

## Help Your Seed Make a Big Crop

LARGER crops and a better grade of grain are bound to follow careful cultivation of the seed-bed. Seed in properly cultivated soil always has the advantage under all weather conditions. Give the crop a right start and prepare the seed-bed properly with a

### Peter Hamilton Spring Tooth Cultivator

Each tooth in the three rows can be set to cultivate exactly to the same depth and stay there under the severest conditions of work. This is only possible with the Peter Hamilton Cultivator and is because the front rows and back rows of teeth are attached to independent sections.

The sections and frame are extraordinarily strong and rigid and the hardest kind of ground is worked up with ease.

The exceedingly strong construction of the Peter Hamilton Spring Tooth Cultivator and the many adjustments that can be made gives a most reliable implement for use on the average farm. It works up the soil quickly to a smooth, mellow seed-bed just in the right condition for good seeding.

For exterminating weeds this cultivator is essential, and for this purpose extra wide steels can be provided to be used in place of the reversible points.

The High wheels, wide tires and perfect balance help to make this cultivator a pleasure to operate.

## Special Thresher for Gas Tractors

Any man who has a tractor will not be slow to see the advantages of owning his own Threshing machine. The White Challenge No. 1 is designed specially for that purpose, and it is well worth a place in "The First Quality Line" of Threshing Machinery on which the reputation of this house has been built.

Making Threshers and Tractors has been our special study and practically our only business for two generations. We have learned from long experience that threshing machinery must be built much stronger

than ordinary machinery, that every vital part must be greatly over-strength. We have learned where the greatest wear comes, and have found the proper grade of material to meet it. We have studied every feature, every new idea, every improvement, and embodied those of proven merit in White machinery.

Not only do we aim to produce the best machines, but we look after our machines after they are sold. Every man who deals with us gets the best service our big organization is capable of giving.

Write for information and descriptive catalogue, showing our Special Thresher for gas Tractors—the White Challenge No. 1.
