## The German Fleet Revolt

A carefully recorded impression of the mutiny in the German High Sea Fleet on October 29 and 30, 1918, is published in the "Deutsche Wehr," a Berlin military review. The author of this is Lieutenant-Commander Fikentscher, of the battleship "Thuringen," who has related, with the minuteness of one accustomed to log-keeping, the events on board his ship. The article is summarized in the London Times.

He describes how, on the night of October 29th, the entire fleet lying in the Schilling Road received the order to prepare for sea. In accordance with the usual practice, a boat was called away to fetch the secret orders from the flagship. This envisaged night operations with light vessels against that part of the British fleet which was operating on the Belgian coast, but, of course, this was not then known to either officers or men in the "Thuringen."

The boat crew did not respond to the summons, and it was with difficulty that the boat was got away. Next morning's great part of the crew refused to jump out and remained in their hammocks. About 8 o'clock came the order to put to sea, but the crew refused to carry it out and shut themselves in the forward battery, where they began to sing. The commander then gave the order, "Muster by divisions," to be piped, even then the ship's company was only got to the deck by personal appeals and orders on the part of the officers.

In the circumstances the order to put to sea was postponed, which was their being given as the ostensible reason. The day's duty was got through in an atmosphere of suspense, and

when in the evening the order came to get ready for sea the mutiny broke out.

The officers waited impatiently to see what steps would be taken by the authorities. After the midday meal the signal was given from the flagship to be ready for sea at a certain time. The order had hardly reached the captain when the mutineers again gathered forward and barricaded themselves in the battery. All exits were then covered by the officers. At the same moment a steamer from Wilhelmshaven brought alongside a company of marines, old and tried men, and these men were at once posted about the ship. Then the captain, with some of the officers, threw open the doors leading to the fore battery and ordered the men to come up on deck.

His order was greeted with howls from the mutineers. Meanwhile two torpedo boats had come alongside and brought the squadron chief on board. A third torpedo boat lay cleared for action, with guns loaded and the gun crews standing by, two hundred yards away. A submarine also approached and prepared for action. Then on the battleship "Helgoland," five hundred yards from the "Thuringen," the crew swarmed on deck and turned the casement guns on the submarine.

Finally, the order came to unload, and the dangerous moment passed. In one respect it was only apparently dangerous, since the mutineers on the "Helgoland" had not a single shell. The "Thuringen's" mutineers next offered to negotiate with the captain, who demanded unconditional surrender. They refused, and the squadron commander issued the order, "Resistance will be broken by force." The other deck was cleared, and the torpedo boat received instructions where to put its shells into the ship.

At that moment a seaman who had remained loyal undertook to persuade the men to come on deck to save bloodshed, and the order was countermanded while he tried. Ultimately he succeeded.

The seeds of weeds could live deep in the ground, some interesting experiments have been carried out.

A field was chosen which had been under grass for thirty-two years—from 1878 to 1910. This field was so far from the nearest cultivated land that seeds could hardly have been carried there by wind.

A sampling-iron—a kind of huge cheese-scoop—was driven into the grass, and the soil beneath carefully removed to a depth of twelve inches. This soil—stiff clay—was taken away in paper bags, and placed in clean, sterilized pans under glass. It was kept moist, and left alone.

**Hidden in the Soil.**

Soon seedlings began to show, and each was allowed to grow until large enough to identify.

The result was startling. In this soil there appeared no fewer than 365 seedlings belonging to eight different varieties. Among these were the scarlet pimpernel, the common blue forget-me-not, poppy, speedwell, bindweed, and, particularly, that foe of the farmer, the detestable knot-grass.

None of these plants, except the forget-me-not, are to be seen growing on the surface in this particular field.

We therefore have proof positive that these particular weeds can exist and maintain their germinating powers intact for at least thirty-two years.

These experiments have since been carried further, and we can now add a number of other plants to the list, such as charlock, shepherd's purse, sandwort, etc.

But enough has been said to prove that the farmer who is ploughing up old pasture need not be surprised if, mixed with his new crops, he discovers all sorts of new weeds.

## Moderates to Hold Another Meeting.

We understand that arrangements are being made by the Moderate Prohibition Committee to hold another public meeting this week to protest against the manner in which a political football is being made of the Moderate Prohibition Bill. It is probable that those who have conducted the negotiations will report the result of their efforts, and that their resignations will be tendered if no further progress is made.

**SABLE IN PORT.**—S.S. Sable I. arrived in port at 3.30 this morning bringing the following passengers:—Messrs. Chas. Fox, W. H. Greenway, W. R. Gooble, W. A. Ellis, J. L. Holden, M. Malone, P. R. O'Reilly, Mrs. W. R. Crobble, Miss Jean Crobble, Mrs. Mary Holden, Mrs. M. Malone.

