Pandora Range

STRONG GRATES

"Pandora" grates are composed of three bars, with short bull-dog teeth, which grip, chop up and throw down the gritty clinkers, but squeeze the hard coal upwards.

The two outer bars work on the centre one, and all three are held together in one strong iron frame, which can be removed by merely unscrewing one bolt. This is a great point in a range. Most range grates require expensive experts to take out old ones and put in new grates. You can do the trick on a "Pandora" in ten minutes, with a ten cent piece for a screw driver. Isn't that simple, convenient, inexpensive?

The more you know about the "Pandora" the better you'll like it.
