Important Concessions In West Side Transfer

General Manager McNicoll, of C. P. R. Writes to Mayor Frink, Agreeing to Meet City's Terms on Some of the Points -- What City has Gained by Holding Out.

Yesterday Mayor Frink received a communication from General Manager McNicoll of the C. P. R., making, on behalf of the company, a proposition looking to the solution of the question at issue between the city and the C. P. R. in connection with the West Side transfer, which it is believed will be satisfactory to the city council and enable the agreement to be completed. Mr. McNicoll writes that the company will undertake to fill in the land to be acquired by it as rapidly as the government proceeds with the construction of the docks and breakwater, and to complete the filling in work within a period of ten years after the government has completed its work. The government will fill in the 400 feet strip running along the head of the docks to be reserved for public purposes. The mayor expressed the opinion that Mr. McNicoll's proposition would meet with the approval of the council, as it meets, in a measure, the contention of the city, that the company should agree to fill in the land within some specified time, and not be at liberty to hold the land unimproved indefinitely. By refusing to be stamped into transferring the 40 acre lot without conditions, the city council, though it has conceded a good many points, has obtained some important concessions from the C. P. R., the principal ones being: (1) Provision for a roadway running from Union street to Germain street with the ultimate removal of tracks therefrom, assuring free access for purposes of fire protection to residences in that locality. (2) Provision for the construction of a large trunk sewer which will drain the southeastern part of Carleton and the portion of the parish of Lancaster in the same watershed. (3) Provision for the filling in of the land as fast as the government proceeds with the construction of the docks and breakwater, to complete the filling in of the land within 10 years of the completion of the government work. During the course of the negotiations, the C. P. R. strongly opposed the granting of all these conditions when set forward by the city. Some time ago it conceded the city's demand for a roadway, and later agreed to assume, conjointly with the government, the cost of constructing a trunk sewer through the 40 acre lot, and to assume responsibility for any injury to the sewer caused by its rolling stock. Its latest concession does not altogether meet the requirements in regard to the filling in of the land which the city desired to impose, but it is probable that it will be accepted by the council.
