

school purposes. There are two most commodious and spacious Lecture Rooms ; a new Chemical, and a new Physiological Laboratory ; a very fine room, one of the largest in the College, and lighted from the ceiling, set apart for the Museum ; a Reading Room, and a Waiting Room for students. The Faculty of the School continues to make every improvement necessary for the comfort and convenience of the large and constantly increasing number of students, who year after year fill the classes. To meet the requirements of the large classes in attendance, a new Dissecting Room—very spacious, also lighted from the ceiling, and entirely separate from the rest of the College Building, has been built. It is completed and furnished with every modern requisite of a thoroughly equipped Dissecting room.

Trinity Medical School, under its Special Act of Incorporation, and its affiliation with several Universities, has every privilege enjoyed by any Medical Institution in the Dominion.

The SUMMER SESSION has proved very successful, and is invaluable to those who attend it. The teaching is made thoroughly practical. (See the list of subjects for 1885, page 21, of this Announcement).

MATRICULATION.

Students are advised, before entering upon their medical studies, to pass the Matriculation Examination of the Medical Council of Ontario, viz. : The THIRD non-Professional Examination with Latin, which is accepted by Trinity Medical School, and by the University of Trinity College. This is the more important, as the Medical Council dates the period of study, in every instance, from the time the student is registered on their official list, as a matriculated medical student.

The Examination referred to, includes the following subjects:—English Grammar, English Literature, Composition, Dictation, Arithmetic, Algebra and Euclid, History and Geography, Latin.

The University of Trinity College, the University of Toronto, and Trinity Medical School, while they do not insist upon the matriculation examination being passed before attendance on medical lectures, strongly recommend that it should be passed as soon after entering, as possible—and in every case, where at all practicable, before the passing of the 2nd year, or Primary professional examination.

Evidence of having passed the Matriculation Examination in Arts, or Medicine, in any British, or Colonial University, or that required by the Medical Council, or by the various Colleges of Physicians, or Surgeons
