Dear Sirs,—

"It is with great pleasure that I bear testimony to the efficacy of your Acetocura. Owing to a chill I was suffering great pain from a severe attack of toothache, and my gums were also very painful and much inflamed. Knowing from previous experience the effects produced from Acetocura, I was assured that the nerves, causing the trouble, could be relieved and soothed. The acid was first applied, as directed in your pamphlet, at the back of the head, until a smarting flush was produced, and then over the temporal muscle immediately behind the ear, with the Acid diluted. After the application there was little pain, and this mainly owing to the gums being in such an inflamed condition. I then fell into a refreshing sleep which lasted until morning and awoke to find the pain gone and the inflammation in the gums much reduced.

"My wife, who suffers from severe headaches, has also derived much benefit by applying the Acid to the top and back of the head, and using the spray producer, which has a refreshing effect on the forehead."

Yours truly, ALEX. COWAN.
