

Cha'n and anns are not monosyllables except to the eye. In cha'n the n stands for no, and is invariably pronounced along with the word which follows it, as in cha n'òl. Anns an taigh is pronounced in ordinary conversation an san taigh. Should we not, then, write an san taigh, especially when we know that the preposition anns exists only in books, and that san is an old form of the article and still exists in the spoken language?
