### TO GET TRADE IN EXPORT BACON

F. W. Hodson Writes of Pork-Packing Houses.

Advises Trial of Co-operative Plan as It Is Followed in Denmark-Advice Regarding It.

Mr. F. W. Hodson, live stock com- been brought. missioner, writes as follows: Everyone is familiar with the history There are several points, however, of the wonderful development of the that should always be observed, in export bacon trade in Canada during the past ten or twelve years. In 1890 our export of bacon, lard, hams, pork, etc., amounted to less than 8,000,000 pounds. In 1900 it had risen to about 136,000,000 pounds. The Province of Ontario has been the chief exporter, one allowed to hold only a limited but the time has come when we may amount of stock. No speculators but the time has come when we may expect to see a change in this respect. Much of Quebec, New Brunswick,
Nova Scotia, and Prince Edward
Island is admirably adapted to dairying, a branch of farming which is
rapidly extending from Montreal
eastward, as well as in Ontario. The dairy diricts produce the class of hog from which the finest Wiltshire bacon is made, and in these districts hogs are put on the market at as low a cost per pound as in any section in Canada. General dairying and hog growing should go together, as neither its highest paying condition without the other. The eastern and northern sections of Ontario produce better class of hog than the corn Western Ontario; or in other words, the section of Ontario which more nearly resembles Quebec and the Maritime Provinces in climate and grain products produces the best class of bacon. In some respects these provinces are better suited than Cntario for the development of this industry. Land is generally cheaper, pasturage surer, and roots and other crops easily raised. Two conditions are necessary in order to develop this industry in Quebec and the Eastern Provinces, especially the latter—an abundance of coarse grains which by attention to agriculture can be profitof packing companies (or the extension those already established) which will fully meet the requirements of the best markets both at home and abroad. CO-OPERATIVE FACTORIES.

PICTON ENGINEER'S

had frequent requests from other pro-vinces for information regarding the CO-OPERATIVE PACKING FAC-

TORIES, such as have recently been put up at several points in Ontario. The practhe Danish farmers, who are becoming more and more interested in improving the quality and shape of the pig, as through this medium alone they have succeeded in placing their bacon and pork in a foremost position, both for quality and shapeliness of sides, on the London market, while the fact of these co-operative factories being established all over Denmark, shows to what a success they have

DANISH PLAN. connection with the establishment of these pork-packing industries on the co-operative plan. In the first place, they should be installed as nearly as possible along the Danish lines, with only farmers as stockholders, and each should be allowed to invest in the company. In the next place, it is absolutely necessary that the individual subscriber shall have faith in his own company. The practice of farmers subscribing stock in these movements and then selling their hoss to the highest bidder, often to firms competwrong, and entirely different from the "modus operandi" in Denmark. The success of Canadian co-operative factories is absolutely regulated and controlled by the loyalty of the farmer, who has, as yet, scarcely realized the importance of operating along truly co-operative lines. Still another necessary feature is that all proxies should be concentrated in the hands of a council of not more than seven, preferably five of the very best men among them, brainy, practical business men, who are not likely to be led away by fads, or driven from wise business principles by factious opposition. AN EXPERIENCED CURER.

hind the business management of the concern there shall be a thoroughly practical and experienced curer, who will send forward only uniform goods of the highest quality, that will when ably produced, and the establishment | tested on the British market, grade with the best Irish and Danish bacon. To turn out this class of goods particular attention must be given to the sort of pig grown, and the method of feeding the same. To produce the highest grade of Wiltshire sides, the During the past year or two I have packers require a long, deep, smooth

TERRIBLE KIDNEY PAIN.

It is of the first importance that be-

well covered with firm flesh, not fat; at the same time he must not be a razor the underline straight and free from flabbiness; the ham smooth and tapertical results of these co-operative ing, with the greatest amount of flesh movements have been demonstrated by on the outside. The pig should be on the outside. The pig should be healthy, vigorous and a good feeder, weighing, when ready for market, from 175 to 200 pounds. It is generally conceded that Yorkshires produce the greatest proportion of pigs of this type, with the Tamworths next. The thick, fat, American or lard breeds are not wanted by packers.

