## FRANKILN'S AGENCIES, LTD.

199 WATER STREET.  
 aug 15, 11, s, t, f

## DAYTON Money Weight Scales!

After deciding to locate in Newfoundland, we wished to obtain agency for the best computing scale made. We visited all the leading cities of the United States and Canada as far west as Chicago. We visited three computing scale factories, all of which offered us their agency. We talked with hundreds of users of various types of computing scales. The result of our investigation showed us that the Dayton Money Weight Scale was absolutely the best computing scale made, and that it would outwear any two computing scales of the swinging pendulum type.

We therefore closed the contract for the sale of Dayton Scales and have sold a number of them in St. John's and the various outports. Every scale sold is giving perfect satisfaction.

We are also agents for the Dayton Silent Meat Slicer and Dayton Cheese Cutter.

If you are interested in the most perfect weighing machine ever devised, write or wire

## REID-NEWFOUNDLAND Company

Published by Authority

Under the provisions of the War Measures Act, 1914, and the Acts in amendment thereof, His Excellency the Governor in Council has been pleased to order that Regulation No. 3, regarding Lights, dated 16th July last, shall be cancelled, and the following substituted therefor, namely:

Headlights used on any motor cars or motor cycles in or near the City of St. John's, or in or near any settlement in the Districts of St. John's East or West, or on any road approaching St. John's or any of the said settlements upon which lights may be visible at sea, shall be obscured by having the whole of the lower half of the lens of each headlight covered by some substance or painted, in such a manner as to prevent any light showing through. Electric bulbs or other lights of more than fifteen candle power shall not be used in headlights of any such motor car or motor cycle.

## Electric Lighting For Outports!

For a number of years there has been a growing demand for a satisfactory electric lighting system for use in the outports. There are dozens of so-called "farm lighting systems" on the market. Almost without exception they are unable to produce a steady flickerless current, without first charging storage batteries and then taking the lighting current from the batteries. In using this system they are up against many difficulties—batteries of fair capacity are expensive; they require constant attention. When they are new, about 15 per cent. of the current is lost when passed through batteries; after one or two years this proportion rapidly increases; this means that a large proportion of the current is wasted; batteries that will produce 110 volt current are very expensive, therefore the manufacturers of most battery systems use what is known as low-voltage. A low-voltage current will only give a satisfactory light when used close to the battery. If the current is carried by wires to other buildings a short distance away, a great deal of energy is lost and it gives a poor light.

Low-voltage systems cannot use standard lighting equipment such as lamps, electric fans, electric irons, electric toasters, etc., but require special low-voltage apparatus from the factory.

After comparing the various lighting systems on the market, we found one that overcomes all these difficulties. It is known as the Unielectric Lighting Machine, which is the only machine of its kind made. It consists of an engine specially designed for electric lighting purposes, directly attached to a special dynamo and electric governor. This outfit will produce a steady flickerless 110 volt current without having to depend on batteries; it will use all standard equipment in common use. Wires can be run from the engine in any direction up to two thousand feet without change.

Three of these lighting machines have been in use in Newfoundland. Monsignor Reardon, Placentia, lights Church and foundland from one to two years and are giving perfect satisfaction; Rev. Father Maher, St. Lawrence, lights Church, Presbytery, Convent and School; G. C. Fearn & Son, Placentia, light their shop, office, fish stores, saw mill, blacksmith's shop and ship yard. We have also ordered for them an electric lighting machine to be run by current from Unielectric machine and to be used in shipbuilding.

We are now installing the Unielectric Lighting System for Mr. Fred Ayre in his country residence. The Unielectric Corporation of Detroit are doing their best to supply the demand for these machines, but do not expect to be able to furnish them at present prices except for a very short time. They have promised us three more machines at present prices if orders are sent in promptly.

Anyone interested in the best country lighting system ever made will receive one of our catalogues and full information by writing us.

The Unielectric Engine is built for continuous service. The engine is equipped with the sliding sleeve valve and is guaranteed for five years.

A small inexpensive battery can be attached to wires to allow the use of a few lights when machine is not in operation.
