The tractors on the Experimental Farms run by the Government in the various provinces, will be made over to the vocational training classes of the Military Hospitals Commission for overhauling during the winter months.

In the motor mechanics course, which is without a peer for popularity among the returned soldiers requiring industrial re-education, there is need of motors on which to work, and many of the men intending to run farm tractors when their course is finished are eager for a chance to work around a farm motor.

The Government has been spared the expense of buying motor cars for experimental work by the generosity of many firms and individuals who have given their decrepit motors for "vivisection." That the men have restored these relics to fitness and put them into service again speaks for the quality of the instruction and the ability of the men.

In the study of motor construction they have dismembered all species from the flyer to the twin-six. Tractors are not so easily obtainable and the action of the Government in turning the farm motors over to the classes for overhauling is a boon to men as well as a benefit to Experimental Farms.

Two motors from the Dominion Experimental Farm at Ottawa are to be sent to Mowat Sanatorium in Kingston to be put into condition by the soldiers for spring work.
