Studebaker

"Built-in-Canada"

This is a Studebaker Year

We have been asked the question how we account for the tide of Studebaker popularity which has swept the country.

Among others, two fundamental causes explain it:

1. The outstanding cause is the value of Studebaker Cars, in quality, style, performance, durability and price, demonstrated by the complete satisfaction and enthusiasm of nearly one-half million owners who know values.
2. The universal respect for and confidence in the integrity of the name STUDEBAKER which for seventy years has been the symbol of quality and fair dealing.

Crowning proof of the dependability of Studebaker cars is reflected in our diminishing business in service parts.

With approximately 116,000 more Studebaker cars in operation on September 1st, 1921, our parts business the first eight months of this year was 3% less than in the same period two years ago.*

While our car manufacturing plants operated this year 41% ahead of last year, our service parts manufacturing plant has operated at from one-half to two-thirds of last year.*

Studebaker Cars are standing up in service and staying out of repair shops, to a degree unexcelled, we believe, by any cars of whatever price.
