MARKET REVIEW AND FORECAST

Toronto, Monday, June 17.—Not in many years has condition been as late as this now. Farmers generally will do more plowing than having this June. People, land and retailers report slow trade. This condition has created a depressed spirit, orders for fall goods are slack. Wholesale buyers, however, are slow to trade with plow and warmer weather, and the tone of the market is healthy. A feature in the farm produce market this week are the operations of cold storage men, who are now buying for their winter supplies. This has steadied the prices of butter and eggs, and in a few cases prices have advanced slightly in the face of increasing receipts. Other lines are generally steady, but cattle show a decline, due to poor quality.

small meats larger than usual; active demand. Sheep, \$5 to \$5.50; spring lambs, \$6 to \$6, calves, \$5 to \$5.50.

MONTREAL HOG MARKET  
Montreal, Saturday, June 15.—There was a weaker feeling in the market for live hogs this week, and prices declined slightly at the opening, owing to the more liberal supplies. But after a few days were made at an low as \$9 to \$9.25 a cwt., weighed off cars, and the week is closing with a few prices ruling, as low as \$8.75 having been prices ruling, as low as the above there is also a weaker feeling in the market for dressed hogs, and fresh-killed abattoir stock is quoted at \$12 to \$12.50 a cwt.

EXPORT BUTTER AND CHEESE  
Montreal, Saturday, June 15.—The market for cheese developed a weaker feeling this week and prices have declined about 1-3c from those current a week ago. The ruling price paid in the country was about 13c a pound, but as low as 12-3-4c was paid at some markets. Supplies are increasing, and as the demand is not equal to the supply, buyers are cutting prices to force sales, and the British demand is still not equal to the supply. There is every evidence of a further decline next week, and prices are down to a level at which the demand from the other side comes on in full force. The receipts are still less than they were at this time last year, but are increasing rapidly, and will soon be equal to last year's figures, owing to the favorable weather conditions which portend of a large crop of milk, the bulk of which has been sent to these ports.
