## NOTES AND COMMENTS.

The institution of the penny savings in the Des Moines, Ia., schools has proven most successful. According to the report of the recent annual meeting, the boys and girls of the school have deposited a total of \$22,811.53 in the three school years the organization has been in existence. The withdrawals have been much less than half this amount and they now have on deposit a total of \$12,063.56. The Penny Provident Association was established in the schools in October, 1901. Its object is to encourage and make attractive the saving of small sums of money by school children. This will induce the child to be thrifty, economical and happy in the possession of something all his own and inculcate upon him the necessity of saving his money for something better than merely satisfying a gum or cigarette appetite.