CLASS OF FOOD. Pigs should be fed good, wholesome and carefully selected food-skimmed milk, potatoes, roots, green food, barley, peas, etc., in a properly balanced ration without any undue stuffing.
If the farmers do not intend to observe

the farmers do not intend observe these conditions they had better leave the business entirely alone, as otherwise they are only retarding the efforts of other Canadians who are striving to place our bacon on the market in the highest possible condition in competition with deal of money has been lost during the past year on hogs, the English market not justifying prices paid in Canfor a whole year ranging in price from \$6 50 to \$7 50. Such a condition of affairs was never before known in ing against their own company, is all the trade. The farmers have, however, received the benefit, and the packing companies have suffered, largely because they have been climbing over one another to get pigs irrespective of cost, doing no culling and taking undesirable breeds, just as quickly as they would the best. This sort of thing will right itself in course of time, but not before the packing houses lose a lot of money.

CAPITAL REQUIRED.

A co-operative packing factory should not be started until a capital of at least \$250,000 had been subscribed, which will be sufficient to inthousand per week. Small plants are a few flowers upon it. objectionable because the refrigerating system costs very little less, and the management and expenses are the same, minimum production always being the most expensive. Such a factory cannot be put up for less than \$100,000 to \$125,000. Farmers holding stock in such a company should deliver their hogs at the factory, take an advance of 60 to 80 per cent, have them slaughtered, cured, branded with the name of the factory, sent forward and realized on through the medium of a first-class English agency.

Eastern Canada has for some time shown a good deal of interest in the of co-operative packingsubject houses, but so far as I am aware, Manitoba, the Northwest Territories and British Columbia have not given it much consideration. Possibly the information above given may prove of value to the people of the west as well as the east. Any community interest-Mr. Chas. Welsh, Engineer On the Steamer "Ella ed in the co-operative system outlined committee to visit and carefully inspect the operations of a working factory, such as the Farmers' Co-Operative Packing Company, Limited, of Brantford, Ont. They will find Mr. Joseph Statford both able and willing to give the fullest information in regard to the co-operative movement in all its phases

## THE PASSING OF A GOOD SOLDIER

A Little Tragedy of Grim War in the Philippines.

Just Another Brave Young Life Gone Out to Satisfy a Nation's Lust for Empire.

His chum walked into the barrack hope be centered in Paine's Celery ing down off the northern half of the room with a white face and very red eyes. Most of the men knew instinctively what had happened, writes W. Read Mrs. Hopper's wonderful and O. McGlashen from the Philippines to striking testimony: the San Francisco News-Letter. "Dead?" some one asked.

His chum nodded, for he could not yet trust his voice. The news passed in subdued tones to the further end of the room to a group of inveterate gamblers, who immediately gathered up their cards and money.

"He was a damned good boy," ex-claimed a tall, bearded private. "Who'd have thought poor little Hopkins would have gone out?' There was a chorus of murmurs to

the same effect, profane, but sincere. and announced the death officially. He proceeded to the dead boy's bunk, accompanied by the quartermaster, to pound to my friends. make an inventory of the effects. They took his gun and belt from the rack above the cot, the gun carefully oiled and the brass work on the belt scrupulously clean. "Even when he was sick he didn't neglect his accoutrements," said the captain sorrowfully. "Who would believe that the gun had ever been in the trenches? He was a good

Which was true. Many a night that gun had been tenderly wrapped in a blanket and poncho while its owner slept on the damp grass, exposed to the heavy dew or heavier rain of the tropics. The preservation of that \$10 Springfield rifle had been largely instrumental in causing the boy's death. The captain opened the lid of the regulation trunk, and found himself confronted by a cabinet photo of a smiling girl with curly hair. On the ower edge was written "With love, Ethel." A bundle of letters addressed by the same hand lay in one corner. nation, "Remember the Maine!" There was also a bundle of letters from his mother, a book or two, some army clothing, and some little souvenirs, a pair of Filipino boles, a few bolts of pina cloth (intended, no doubt, for the girl), some empty shells, relics of a bygone battle—and other things, such as are now treasured by the relatives of veterans of '98. The captain checked each item a sthe sergeant drew it out. Finally they locked the chest.