**MARSH'S Lintment For Gout in Cows**

## Official Visits.

His Excellency the Governor, accompanied by his Private Secretary, paid an official visit to the French Patrol ship Ville d'Ys, and was accorded the customary salute of 17 guns. The Prime Minister also made an official visit at noon to-day and received a salute of 11 guns when returning.

## Police Court.

A number of minor cases were dealt with by Judge Morris in the Magistrate's Court this morning.

A man charged with being drunk and disorderly in the European Cafe and doing damage to the place, to the extent of \$5.00, was discharged as the restaurant proprietor did not press the charge.

A drunk who is an habitual visitor at the police court, was fined \$2.00.

A man charged with being drunk and disorderly, was fined \$5.00.

A man charged with loose and disorderly conduct on the public streets, was fined \$5 or 10 days.

Two assault cases were postponed.

A labourer of Bell Island, who deserted his children, was ordered to pay \$100 a week until he finds work.

A youth and a girl were charged with loose and disorderly conduct. The man was fined \$1.00 and the girl was discharged.

## Coastal Boats.

**CROSBIE'S.**  
S.S. Susu leaves at 9 a.m. to-morrow morning for points as far North as Change Islands.

**GOVERNMENT.**  
S.S. Prospero in port. Leaving Wednesday.  
S.S. Fortis—No report since leaving Grand Bank Saturday.

**GOVT. RAILWAY COMMISSION.**  
Argyle left Burin early yesterday morning, coming to Placentia, Clyde leaving Lewisporte to-day on Green Bay route.  
Glencoe left Humbermouth at 3 p.m. Saturday for North.  
Kyle at Port aux Basques.  
Melgic arrived at Placentia at 5 a. m. Leaving after arrival to-day's train for South West Coast.  
Mainkoff leaving Port Union to-day for Trinity Bay.

## Cadets vs. C. E. I.

The football game to-night between the Cadets and the C.E.I. should prove a keenly contested one, as both sides seem quite evenly matched. Both teams have won their first games, as far as can be ascertained, there is no change in the Cadets' line-up, but the C.E.I. replacing Lieutenant in the forward line by Bartlett.

The line-up is:—

C. E. I.	goal	CADETS.
H. Smith	.....	W. Clare
Rob Stick	.....	back
M. Churchill	.....	R. Kavanagh
.....	.....	T. Christopher
.....	.....	half
Hammond	.....	Maddigan
Drover	.....	Galgay
Erans	.....	Spratt
.....	.....	forwards
Ralph Stick	.....	W. Callahan
Adams	.....	Meaney
Hunt	.....	O'Neill
Winsor	.....	Flynn
Bartlett	.....	Caull

## Queer Cures.

What would you do if you caught malaria far away from civilization? Probably, if you hadn't any knowledge of the very wonderful native remedies that exist, you'd give it up as a bad job, and that would be the end of your story.

A woman traveller, back from the wilds of the Bush, tells of malaria being cured by lemon-juice. The patient, who had been given up as hopeless, was treated to a number of compresses made from lemons, which covered him from head to foot, and he speedily recovered from the fever.

In warmer climates, where a certain virulent and dangerous miasma from a fly, an old native woman brought the inflammation down rapidly by the following process. Spreading cotton-wool lightly over the portion affected, she deliberately set fire to the wool, and, blowing the ash away gently, smeared butter over the wound. It immediately healed.

For wounds of all kinds, natives pin their faith on castor-oil and honey. Many a bad hurt, which might otherwise have cost the sufferer his life, or at least a limb, has been healed in this fashion. Of course, in the Bush castor-oil trees flourish, and there is always an abundance of wild-honey to be found.

## Here and There.

**FOR SALE.**  
Topsall Hill

**League Football, St. George's Field, this evening, at 7.30 o'clock: C.E.I. vs. Cadets. Admission 10c. Ladies free. Grand Stand 10c. extra.—June 12**

A heavy black-and-white tassel hangs from the collar at the back or a long loose coat. A large black lace hat is worn with it.  
Lucile shows an original model with a skirt draped with a loose-panel effect at the hem.  
Poplin is used much in the Paris models. It rivals taffeta, which is used for the simpler dresses.

# Willard of Canada

STORAGE BATTERY COMPANY

LIMITED

The WILLARD Threaded Rubber Battery is manufactured in Toronto by the Willard Storage Battery Company of Canada, Limited. It is the battery that should be bought and insisted upon, because it answers better than any other the severe driving conditions in Canada!

It is the only battery in which the plates are protected by rubber insulation, made truly porous by threads or "wicks" vulcanized into the rubber. Threaded rubber resists the destructive effect of extreme temperatures, long idleness, insufficient charging and other ruinous conditions. To secure durability and low cost per mile, buy the Willard THREADED RUBBER Battery by its full name at any Willard Service Station.

The Willard Storage Battery  
Co. of Canada, Limited  
Factory and Office: 100 Sterling Road  
Toronto

## Rigging, Turnbuckles, etc.
