At a social held at Hemmingsford manse, Mr. Charles W. Scriber, organist, was presented with a purse of money and an address.

THE entertainment and bazaar given in the Y.M.C.A. Hall, Port Hope, by the young ladies of First church Mission Band, was very successful.

LAST Sunday week, while services were being held in the Presbyterian church, Picton, the roof of the shed in the rear fell in, demolishing several sleighs and injuring several horses.

REV. D. J. MACDONNELL, pastor of St. Andrew's, city, left for British Columbia on Wednesday night. He is to open a new church there, of which Rev. P. McF. McLeod is to be pastor. Rev. J. A. Macdonnell left the Knox College Monthly, and became the pulpit of St. Andrew's church during the pastor's absence.

At the communion services, Bradford, eight names were added to the roll. The "Witness" says: "Something must shortly be done to meet the wants of the growing congregation. For some time past the managers have been unable to supply with seats those who have applied for them, and it is evident that a new church must be erected for the present one enlarged."

THE Sacrament of the Lord's Supper was dispensed last Sabbath in the Melbourne congregation. The pastoral services were conducted by Rev. R. McIntyre, who preached an appropriate discourse from a Cor. vi. 2. Rev. Mr. Simpson, pastor of the church, delivered an excellent address to the young people coming to the table for the first time, six in all. On the following Sabbath the pastor preached a sermon appropriate to the occasion.

A CORRESPONDENT writes to "THE REVIEW": "The Presbyterian church at Chater was opened on Sabbath, Dec. 8th. Dr. King, Principal of Manitoba College, preached excellent Gospel sermons morning and evening to appreciative audiences. Owing to the inclemency of the weather, the number from the other stations was not as large as would otherwise have been. On Monday evening, the congregation held an opening entertainment. The church was well filled. After refreshments were served, the pastor, Rev. A. P. Wood, called the attention of the congregation to the programme of the evening, which was appreciated by all. The speakers were the Rev. Messrs. H. Hedges of Oak Lake, A. Wood of Brandon, G. Bremner of St. James. The music by the choir and other friends was well rendered."

FOR INFORMATION. The above is a sketch of one of the oldest, and for its extensive use the most simple compound yet invented. It is hundreds of years old, and only recently brought out, and by an artist, and now the question is often asked, 'What does an artist know about science? Why should it appear strange or out of place, or out of the sphere of an artist, to invent and improve, or move the most difficult problem? There is no more critical or more anxious mind for improvement and harmony in all things than the true artist, and so has he said and what say the poet: "Consistency and harmony, thou art Jewels." It was while visiting a friend and while walking with him where he was ploughing, that I discovered a lack of harmony and pleasure in the working of the plough, and immediately invented one of the most simple and effective remedies, which is now the most satisfactory and at the same time the most economical. I would ask any ploughman if it is necessary that there should be a space between the point and coulter of the plough—if so has it ever been provided for and at the proper level? I never saw, the space above mentioned is most important and as is shown in the above sketch of an old style of plough, better it pointing to where the point of friction comes on the coulter, wearing it into a notch. There must be a space or outlet and at this depth from the surface. The principal cause of this defect is the growth of grass roots. Examine from the present comes in Canada and the United States and elsewhere, readily that my invention is the only one that has been provided for and at the proper level. It is a simple and effective remedy for this defect, and it is not necessary to alter the coulter or coulter share are proven to be satisfactory in the most difficult soil.
