

# THE SPECTRE OF WAR

The back yard of war.  
La cour en temps de guerre.

The war, the grim war of famine is threatening the whole world.

Britain, France and their allies will need and must have ample supplies of food, for years to come, even if peace was declared within the next six months.

Canada is the great source upon which they can rely.

Greater production is a vital necessity, for those who live, as well as for those who are giving their lives for us on the battlefield of civilization.

Everyone with a few square feet of ground can contribute to victory by growing vegetables . . . . .

**First :** Clean-Up; then cultivate the vacant lots or grow vegetables in your back yards.

**Make the effort worth while.** — Every dollar's worth of vegetables you grow will help to lower the "High Cost of Living".

## BOYS AND GIRLS

here is a splendid chance to spend usefully some of your spare time.

Ask your parents to help you in this task.

Start now — register your willingness.

Give us your name and address.

Win the Prizes.

## Read the Rules of our Contest

Everyone, whether he knows little or much about gardening, has a chance of winning a prize.

**Join us.**

## MEN AND WOMEN

It is possible to grow some kind of vegetables successfully on most of our vacant lots—even in your own back yard.

Lend your support to this movement.

Help the children — help the country.

**Help Yourselves.**

**CLEAN!**

**GROW!**

**PRODUCE!**
