THE QUICKER YOU SELL THE MORE MONEY YOU MAKE

A finished house unsold is costing the owner money.

The Pease Heating System will help you sell that property. A Pease Furnace or Boiler is a

GUARANTEE OF QUALITY

It creates confidence in the builder and in the material used in the construction of the house.

Our motto is not "How Cheap" but "How Good" can we make it.

Is it yours?

This Analysis

explains why

"EBANO" & "EAGLE"

BRANDS

Mexican Asphalt

Has given such entire satisfaction during the five years it has been used in Canada. It costs nothing for repairs.

ANALYSIS

recently made by Messrs. Dow and Smith of New York City.

" Bitumen soluble in Carbon Disulphide -	99%
" Bitumen soluble in Carbon Tetrachloride -	98%
" Bitumen soluble in Penna Naphtha boiling between 40° and 60° C. -	78%
" Penetration at 77° F. -	44
" Ductility unfluxed -	22 cms.
" Penetration of Asphaltic Cement at 77° F. -	50
" Ductility of Asphaltic Cement at 77° F. -	45 cms.

" Remarks: This is a very high quality of refined Asphalt and is suitable in every respect for paving purposes."

It has been used in Montreal, Winnipeg, Ottawa, Hamilton and Toronto, and has met with great success in every case. It is not affected by extreme changes of temperature and is therefore thoroughly adapted to conditions in Canada.
