lish from the Caribuo Sentinel that thunder fulminated in the capital, a few months ago, and which was to have rolled up through the canons of the mighty Fraser with terrific roar, has been re-echoed back, but very faintly, from the foot-hills of the Rocky Mountains. This is not the first political agitation of which British Columbia has been the theatre; but it is questionable whither weaker men ever took to the 'stump' with weaker cause, and, as was predicted. it fell still-born on the intelligent and matter-of fact people of the Mainland. Of the four newspapers published in the United Colony, three have ridicaled the miserable attempt of a small knot of fatulent political demagogues to agitate and mislead the public mind upon a false and unimportant issue at a period in the history of the country when it appeared to be of special importance that the public mind should be calm'y and rationally engaged with more useful matters. The fourth one-the Communist organ in this city-as was to have been expected, adopted a different course; but we may be permitted to point out the glaring inconsistency by which that course has been characterised. On the 11th March, it pointed out in a leading article the duty of the Government to enact a civil list. On the 14th of the same month the present. Clivil, List Bill was sent down to the House. On the 15th there appeared in the aforesaid organ a denunciatory article. in which the Bill was represented as atterly infamous and an attempt to faston a whole regiment of officials upon the Colony for life. On the following day it contained another article devoted to the same subject, an article which might be persumed to be the result of calm reflection and second thought. In this second article the following passage occurred :- Granting that may be the case, still the bill, enacted into law, will only be an act ; and the power that enacts may repeal, and alter Confederation what is now brought forward as a secu rity to those in office will be just as subject to chauge as it is now. In fact. if such were not the case one of the functions of the Legislature would be destroyed. That, however, cannot be the the case, even after Confederation, for under 'the British North American Act, 1867' one of the exclusive powers of Provincial Legislatures and which we, as a colony, will hold and, we hope, exeroise is, ' The Establishment and Ienure of Provincial offices and the appoint ment and payment of officers.' Aug one may readily perceive that all the legislation that may be attempted at present will be bound to give way before the deliberate voice of the Representa.
