The C. P. R. Cut-Explanation From the G. T. R. Management.

The Intercolonial and C. P. R. Come to money is paid.

The Canadian Pacific has made another cut in rates to points reached by the Midland Railway and also a second cut from Toronto to St. Thomas Grand Trunk says it will not meet these cuts, as it would dislocate local traffic.

COME TO TERMS. [G. N. W. Special to The Advertiser.] Montreal, March 4.—The rate difficulty between the Intercolonial and C. P. R. has been satisfactorily arranged, and the cut rates which were announced a w days ago will cease at the end of the present week. The reduction to Levis continues as an excursion rate till tomorrow.

AN EXPLANATION. Montreal, March 4.—The Grand Trunk has issued a statement showing that so far as influencing people to outfit for Klondike at Seattle is concerned, it merely obliges its patrons the same as other roads to agents there who will help people traveling in any way in their power. To show that the C. P. R. does exactly the same thing, the G. T. R. quote a letter written by G. V. Skinner, C. P. R. agent in New York to the C. P. R. agent at Seattle to the same lines as the Nadeau letter obtained by the C. P. R.

AT MONTREAL Montreal, March 4.—There was no rate cutting yesterday, so far as Mr. McNicholl, who holds the axe at the C. P. R., is away in Boston. Neither was there any change in the situation so far as the Intercolonial Railway is concerned. The report from Chicago that the western lines are willing to go into a conference with the C. P. R. with the object of restoring transcontinental rates does not materially alter the

standing of affairs. NOTES. Grand Trunk men are making big wages nowadays. Brakemen now earn from \$60 to \$85 per month and conductors from \$100 to \$130 per month. Some of the men have made as high as 54 days in a month. This is an evidence that prosperity has struck the railroads.-Sarnia Observer.

Mrs. Barfitt, of Dorchester, Identifies Her Stolen Birds in a Farmer's Sleigh on the Market,

The end of the chicken stealing business is not yet in sight, and as a sequel to what has already passed in the case of Wm. Lake, Joseph Boldrailway have been signed, sealed and ick and Chas. Baker, comes still another development. Yesterday Mrs. Lucy A. Barfitt, of North Dorchester, in walking around the market square, came across a sleighload of chickens, and in the box identified some of the birds, which she claims were stolen from her place on Feb. 24, while she was away from home. The owner of the sleigh was not in sight, and Mrs. Barfitt procured a search warrant from Squire Smyth, which was executed by Constables Saddler and Barclay. They were accompanied to the sleigh by the woman. Mr. Pratt, of the Gore road, the owner of the sleigh, was immediately placed under arrest, charged with theft. The constables took charge of the poultry and brought Mr. Pratt be fore the magistrate, where he stated out through the returns not being sign-

The Human Mind.

The Physiological Basis of Psychology

-A Treat for the Students. "The Physiological Basis of the Human Mind" was the subject of a brilliant lecture by Dr. H. A. McCallum at the Western University last night, under the auspices of the literary society of that institution. The mind, the Canadians will establish a cuspsychology. The minute anatomy of the nerve, with the short tree-like branches called dendrons, and its long branches giving rise to the nerve fibre, were next dealt with. The granules,

There was no connection between one nerve cell and another, but whether attracted by the dismal howling of a a dance, or whether this fibre changes said they were returning Klondikers, in which the dendrons are placed, the lecturer said remained an open ques-The study of reflex action West next touched upon and examples given. Voluntary action was shown to have points of strong resemblance to reflex action and to have grown cut of it, or reflex action was once voluntary action long ages ago, and from shown that there could be no action of a voluntary character without external stimulus. The development of consciousness and its divisions into simple self and cosmic were also dealt with. Consciousness was shown to be present in every animal cell in elethis elementary consciousness. The development of several sensations was a loss of \$12,- with the senses of smell, taste, sight, the expenses \$49,242, making a loss of Two-thirds of the brain was not conthe mountains, which is only twelve \$9,489; in 1897 the revenue was \$42,000, nected with any of these points. The miles from salt water.

to function. The functions of these divisions were rather the functions of all their connections with the rest of the nervous system and body, and changes in what we call the body bring about changes in what we call the mind. The lecturer illustrated this point with the story of a man in England who had no sense of touch, smell, sound, nor taste, his only communication with the external world being by the sight of one eye. When it was opened he was awake, and to render him unconscious in heavy slumber was

the only thing necessary was to close the eyelid with the hand. The lecturer frequently applauded throughout the discourse. During the evening a programme was given, including a solo by Miss Gibson, a reading by Rev. Dr. English, a vocal solo by Mr. Smith, and a short talk by Dr.

