THE PRENTISS GRAPE.

Through the politeness of Mr. T. S. Hubbard, of Fredonia, N. Y., we are enabled to present to our readers a colored plate of this new white grape, a copy of which he has generously donated in this way to each of the members of our Association, and by which this number of the Canadian Horticulturist is so handsomely embellished.

The history of this grape is simply this: Mr. J. W. Prentiss, of Pultney, Steuben County, N. Y., sowed a quantity of seed of the Isabella grape something over fifteen years ago, from which there sprang a large number of seedlings, of which this white grape was one. It would seem that either the results did not prove to be very satisfactory to Mr. Prentiss, or that in the multiplicity of matters requiring his attention he lost sight of his seedling grape vines and left them to shift for themselves, for we are informed that when he first noticed the fruit of this vine it was growing in the grass in a neglected condition. At length he was induced to take it up and plant it where he could give it better cultivation. Under improved treatment the vine improved, and manifested such good qualities, that, pleased with its fruitfulness and the flavor of the grape, he increased the number of the vines and planted them out for fruiting until he had some two hundred of them in bearing. About this time Mr. Hubbard, who is always on the lookout for new grapes of good quality, became aware of its existence, and pleased with what he heard and saw, made an arrangement with Mr. Prentiss to propagate and disseminate this grape, to which he gave, in honor of the raiser, the name of PRENTISS. Having grown a sufficient number of the vines, ne now offers them to the public, and adopts this very generous method of calling the attention of the members of the Fruit Growers' Association of Ontario to his favorite.

We first saw this grape at the meeting of the American Pomological Society, held at Rochester, September, 1879, where Mr. Hubbard
