

Genus **Agabus** Leach**Agabus nigripalpis** Sahlb.

Teller, Alaska, August 1913, one specimen, F. Johansen, collector; Collinson point, Alaska, September 1913, six specimens, F. Johansen, collector; Barter island, Alaska, July 1914, one specimen, D. Jenness, collector; Demarecation point, Alaska, May 1914, two specimens, F. Johansen, collector; Bernard harbour, Northwest Territories, May to August, forty-two specimens, F. Johansen, collector; Colville mountains, Wollaston peninsula, Victoria island, July 1914, one specimen, D. Jenness, collector.

This variable species, taken by R. Bell at Stupart's bay and cape Digges, Hudson strait, was regarded by Dr. Sharp as probably a variety of *Agabus congener* Payk.

Agabus infuscatus Anbe.

A single specimen; Teller, Alaska, July 29, 1913; F. Johansen, collector. Very common at some points in Labrador.

Agabus obsoletus Lee.

Collinson point, Alaska, September 1913; F. Johansen, collector, two specimens.

Described from San Diego, California. I have a large series from Oregon (Corvallis and Gaston).

Genus **Colymbetes** Clairv.**Colymbetes dolobratus** Payk.

Teller, Alaska, July 1913, F. Johansen, collector, two specimens; Bernard harbour, Northwest Territories, May to July, F. Johansen, collector, seven specimens. An Alaskan and Siberian species.

III. **RHYNCHOPHORA** (except **IPIDAE**).

By CHAS. W. LENO.

Genus **Lepyrus** Germ.

The species of *Lepyrus* inhabit the northern parts of both hemispheres, extending southward in America to the White mountains of New Hampshire, the swamps of Genesee county, New York, Michigan, Wisconsin, and Colorado. The larvae live in willows and aspens.

Lepyrus gemellus Kirby.

Langton bay (Franklin bay), Northwest Territories, V. Stefánsson, collector, summer 1911; No. 1687.

Lepyrus capucinus Schall.

Langton bay (Franklin bay), Northwest Territories, V. Stefánsson, collector, summer 1911; Nos. 1671-3.
