

## Your Start

With Holsteins for 1917

Grace Fayne 2nd Sir Mercena.

2nd. They are bred in the purple and to the purple, pedigree to sell.

We also offer our Sr. Herd sire Grace Fayne 2nd Sir Mercena. He has proved himself to be a wonderful sire. We have, too many of his heifers in our herd to profitably use him. He is sired by the same bull as Sir Bell Fayne, who was Sr. and Gr. Champion at Toronto and Ottawa in 1915. He is a half-brother of Colantha Butter Girl, 30.87 lbs. butter in 7 days. He was 1st in the yearling class at the Canadian National in 1912.

Write or call at  
Clear View Farm,  
ANTHONY GIES,

King Segie Alcarra Catamy 2nd.

Waterloo, Ont., R.R. No. 1.

U need cows of good breeding and producing ability. We have them and they are for sale. Twelve heifers sired by Inka Sylvia Bos (a half brother of May Echo Sylvia) and bred to our Sr. Herd sire Grace Fayne 2nd Sir Mercena. Six heifers bred to our Jr. Herd sire King Segie Alcarra Catamy

Scottie's Nancy 2nd.

The Ayrshire cow who scored the highest for that breed in the dairy test at the Winter Fair, Guelph. Owned by John McKee, Norwich.

### A CANADIAN HOLSTEIN IN NEW ZEALAND.

THE following letter has been received by Messrs. A. D. Foster & Sons, Prince Edward Co., Ont., from Prof. H. North & Sons, Beaufit, Otago, New Zealand, to whom they sold Berrisyle Sylvia Pouch at one year of age. The trip from Prince Edward county to New Zealand took over two months, and about nine months after her arrival she commenced her first year's test work, winning the champion two-year-old record for yearly production for New Zealand. The letter is as follows:

"In reply to your enquiry as to the milking performance of the Holsteins I wish to inform you that the Berrisyle Sylvia Pouch, bred by yourselves and now owned by us, I have pleasure in furnishing the particulars of the Director of Dairy Industry of Agriculture, Wellington, N.Z.:

	Lbs.	milks	butter fat.
1 yr. 279 days	18,640	505.27	
3 yrs. 29 days	13,924.7	510.42	
4 yrs. 62 days			is again under official test.

"At present she is giving over 70 lbs. milk a day at 4.4 test. No special grain rations are used, as the winter weather here is not severe like the Canadian winters. To supplement the natural feed, we use bran, oat chaff and pulped turnips mixed. She has now become acclimatized, which usually takes about one year and 11 months old, which, as you know, is a serious drawback to any cow. The weather conditions, too, on this part of the east coast have been

very unsuitable for dairy stock up to date, ever since these cattle arrived. We thank you for photo of your young stock bull, and would esteem it a favor if at some time in the future you would let us know the quantities for one year of milk and butter fat given by the fastest daughters of Inka Sylvia Bess Pouch."

### GOOD R.O.P. WORK AT MERRICKVILLE, ONT.

M. R. J. C. JAKES, Merrickville, Ont., writes us as follows regarding the tests his bulls have been making:

"Just a few words as to our first year's R.O.P. work, which was finished last spring. We entered five mature cows and two 2-yr.-old heifers, and got the following results: Emma of Evergreen (8349), milk, 18,000 lbs.; fat, 677 lbs.; average, 2.95% fat. Jennie Abbecker De Kol 3rd (8215), milk, 17,098 lbs.; fat, 516 lbs.; average, 3.03% fat. Lady Waldorf De Kol 3rd (8219), milk, 17,458 lbs.; fat, 565 lbs.; average, 3.21% fat. Violet of Clear Sp'g Farm (6329), milk, 15,754 lbs.; fat, 499 lbs.; average, 3.23% fat.

Beauty of Evergreen's Puss (5230), milk, 15,511 lbs.; fat, 477 lbs.; average, 3.07% fat. Rose Starling De Kol (7219), 2 yrs. 20 days; milk, 10,374 lbs.; fat, 352 lbs.; average, 3.55% fat. Susan Biddle De Kol (7172), 1 yr. 346 days; milk, 10,323 lbs.; fat, 323 lbs.; average, 3.22% fat. The young bulls we are offering in this issue are backed up by some of those cows. We have five 2-yr.-old heifers running in R.O.P. this year, and find it very interesting work, and feel quite satisfied that it is well worth the time it takes to do it.

## HIGHLAND LAKE FARMS