An old corporal who had served in the regular army was already engaged in drawing the bullets from some carridges. The boy's chum sat on a bunk near him arranging lists for the death watch, firing squad and pall bearers. A tall, sallow private approached them. 'Tajada's wife says we can have every flower in her garden," he said, "and the president's wife says the same. The who lives by the sweat of the brow."

pig, possessing a light head and shoul- an adjoining room some one was prac-der, and even back, not too broad, but ticing a funeral march on a fife. Next morning they bore the flag-

draped coffin through the streets of the back. The sides from ham to back Filipino town. Through the screets of the of shoulder must be long and deep, some Mestiza and Spanish ladies it some Mestiza and Spanish ladies it was covered with tropical flowers, and each member of the company carried some floral token. The population for miles around attended in order to observe what mysterious rites the strange Americans performed over their dead. The procession marched slowly to the music of a wailing fife and a droning, muffled drum.

In a quiet corner of the Filipino cemetery four mud-begrimed privates waited, leaning on their spades. In military traditions it is held a labor of love and an honor to dig a comrade's grave.

The regimental chaplain was at the other end of the island, consequently it developed upon the captain, who had never before betrayed any knowledge of matters pertaining to religion, to read the regulation burial service. am the resurrection and the life," he began in a strained, unnatural voice, and concluded with a simple eulogy such as would have been pronounced the Irish and Danish products. A good over any of the men and sworn to whether he deserved it or not. In this instance it was entirely true. The men stood with bared heads trying to shield ada. For instance, we have had pigs their heads from the broiling sun with their hats, and there were tears in the eyes of several.

The grave was closed and the captain stepped back. "Squad, attention! With blank cartranks of the curious natives. The company bugler approached the grave and and raised the trumpet to his lips. Sud-

"I can't do it." And this man had been wont to shout

hands and sounded taps. The company sure a killing capacity of two or three filed past the grave, each man dropping Then they marched back to the barracks, the fife squeaking a quickstep, which is prescribed by regulations. And the next list of casulties bore the

### After Long Years of Mental and Physical Sufferings and Failures With Common Medicines. Paine's Celery Compound Cures an Ontario Lady.

The Great Remedy Is Heartily Indorsed by the Ablest Physicians Who Daily Recommend Its Use.

and women knew just what Paine's Celery Compound is able to do. The work that cannot be done for the

sick and suffering by months of excines of the day, is successfully carried in a few short weeks.

The sure of Mrs. Hopper, of Thorn-

hill, Ont., proves fully the assertion this is spread around on the valley bemisery, agony and despondency, Paine's Celery Compound made a "new wo- build up more continent. man" of one who had become a mere wreck-one who was fast nearing the grave.

cure. It has never disappointed any sufferer; it will not fail in your case.

"With great pleasure and satisfaction I wish to add my testimony to what has already been said in favor of Paine's Celery Compound. For a sults; but after using Paine's Celery Compound I am perfectly restored to health, can eat well, digestion is good, In a few minutes the captain entered and my sleep is sweet and sound. Altogether I am a new woman. I always recommend Paine's Celery Com-

### Pain in the Back

makes life miserable. Can it be cured? Yes, in one night. Polson's Nerviline gives a complete knockout to pain in the back, for it penetrates through the tissues, takes out the soreness and pain, invigorates tired muscles, and makes you feel like a new man. Nerviline cures quickly because it is stronger, more pentrating, more highly pain-subduing than any other remedy. Don't suffer another minute; get Nerviline quick, and rub it in. for sure as you are born it rub it in, for sure as you are born it will cure you. 25c.

### An Obliging Caller.

[Youth's Companion.]

