NON-COMBINE Binder Twine American Shropshire Registry Association, the largest live stock organization in the world. Hon. John Dryden, President, Toronto, Canada. Address correspondence to MORTIMER LEVERING, Sec., Lafayette, Indiana. 337-1-y-om

Those farmers who have used it pronounce the Stanley Pure White Sisal Binder Twine to be head and shoulders above all other twines for working qualities. We have handled this American (it is made in the U.S.) Twine for the past five years, and we have yet to have the first complaint from our customers.

It is a pure white, unoiled twine of great strength and great length of fibre. Being made of pure, unmixed sisal, it is not the nature of its raw material to have thick spots or bunchy gatherings, which decline to pass through the knotters without breaking. We guarantee every ball of this Stanley Sisal Twine to pass without a single hitch through every machine. It is as far ahead of Manilla Twine, as regards its working qualities, as Manilla is ahead of New Zealand hemp, and the many other raw stuffs that binder twine is now made of. We cannot speak too strongly in regard to its working qualities, as we know by experience that it has given in the past the greatest satisfaction of any 'twine we have ever sold. 'Sisal is now the standard raw material for binder twine in the United States, it having superseded the Manilla almost entirely, and not without cause.

It is put up in sacks of 60 lbs. our price is 10c. per lb., and we pay the freight to all stations in

and not without cause.

It is put up in sacks of 60 lbs., our price is 10c. per lb., and we pay the freight to all stations in Ontario on all orders of 120 lbs. and upwards. Terms, cash with the order. Send 2c. stamp for sample, or 50c. for sample ball by express.

NOTICES. AN In writing to advertisers please mention the Farmer's Advocate. ADVERTISEMENT PUT IN FREE PRESS, NOV. 11TH, 1892.

"MANITOBA WASHER." The ladies of Winnipeg, and all parties conerned, are invited to come and see dirty, oily overalls from the C. P. R. workshops, also very much soiled collars, cuffs, etc., cleaned with the Manitoba Washer, "Friday, 11th, at 3 p. m., in Victoria Hall, Notre Dame Street W. Representatives of the press will be present."

The following is the result as written by a

-Thos. McCrossan.

Free Press reporter:

The following is the result as written by a Free Press reporter:

Mr. Thos. McCrossan gave an exhibition in Victoria Hall, yesterday afternoon, of the washing machine invented by him some time ago. The cylinder in which the clothes are put to be washed is made to revolve by means of an upright lever, which is moved to and from the operator. By means of bars placed within the revolving cylinder the clothes are raised up and then plunged into the hot soap suds. With each revolution the clothes get three plunges, or one hundred and twenty in one minute. The strength of a small boy is sufficient to work the machine.

The exhibition consisted in putting through a washing of white clothes and one of colored garments, soiled about as badly as any that could be found in the city.

The white clothes were first put into the cylinder, then het water with dissolved soap was poured upon them; the machine was put in motion, the men, ladies and small boys taking turns in working the lever, and in seven and a-half minutes the first stage of the process was ended and the clothes were passed through a wringer. Then the coarser colored garments, which +were greasy overalls and overshirts worn by engineers and firemen of the C. P. R. Ten pieces were put through the same water, the machine being worked for twelve minutes. The water which was run out of the bottom of the machine at this time was black as ink, showing that effective work had been done; clean water was next added, and eleven minutes turning the machine followed. When put through the wringer they were inspected by the ladies present and pronounced clean; only a supply of cold water to rinse them out was further needed.

The white clothes were also put through a second water, in which they were plunged for six minutes. Boiling the clothes was dispensed with, the end having been attained by using boiling water in the machine with second suds.

The facts especially noted by the witnesser of the operation were the ease with which the work was done, the shortness of the tim

These machines can be put in Ontario by writing to McCrossan & Co., Winnipeg, Man. Every article washed clean, from a shirt collar to a pair of blankets. No wear on the clothes, and always a good color. Saves the trouble of boiling; also a small child can operate.

The reporters of the Free Press, Tribune and FARMER'S ADVOCATE were present at the above exhibition and agreed with the decision of the ladies, and their report will appear later on. We clean and boil a tub full of clothes in sixteen minutes. Send your orders to the above

STOCK GOSSIP.

AT In writing to advertisers please mention the Farmer's Advocate. John Jackson, Abingdon, reports that he has a Southdown lamb which weighed 115 pounds when 116 days old.

when 116 days old.

In a business letter from Mr. W. S. Hawkshaw, he informs us that his recent importation has completely recovered from their trip out, and are in the most thrifty condition possible. He adds that he has sold all his show sheep, but that the field sheep are fully equal to any of the previous importations; they are large in size and of the best quality, having been the pick of the best flocks of England.

Mr. Hoher Raylings, Payenswere

been the pick of the best flocks of England.

Mr. Heber Rawlings, Ravenswood, Ont., reports that two of his yearlings weighed respectively 176 and 197 pounds, and that one of his Cotswold lambs when eight weeks old weighed 54 pounds. He agrees with a former correspondent that it is a waste to feed half-threshed peas, for he does not thresh them at all—feeds them to the sheep just as they grow. The lambs referred to in former articles as Western and Texas were yearlings, and of a mixed breeding.

mixed breeding.

There promises to be a lively tussle for horses in the aged Clydesdale stallion class at the coming Industrial. Mr. W. Lee's recent purchase, Royal Salute (6246), imported by the well-known breeder and importer, T. W. Evans, of Yelverton, Ont., is going to give the best of them something to do. Royal Salute was got by the celebrated Darnley, out of a prize-winning mare by Lord Lyon—a combination that should make world-beaters. Although this horse has just finished a very successful season in Winnipeg, he is now in remarkably good form.

we learn from an English exchange that:
"Mr. Sanders Spencer, of Holywell Manor, near St. Ives, Hunts, has recently shipped pigs to several old customers in Austria, Sweden, and South Africa, a boar and two sows sailing for the last-named country a few days ago. Mr. Spencer has also received an order for a young boar and two yelts, which are to be exhibited at the Columbian Exhibition at Chicago with a number of other large white pigs bought at Holywell, or bred from pigs there purchased. A considerable exhibit of Holywell Manor Middle White pigs will also be made at Chicago. This will include Holywell, the brother of the first prize boar at the Royal Show at Doncaster, some sows also selected by the Hon. J. Burnett in February, 1891, and several of the produce of that and other shipments from Mr. Spencer's herd."
