BOVRIL

Bovril is one of the most precious food substances in the world. Its beneficent effects are immediate; it acts like a glass of champagne, but without the reaction which wine sometimes brings. Bovril does permanent good by building up the very fabric of the body.

To get the full benefit of Bovril, take it regularly day after day. The value of "a course of Bovril" has been scientifically demonstrated by the independent investigations of Professor Thompson.

After bringing human subjects to a constant weight on a standard diet, he added Bovril to the other food, and found the body-building powers of Bovril to be 10 to 20 times the amount taken.