When Monsieur Clemenceau was in the French Chamber of Deputies he became, for some reason, the idol of the workingman; but his popularity, according to the course of nature, The topmost envelop was decorated brought its penalties. He was besieg-with crossed flags, underneath which ed by all sorts of people, who came with crossed flags, underneath which ed by all sorts of people, who came was inscribed that hysterical cry of the merely to ask questions, and sometimes they were questions of the most trivial sort.

He was originally a doctor, and used to give advice for nothing at certain hours of the day. One morning a workingman entered his room, and Clemenceau said, without looking up from his writing:

"Take off your coat and shirt, I'll attend to you directly."

Three minutes later he found the man had stripped to the waist.
"There is nothing the matter with you," said the doctor, when he had

made an examination.
"I know there isn't," returned the "Then what did you come for?" "To consult you on a political ques-

"But what did you strip for?" "I thought you wanted an illustra-tion of the emaciated body of the man Perez girls are making wreaths. Say, The political question remained un-you'd better go to bed. You can't do answered. Monsieur Clemenceau was mything more."

The boy's chum sodded wearily. In tell the man to dress and go home.

### VAGARIES OF A MIGHTY STREAM

How the Mississippi River's Inroads Are Resisted.

A Few Slender Piles of Wood Accomplish What Massive Stone Walls Fail to Do.

In this region (Illinois and Iowa) the river is bordered with busy cities-Dubuque, Keokuk, Quincy, Davenport, Rock Island, Moline-thriving railway towns, full of factories, colleges, fine residences, and all on high ground. Seen from the river they present the finest views of themselves, something the cities of the flat country farther down never do, says John Swain, writing in Ainslie's Magazine about the Mississippi River.

It is a swift river that rushes past these cities. At low water, which is usually in summer and fall, the current drops to three miles an hour or less. But at high water, when it stands 30 or 40 feet higher on its banks, it sweeps along at nine miles an hour with irresistible impetus.

Imagine what that means in a big river-nine miles an hour. We are so used to railway trains that run 60 or ridge, load!" ordered the corporal. Three | 70 miles an hour that it does not seem volleys crashed, causing a flutter in the an overwhelming speed. But consider that when a railway train is once checked its power is gone. Interfere with the progress of the Mississippi denly he burst into tears and wailed, and the river piles up against the obstruction, sweeps around it, over it, stronger about it. The power waxes picturesque and profane witticisms until it sweeps away the fret. Imagine when the bullets sang like angry hor- the force with which drifting logs and nets. A bugler from another company rafts are swept against bridge piers. took the trumpet from his trembling Think of the solidity needed in the foundations to stand against years of such shocks. Think of the pits dug in banks against which that current impinges, and the helplessness of a disabled steamer caught in a snaggy bend in such a flood.

Yet such is the contrariety of this mighty stream that while it will overthrow the strongest obstacle to course that can be built, it will yield to the slightest. One could hardly find a more striking illustration of the power of slight things than the sharp contrast between the behavior of the river against a powerful check and against a slight one. For years government en-gineers struggled to direct the river with massive stone dikes. When the river could not overthrow one of these it dug under it, and so wrecked it. Money without end was spent on dikes. There was a mighty one below Gold Dust landing in Tennessee. It stood longer than most of them; but in a flood the river at last conquered and swept it away.

How, then, can the river be directed? Simply by a few sticks, set in the sand. A row of piling, sometimes with a few brush hurdles, accomplishes it. The river sweeps through, eddies behind it, dropping sand and building up a bar. Nowadays traveling down the river through stretches that once were broad and shallow one finds them narrow and starchy ingredients, requires no digeschange.

