake aspecially organized system of distribution of such grants for land allotments and building purposes, was the meat of a stir-ring address delivered on Sunday af-cernoon at the open forum, Foresters' Hall, College street, near Yonge street by Thomas Adams of Uttawa, the well known town-panning expert. A solution, said the speaker, well worth trying, would be a comprehensive plan drawn up and directed by a central body at Uttawa in co-operation with provincial and municipal bodies. This well organized undertaking on the part of the government, said Mr. Adams, would be a strong channel lor combating the depredations of the eal estate speculator. The work of the speculator in Canada had been carried to such a pass that the time-honored custom valuing a building at three times the value of the land on which it stood, a condition still prevailing thruout Europe, was reversed in Canada. \$10,000 an Acre. It was difficult for the average speculator to sell land wholesale at \$10,000 an acre, so he sold ten thou sandth parts at a dollar each, or subdivision lots in like proportion. Land

was valued so high in a certain un-improved section of Vancouver tha. a lot in that subdivision sold for \$2,000, and yet was capable of siting only one house. This figure did no. include even the most elementary city improvements such as drainage. The.e was a sub-division in North Toronto of about 375 acres. At present it was populated by 750 people who were paying taxes and other expenses which easily 3,500 people could have borne. In this case a few people were paying heavy taxes on property which could have been conveniently parceled to five times the present number of residents. The long and short of the matter

was that land was no scarcer in Can-ada than in Britain, but Canadian lots were several times dearer than the same class of lots in Britain. It would be well, said the speaker, to for all buildings and improvements before selling them in small lots to the citizen. This system was invariably followed in Britain, and as a result and speculation had become a lost art.

URGE VICTORY BONDS FOR RETURNED SOLDIERS

Windsor, Dec. 1 .- A \$50 Victory bond Windsor, Dec. 1.—A \$50 Victory bond as a Christmas gift for every returned soldier, the money to be obtained from a part of the over-subscription to the Victory Loan, is a suggestion made by members of the local Sportsmen's Patriotic Society, an or-ganization formed in 1914 to look af-ter the welfare of soldiars and acdu ter the welfare of soldiers and assist them 'inancially and otherwise. It is estimated that \$2,000,000 set aside by the government would accomplish the scher

The Blood Pressure

"WHAT is the meaning of blood pressure?" you may ask, and

"What has it to do with the health?" For as much as we hear of blood

pressure these days it is somewhat of a mystery to most people.

Perhaps the easiest way to explain it is by comparison to water pressure, whereby water is supplied to homes and made available upstairs and down at a mere turn of the tap.

The blood in the human body is under a similar pressure as you will know if you cut an artery and see the force with which the blood spurts out.

The arteries may be likened to the rubber hose which you attach to the water system in your house. So long as the rubber retains its elasticity you do not fear trouble, but as it gets older and harder and begins to crack you dread the water pressure which is everywhere testing the strength of the hose.

And so it is with the arteries. The walls of the arteries harden as age advances, more particularly if the vital organs are not doing their full duty in filtering and purifying the blood and keeping it in rich, healthful condition.

When your physician suspects that your arteries are hardening and losing the elas-

ticity which enables them to withstand the strain put on them he recommends that you have your blood pressure tested. Then he seeks a means of improving the condition of the blood and of restoring the health and vigor of the digestive, filtering and excretory organs.

In the great majority of cases the weak functioning of these organs is due to the low vitality of the nervous system, and the use of Dr. Chase's Nerve Foot is resorted to with most satisfactory results.

Comparatively few people ealize that the healthful working of each and every organ of the human body is dependent on the amount of nervous energy with which that organ is supplied, and that when nervous energy is consumed in overwork or worry, in sorrow or mental anxiety, these vital organs must fail for want of motive power.

Dr. Chase's Nerve Food cures by improving the quality of the blood and increasing the amount of nervous mergy in the human system. In other vords, it increases vitality, and this is what is lacking in persons whose arteries are hardening and whose blood pressure s consequently rising. 50 cents a box, 6 'or \$2.75, all dealers. or Edmanson, Bates & Co., Ltd..