Unfounded Accusation.

Col. Leys Not To Be Intimidated or Perjured Out of His

Rights. Affidavit-Makers Challenged to Face the M.P.P.-Elect in the Open.

The Advertiser learns that one or more persons in the city have been induced to make sworn statements that they know that Col. Leys, M.P.P.,elect, was guilty of personal bribery Mr. Doherty, St. Thomas, and others It is alleged that one or more persons have been influenced to do so by Conservative agents. An Advertiser representative, having heard the report, interviewed Col. Leys. "Yes, I have heard position to know say that oil in paying the same report," said the colonel. "The accusation that I either bribed a voter, or treated a voter or voters, during the campaign is absolutely without foundation. If any man so declares, he says that which is not true. If he has been induced to swear to an affidavit to that effect, he has been guilty of perjury, and I am prepared to take immediate action to have him convicted and sent to the penitentiary if the affidavit is placed with my solicitor or filed where it can be reached by the officers of justice."

This declaration by the M. P. P .elect is explicit. It cannot be misunderstood. It is a challenge to those Conservative agents who have been moving heaven and earth to get something to the colonel's discredit. It is also a warning to citizens not to allow themselve to be put into compromising positions that may land them in jail, merely to gratify the wishes of others.

Blood That Is Rad Blood that is bad makes the whole body sick. Blood that is good makes the whole body healthy and vigorous. Burdock Blood Bitters makes good, rich, ruddy blood. "I regard B. B. B. make rich, red blood. It cured me after two years suffering from weak, thin blood." JENNIE A. GLEASON, Centerton. Ont.

gold dust, one \$90,000 and the other \$70,000. Their names are not known. THE FLAG INCIDENT. Seattle, Wash., March 4.—Five steamers arrived from Alaska yesterday. The most important news brought down was a confirmation of previous rebecoming skilled movement dropped ports that a Canadian official had into the reflex class. Indeed, it was raised the British flag on what is regarded as American soil, and that there was trouble at Skaguay with longshoremen who objected to Indians unloading freight from steamers. The presence of United States troops alone prevented serious trouble. A compromise was made with the white men to mentary form, and motion sprang from perform the work at 50 cents per hour. It is feared that serious trouble will line was at Lake Bennett, then at Lin-

A THAW. Two days before the steamer Queen left Skaguay the wind which had blown from the north continually for seven weeks shifted to, and began to blow from the southwest, causing a general thaw to set in. The change in the weather caused hundreds of people who had been detained by the severe cold to start over these trails from Skaguay and Dyea, and when the steamer left Sunday a general exodus from both towns was taking place. Both trails are reported in excellent

OIL DEVELOPMENTS.

Point Edward May Become an Oil Well Center.

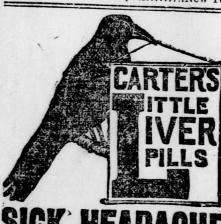

Two wells have been drilled at Point Edward, and both are nice paying producers, with a large gas supply. The gas is valuable to the place, even if they did not have any oil. There were two wells put down in the town of Sarnia last summer, near the town hall, and they both had oil in them, with a small quantity of gas. In most cases where oil and gas are found in small quantities there are larger well to be got near by. A little more money spent on drilling would likely make Point

Edward an oil town. It is li ly that a test will be made this summer of some of the farms in Moore township, on the eighth concession, near the Sarnia plank. It is said that years ago gum beds existed somewhere in that locality. We hope, before another year is over, to see our farmer friends on the eight concession of Moore and Enniskillen producing oil in paying quantities. This is a part of the county that has been slighted by the drill. Our advice to the farmer is,

drill yourself, or let somebody else do it .- Petrolia Topic. Prospecting for oil in the immediate vicinity of Alvinston, commenced on Monday last, on the farm occupied by Mr. Robert Watts, Mr. Lou Travers and treating during the late campaign. The operations are under the direction of Mr. Howard, of Pennsylvania, an expert in this line of work. Over 1,000 acres have been leased in the immediate neighborhood, and a most thorough test will be made. Those who are in a quantities will be found. The prospects for a boom of a substantial character that will enhance the value of property in this section are good. The coming season will be a prosperous one