That capacity of the Mississippi for filling up canals and old channels is fast Food is recommended by physisomething awful. Government engin- cians everywhere. Sold by all grocers. perimenting with the common medi- eers have found that the amount of solid matter annually carried past to victory by Paine's Celery Compound Vicksburg in suspension is enough to make a block of earth 300 feet high and a mile square. Fifty feet off the top of made above. After years of failures, tween here and the sea, and the rest goes out into the Gulf of Mexico, to

Think what that means. Instead of a river of water, this is a river of land. It would make a solid stream of earth Have faith sufferer! You have a five feet deep, and nine feet wide, flow-strong deliverer at hand able to rescue ing night, and day as fast as a man and save you. From today, let your can walk-four miles an hour-all slid-Compound and its mighty power to country toward the sea. Year in, year out, that endless line of earth goes on. It would take a force of more than 50,-000 men, working in eight-hour shifts, to throw the dirt into the stream, supposing the river bed were rigid and an inexhaustible supply of dirt on the bank. It would make 25,000,000 wagon loads every year. But here-what are very long time suffered from general the use of such figures? Below Vicksdebility and rundown system. Having burg—and above it, too, to an extent—heard of Paine's Celery Compound, I we have the earth itself to speak for determined to give it a trial, and I am it. Except for the occasional fraghappy to say it has done for me more ments of the line of bluffs along the good than I can express. For ten esstern edge below here-which bob up years I doctored without any good re- at Fort Adams, at Natchez, at Grand Gulf, at Baton Rouge, at Port Hudson—there is nothing about the level of the high-water river except the artificial great earthern banks sometimes 30 feet

levees. These are in places miles back high or more, sodded and free from trees, which protect the wonderfully fertile region behind them. And all this level country which the river overflows and fertilizes is constantly increased by this river of dirt which the Mississippi brings down from the inner region, gathered all the way from the Rockies to the Alleghenies. Sometimes the river starts to eat away this land that it has made. In a single summer, if it will, it eats away half a mile of it out of some bend. It cuts it out sometimes an acre at a bite, and takes with it forests, houses, levees and all else. The river is not a uniformity moving stream. One side or the middle moves swiftly, the other parts are still or sluggish. Sometimes even these run up stream. The swift part is the channel current and runs in the deepest sec-It makes crossings whenever driven off shore by a promontory. These crossing are dumping places for the surplus earth the river has picked up in the bend it is eating.

### The Baby Sick?

Then probably it's a cold. Babies catch cold so easily and recover so slowly. Not slowly, however, when you use Vapo-Cresolene. Then a single night is all that is necessary for a cure. You just put some Cresolene in the vaporizer, light the lamp beneath, and place near the crib. While baby sleeps he breathesin the healing vapor. Cold loosens,

trouble ceases. It's a perfect specific for whooping-cough and croup. 8 Vapo-Cresolene is sold by druggists everywhere.
A Vapo-Cresolene outfit, including the Vaporizer and
Lamp, which should last a life-time, and a bottle of
Cresolene, complete, \$1.50; extra supplies of Cresolene 25 cents and 50 cents. Illustrated booklet containing physicians' testimonials free upon request. VaroCresolents Co., 150 Fulton St., New York, U.S.

inflamed membranes heal, and all

Cheerfulness depends upon illusions, upon not too rigorously determining to see all truth in life. Even superstition feeds cheerfulness, and should not be shunned like fanaticism, which kills it. Cheerfulness depends upon having beliefs, belief in friendship, be-lief in all that helps to make living beautiful, and the saddest experience in life is to be deceived and thereby lose a belief or an illusion.

Children are happy and cheerful because, as long as they are full of illusions, of beliefs and of confidence. There ought to be a society for the prevention of deceiving and disillusioning children.

When we are told in the Gospel of St. Matthew, that "except we become as little children we shall not enter into the kingdom of heaven," I am disposed to thus interpret the verse-"Except as we become as little children, confident, believing, and un-conscious of malice, easily amused and full of illusions, we shall not be happy in this world."

