

MUNICIPAL ENGINEERS, CONTRACTORS, AND MATERIALS.

to the demand for architectural purposes. No charge is made for it at present, and the farmers simply have to pay the cost of taking it away by water or rail. It is believed that ultimately a revenue can be derived from its sale as a fertilizer.

The London sewage amounts to 120,000,000 gallons a day, and this yields about 3,000 tons of settled sludge, which, by pressure into "sludge cake," can be reduced to about 900 tons. The economic value of this enormous quantity of material, hitherto wasted, applied to the land should be very considerable. Possibly the results thus obtained in London may point to a similar utilization of the solids from sewage in the large cities in this country.

DEBENTURES WANTED.

Municipalities issuing debentures, no matter for what purpose, will find a ready purchaser by applying to
