

- assess historic trends of emissions, ambient concentrations and atmospheric deposition trends to gain further insights into source receptor relationships for air quality, including deposition; and
- prepare proposals for the "Research, Modelling and Monitoring" element of an agreement.

3A. Strategies Development and Implementation Work Group

The Group will identify, assess and propose options for the "Control" element of an agreement. Subject to the overall direction of the Coordinating Committee, it will be responsible also for coordination of the activities of Work Groups I and

II. It will have one subgroup.

In carrying out its work, the Group will:

- prepare various strategy packages for the Coordinating Committee designed to achieve proposed emission reductions;
- coordinate with other Work Groups to increase the effectiveness of these packages;
- identify monitoring requirements for the implementation of any tentatively agreed-upon emission-reduction strategy for each country;
- propose additional means to further coordinate the air quality programs of the two countries; and
- prepare proposals relating to the actions each Government would need to take to implement the various strategy options.
