Lieut. Governor Todd Urges Full Use of Canadian Ports
CLASSIFIED AT OKLAHOMA

ENGINEERS WELCOMED TO ST. JOHN

Lieut. Gov. Todd Urges Full Development of Canadian Ports.

REFERS TO LUMBER

Large Attendance at Annual Meeting—Dry Dock Attracts Many.

Sounding a note of optimism for Canada and urging full use of the ports of the Dominion for transport of the products of the country, His Honor Lieut. Governor Todd welcomed to St. John today an important body of men, members of the engineering profession, in maritime conference.

An interesting illustrated paper on the new St. John dry dock—largest in the world—which will be opened next month, was delivered by E. G. Cameron, A. M. E. I. C., chief engineer of the St. John Dry Dock and Shipbuilding Co., and also was a feature of the opening session of the Maritime professional meeting of the Engineering Institute of Canada.

Immediately after the presentation of this paper the delegates went to the site of the dry dock where its construction and workings were explained by Mr. Cameron. The visitors were guests of the Company at luncheon.

Nearly 100 delegates from all parts of the Dominion were present at the first session which was held in the rooms of the St. John Board of Trade. The president, Walter J. Francis, of Montreal, was in the chair and extended a hearty welcome to the visitors.

The president, in opening the meeting expressed satisfaction at the excellent attendance. He introduced His Honor Lieutenant-Governor W. F. Todd of N. B.

His Honor first voiced his pleasure in attending the large gathering of engineers. He paid a high tribute to the standing of the profession and the good work it was doing in the country. Referring to unemployment he said he felt that there was hope that the tide would soon turn and an era of prosperity would follow throughout Canada.

Canada, he said, was rich in natural resources and he felt that in the future a great deal of the wealth of the United States would find an opportunity of investment in Canada and help to develop the natural resources, which would make for a greater Canada.

Canada's western crop this year was estimated at 450,000,000 bushels. He anticipated that it would not be many years until the crop was a billion bushels, and this country would become the granary of the world. Immigration was needed to carry out these hopes and Canada should welcome immigrants.

Use Own Ports.

A great part of Canada's wheat was shipped through U. S. ports, taking away revenue from Canada's workers and railways. He felt that the ports of Canada should be developed as they ought to be, that the great Transcontinental Railway should be used to the fullest so that the crops of Canada could be shipped through the country's own ports. It was the duty and obligation of the whole country, he said, that these products should be shipped through Canadian ports.

Alfonso Moves The Primo-Rivera's Heart

Paris, Sept. 26.—"I am leaving for Madrid. Thou art responsible for order." This was the telegram received by General Primo-Rivera, the president of the Military Directorate in Spain, on September 13, after Primo-Rivera, at the head of the Barcelona garrison, had overthrown the local authorities and demanded the resignation of the Madrid Cabinet.

The telegram was dated San Sebastian and signed "Alfonso, King of Spain." The intimate appellation "Alfonso" which in the Latin language is bestowed only upon bosom friends, is said to have gone direct to Captain General Primo-Rivera's heart, and he took a solemn oath to maintain law and order at all costs.

LLOYD GEORGE IS SCORED FOR TRIP

London, Sept. 26.—Now on the threshold of the fall, when other political parties are preparing for extensive campaigns, we are charged to find our leader going on a holiday across the Atlantic.

This cry, from the heart, is contained in a letter written to the press by a Georgian, who expressed wonder how Lloyd George can welcome the prospect of being acclaimed in a remote country while his political followers are left marooned on this side of the ocean.

The object of the letter was to induce H. H. Asquith, who is organizing a gigantic autumn campaign, to throw open his fold to dissatisfied Georgians. To some extent this has been successful. It has evoked the reply from the Liberal headquarters in London that a great meeting will be held today for all who desire to participate in the forthcoming Liberal drive.

RUHR ZONE PLACARDED BY GERMANS

Proclamation in Connection With Abandonment of Passive Resistance.

PATIENCE IS ASKED

Cabinet Determines Method to Withdraw Railway and Other Agents.

(Canadian Press) Berlin, Sept. 26.—An official proclamation signed by President Ebert, Chancellor Stresemann and all the cabinet members, announcing the German Government's abandonment of passive resistance in the Ruhr, will be placarded throughout Germany today. It will set forth the reasons which make the surrender imperative and also admonish the nation to bear with the government in the present critical period.

At the session of the cabinet which continued until after midnight, the government discussed the question of its decision definite formulation. The formula adopted will also constitute the crux of the statement to be made to Reichstag by the Chancellor Thursday afternoon.

The cabinet also determined the manner in which the existing orders to the railway, telegraph and postal employees and the fiscal agents in the occupied areas will be withdrawn.

