

SESSIONAL PAPER No. 19a

PAGE.		PAGE.
.. 402	C—Lock Gates..	429
.. 402	Dimensions..	429
.. 402	Weights..	429
.. 402	Design..	430
.. 403	Types..	431
.. 403	Material..	432
.. 404	Rise of sill..	433
.. 405	Air chambers..	433
.. 406	Quoin post..	434
.. 406	Miter post..	435
.. 409	Steel bearing pieces..	436
.. 410	Framing..	436
.. 410	Horizontal frames..	437
.. 411	Proportioning of horizontal frames..	439
.. 412	Sheeting..	439
.. 412	Pivot..	439
.. 413	Upper hinge..	440
.. 414	Sill contact..	440
.. 415	Foot bridge..	440
.. 416	Estimates..	441
.. 416	Explanatory note..	441
.. 418	D—Electrical Equipment of Locks..	442
.. 418	Description..	442
.. 419	The generation of power..	443
.. 420	Electrical equipment for operating the locks..	443
.. 421	" " lighting the lock; its guide cribs and adjacent land line	444
.. 422	Estimate for an electrically driven outfit for unwatering the lock..	445
.. 423	" the operating machines for gates and valves..	445
.. 424	Cost..	446
.. 425	Detailed description of equipment..	447
.. 426	E—Concrete Lock Walls, Dimensions, Stability, &c..	451
.. 427	Chamber walls..	451
.. 428	Abutment walls..	455
.. 429	F—Material in Lock Gates..	462
.. 430	G—Stoney Sluice Gates..	466
.. 431	Design and description..	466
.. 432	Cost..	468
.. 433	H—Hydraulic Machinery for Operating Lock Gates and Valves..	469
.. 434	Cost..	469
.. 435	Description..	469
.. 436	Operation..	470
.. 437	I—Acetylene Lighting System for Locks and Approaches..	472
.. 438	Equipment and cost..	472
.. 439	Description of system..	472
.. 440	Diagram showing generator..	472
.. 441	Advantages..	473
.. 442	J—Derivation of Amount of Water Required for Power at Summit Level..	474
.. 443	Power for gate and valve motors..	474
.. 444	Power for lights..	475
.. 445	K—Preliminary Reconnaissances Regarding Storage Possibilities of the Upper Ottawa	
.. 446	River Water-shed..	476
.. 447	Grand Lake Victoria Basin..	476
.. 448	Kakabonga ..	477
.. 449	Du Moine basin..	478
