

E. J. Rockwood, Worcester, Massachusetts, February 27, 1888. Has no rude implements. Will spend next summer examining the valley of the Connecticut River near Mount Holyoke, and if successful will send specimens.

Jesse Fewkes, post-office box 509, Newton, Massachusetts, February 18, 1888. Has two hundred rude implements chiefly from Essex and Middlesex Counties, Massachusetts. Has many from shell mounds. Speaks of grooved ax found in moraine-deposit.

Frank A. Bates, Boston, Massachusetts, February 23, 1888. Has no rude implements, and refers to F. A. Adams, 233 State street, Boston, Massachusetts.

F. A. Adams, Boston, Massachusetts, February 23, 1888. Response received May 21, 1889. Has about five hundred specimens; about one-fifth are perfect arrow and spear heads, of porphyry, quartz, flint, obsidian, agate, etc., from Concord and Plymouth, Massachusetts, and various States of United States; deposits accidental, and found on or near the surface, associated with other neolithic implements.

MEM.—It is evident that this gentleman, like some others, has mistaken the implements inquired about, and so has misapprehended the questions.

Irving Holcomb, West Granby, Connecticut, February 8, 1888. Has five. Found a nest or *cache* containing a peck, 3 by 7 by $\frac{1}{2}$ inches, 2 feet under ground. Such as described in Abbott's *Primitive Industry*, page 195.

Irving Holcomb, West Granby, Connecticut, February 15, 1889. * * * "The rude stone implements I wrote about were found as follows: One on the bank of Salmon Brook, in the town of Granby, Connecticut. The specimen is of flint, and was found on a terrace. All other chips and unfinished specimens I have were found on the surface in plowed fields—all in different places. I have one rare specimen which is finished and was found about 12 feet below the surface nicely packed in with about twenty others of same shape, but different sizes, near Salmon Brook, on a place where arrow-heads were made." Has but one, which he bought.

G. L. Faucher, West Winsted, Connecticut, February 9, 1888. Has none and knows of none. Will explore the State in the spring and will notify us if he finds anything.

Rev. Jeremiah Zimmerman, Syracuse, New York, February 15, 1888. No information.

Rev. W. M. Beauchamp, Baldwinsville, New York, February 7, 1888. Has a collection. Will answer more fully later.

J. H. Norton, Plainville, New York, March 2, 1888. Has about two hundred, all of chert; found on the surface in Onondaga, Cayuga, and Oswego Counties. Has twenty-eight implements from a *cache* of fifty turned up by the plow. None in mounds. Deposit accidental.

Dr. Julius Pohlman, Museum Natural Science, Buffalo, New York, February 7, 1888. Has none in the museum and knows of none in the vicinity.

Edgar J. Klock, East Schuylar, New York, April 2, 1888. Has very few, in fact but one that is well defined, which he obtained from J. R. Nissley, Ada, Ohio.

Prof. Frederick Starr, Auburn, New York, June 26, 1888. Has one rude implement of argillite, found on the banks of the Delaware River, eastern Pennsylvania, 7 miles above Easton, near mouth of Martin's Creek. Probably a surface find. Arrow-heads of same materials and much affected by weather are not uncommon there.

D. S. Kellogg, M. D., Plattsburgh, New York, February 14, 1888. Has many rude and unfinished implements, but none that he considers as real paleoliths. None found in river drift. Can duplicate all our specimens.

George R. Howell, Albany, New York (no date). Has none, but thinks there are some in the New York State Museum in Albany. We should apply there.

C. M. Boughton, East Schuylar, New York, February 16, 1888. Has no collection, having sold it. But he has found these specimens in different places in the western part of this State. Will collect specimens if we wish from a sand-hill near.

Norman Cole, Glens Falls, New York, February 6, 1888. Has two hundred from this vicinity. In the valley of the upper Hudson, foot of Adirondacks, and near shores of lakes and streams.