Surrender Important. London, Sept. 26.—Germany's unconditional surrender in the Ruhr, today's meeting of the British cabinet with additional importance. It is the first cabinet council in several weeks, during which time events of great moment directly affecting British interests have happened. The negotiations, of course, are secret, as usual, and no official report of them is to be expected.

It is taken for granted that the foremost subject of the meeting will be foreign affairs, and that before the close of the meeting the ministers will be in possession of a full account from Premier Baldwin of his much discussed conversation with Premier Poincaré. It is not supposed, however, that the cabinet members will be called upon to decide any important point of policy in view of the present uncertainty in the situation all around.

To Make Concessions. The political writers in the morning press for the most part refrain from speculation as to the future. The Daily Telegraph's expert, however, is confident that France will waive any tactical advantage she may have obtained over Great Britain in consequence of her success in the Ruhr, that Premier Delors is ready to make concessions to the Germans when the time comes, and that the practical aim at the present stage of Anglo-French negotiations is to keep up a united allied front in the dealings with Germany begin in earnest, as must happen in a few days. Poincaré is waiting.

Paris, Sept. 26.—Premier Poincaré, who returned to the foreign office this morning from a couple of days rest at his summer home in Sampringy, is awaiting the actual cessation of resistance in the Ruhr and the compliance by the industrial interests there with the orders of the authorities of occupation, before forming an opinion as to the significance of political events in Germany.

This was made public today by a high official close to the Premier.

"I'm in hard luck, Your Honor," he told the court. "I don't know what became of my teeth. And my watch and glasses are gone, too. Please send me to the workhouse again." The court complied.

REVOLUTION IS NOT CONFIRMED

Sensational Report From Belgrade is Not Substantiated, London Reports.

London, Sept. 26.—The sensational report printed here yesterday of the complete success of the revolutionary movement in Bulgaria receives no confirmation in later despatches from any source.

The Morning Post, which carried the story on Tuesday, does not attempt to substantiate it, and the brief telegram from the same correspondent that appears this morning contains no mention of the Belgrade rumor.

These two newspapers have detailed despatches from their special correspondents in Sofia under date of Tuesday. Even if these are completely correct, they do not mention that communication with the Bulgarian capital is still open, and that the Government is functioning.

In addition there were five constables at the Clearing House and a mounted policeman followed the messengers when they came out. These twelve constables were in addition to the regular traffic men.

Toronto, Sept. 26.—The Province of Ontario refused the tenders which were submitted for its contemplated loan of \$30,000,000, which was to have been placed half in the U. S. and half in Canada. The entry of the Dominion Government into the home market and the disturbance of the New York market caused by the Japanese disaster and the European situation were the factors which influenced the Provincial Treasurer in deciding to withhold his offering until a more auspicious time.

In spite of present conditions, the opening of bids yesterday showed that a not unfavorable reception had awaited the loan. The money could have been secured at 6.35 per cent.

It is understood that this latter subscription is solely for the bank's investment account and is independent of any purchases they may make on behalf of clients.

The feature of the day's business, apart from these large amounts, was the substantial volume of small subscriptions received from coast to coast.

COSGRAVE WARNS OF LABOR TROUBLES

Intervention of Free State Government Asked to Prevent Strikes.

Dublin, Sept. 26.—Strikes in various trades in Dublin and the provinces, which are crippling the Irish Free State's industry, have provoked appeals for Government intervention. President Cosgrave on the adjournment of the Dail yesterday answered the appeals by issuing a statement in which he uttered a warning that enormous losses confronted the Free State in consequence of industrial disputes. He blamed the employers and workers equally for the situation. The cost of production must be reduced, he said, and the people must be content with fewer luxuries than they had been accustomed to.

Mr. Cosgrave added that the Government would finance a plan if it was assured of the co-operation of the employer and the employed.

RHINELAND TO BE REPUBLIC?

German Separatists are Showing Increased Activities—Plan Rally Sunday.

Berlin, Sept. 26.—Not the least of the German Government's worries at present come from the alarming reports from the Rhineland, where the Separatists are showing increasing activities. They now have created a "general directorate" which has convoked a grand rally to be held at Dusseldorf next Sunday for the purpose of proclaiming a Rhineland Republic.

The French regime is said here to have agreed to place seventy railway trains at the disposal of the Separatists, who believe the situation created by the German Government's abandonment of passive resistance offers a suitable movement for the accomplishment of their designs. The Separatists have organized a special police force, which is to be clothed in green uniforms, similar to those worn by the Prussian "Green Police."

Admits Gravity.

The German press in the Rhineland admits the gravity of the situation arising from the secession sentiment and declares it will retire from the impending negotiations with France. It gives warning that the strength of the movement must not be underestimated.

"Rhinelanders, be on your guard," the Cologne Gazette captions its editorial which remarks that the veil of secrecy which the Separatists have attempted to conceal their machinations now has been removed.