The world is getting too learned, but what do men learn? Practically nothing but what leads them to be well equipped and trained for the race after money. There is no item in the curriculum of studies at schools and colleges to teach them how to be happy No doubt money may help to mak people happy. It would be a means to an end, but not an end, Make money that you may possess it; but never aim at making too much, for fear it should possess you. Money cannot buy everything. cannot buy health, life or love.

you were a hundred times richer than you are you could not multiply your wants and pleasures by one hundred. You could not drink or eat a hundred times more than you do now. truth and philosophy there is in the remark of the English drunkard staggering in the gutter-"If I was the bloomin' Dook of Westminster I could not be more drunk than I am." Dont take life too seriously. Never resist impulses of generosity they will make you cheerful and healthy. They will give color to your cheeks and pre-vent your flesh in old age from turning into yellow, dried-up parchment. Come home with your pockets full of presents for the children. Let them put their hands to the bottom of those pockets. You will be repaid, amply repaid, by their holding out their little round faces to thank you in anticipa-tion of what they know you have got

Life is not worth living unless you can, when the winter of life approaches, still thoroughly enjoy a game of marbles with little boys, and telling London to Los Angeles, long fairy stories to little girls.

# Ross," Was a Sufferer From Intense Pain In His Back and Kidneys. . He Tried Plasters, Pills and Liniments, But They Failed to Help Him. Dr. Pitcher's Backache Kidney Tablets Rapidly Relieved and Completely Cured Him.

MR. CHAS. WELSH.

About a year ago he was laid up with a severe attack of backache and

Mr. Chas. Welsh, of Picton, Ont., is well known in that town and He is Engineer on the Ella Ross, a steamboat plying between Picton and

kidney trouble, so bad that he could not get around.

After trying everything he could think of, without obtaining relief, Dr.

Pitcher's Eackache Kidney Tablets, the new, scientific remedy for kidney troubles, was suggested to him.

He decided to try them, and with what results we will allow him to relate in his own words: "I was ailing with a terrible pain across my back and kidneys. It commenced gradually getting worse, so that I was obliged to stop work. I tried plasters, pills and linaments, until I was almost ashamed to enter a

drug store, and they all failed. I came across a man who had been using Dr. Pitcher's Backache Kidney Tablets and he advised me to try them, and while I used them and ever since I have never known what it was to have a pain or ache in my back or kidneys. Therefore I would advise any person who is troubled with kidney or backache trouble to use Dr. Pitcher's Packache Vidney Tableta kidney or backache trouble to use Dr. Pitcher's

Son who is troubled with kidney or backache trouble to use Dr. Pitcher's Backache Kidney Tablets by all means, for I can highly recommend them ahead of anything else I know of, for they have made a sound man of me when I could hardly walk up the street before I took them.

"(Signed) CHARLES WELSH."

Dr. Pitcher's Backache Kidney Tablets are the formula of Dr. Zina Pitcher, formerly Professor of Materia Medica and Genito-Urinary Diseases. Michigan College of Medicine, Detroit, Mich., which he used with wonderful success for many years in the treatment of kidney, bladder and urinary troubles. They are a rapid-acting and positive cure for backache, lame or weak

back, pain in the back or between the shoulders, swelling of the feet and legs, bloating, puffiness under the eyes, puffy and pasty appearance of the face, dropsy, Bright's disease, and diabetes (except in the last stages), gravel, stone in the bladder, brick dust deposits in the urine, scalding or irritation of the urine, frequent calls during the day or night, inflammation of the bladder or cystitis, catarrah of the bladder, milky color of the urine, high-colored or foul smalling urine, sudden stronger of the four of the urine, high-colored or foul-smelling urine, sudden stoppage of the flow of the urine, scanty flow of urine, dribbling, rheumatism, neuralgia, pains in the joints or hips, uric acid in the blood, heavy feeling or pain in the head, drowsiness, rapid loss of flesh, great thirst, excessive quantity of urine, specks floating before the eyes, bad taste in the mouth (especially in the mornings), constipation, torpid liver, dragging pain in the loins, sense of weight or pressure in the region of the bladder, kidney troubles of old people, bed-wetting of children, kidney troubles of women, and all symptomatic indications of kidney troubles of women, and all symptomatic indications of kidney troubles.

ney derangement. Price 50 cents a bottle or three bottles for \$1.25, at all druggists or sent by mail. The Dr. Zina Pitcher Company, Toronto, Ont
