Correspondent at Victoria Forecasts Probable **Developments**

B-lieves Another Session Will be Held, at Which Socialists and Government Will Execute Tactical Disagreement

(Special to The Daily News) Victoria, Sept. 27 .- At any time the news grows more than usually scarce in Victoria, rumor may always be depended upon to produce predictions of an early dissolution of the legislature and an appeal to the country. Such a predicion was launched about a week ago given sufficient definiteness as to place the date of a prospective general elec-tion in December. The difficulties in the way of taking a vote in such a country as British Columbia during the depth f winter in themselves destroy the probability of such a guess, and on the other hand members of the government declare emphatically that there is no indeclare emphatically that the recent tours hrough the interior ridings taken by premier McBride and by his lands minster, Hon. R. F. Green, did not disclose a state of public feeling sufficiently cordial as to predicate the certainty of a government victory. At the same time the government has now a majority of one at least upon the floor of the house, and is therefore prepared to face another session with comparative equanimity.
There is very little propect of any specially contentious legislation being brought down during next session, as the policy of the administration will be o obtain its estimates as quickly as possible and then dissolve the house. Sug-gestions that his honor, lieutenant governor Dunsmuir has requested premier McBride to dissolve the house at the McBride to dissolve the house at the present time are absolutely without justification. The expectation that the va-cant attorney generalship will be filled before the government next meets the louse is not endorsed unanimously by observing politicians. The only two available candidates for this por are Mr. W. R. Ross of Fernie, and Mr. W. J. Bowser, K.C., of Vancouver neither of whom is regarded as suffi ciently strong to be safely entrusted with the opening of his constituency.

The only feature in the political situa-

tion at the present time is created by the recently projected element of the labor party as a distinct and separate considerably weakening the socialistic ascendency and is viewed with more or less sincere favor by both of the old arties. The liberals declare that there is nothing extra-radical in the adopted platform of labor; and that inasmuch as the labor policy is in harmony with the provincial liberal platform labor memhers may be expected to vote and act the liberal forces in the house as against conservatism and its ally social-On this latter point there are signs in the air already that the next upture between the conservative governmental forces and the socialists under east from the shafts. These ore shoots Mr. Hawthornthwaite. This is a necesare at a depth from the surface of 1400 relude as viewed by both the it terested parties to a general election, premier McBride having undoubtedly ost quite as much popularity among the British Columbia through his alliance with the socialists as through any sins of either omission or commission. At the same time the socalists are inclined to sharply catechise their leader upon his loyalty to the Conservative premier during the recent sessions, and in the upper country he may he said to have lost very much in strength through his support of the Coumbia and Western Railway land grant bill, a support that he has utterly failed to justify with his own political faith. It is as yet early in the day to con-

sider the probable legislation of next session or the attitude of the house conprovision for largely increased expendithis being the usual preliminary to an election appeal. Minor differences are expected by some to cause the secession of several government members, the names of Messrs. Clifford, Macgowan, Ellison and Wilson being freely mentioned in this connection. Such pro-phesy has but frail foundation. Mr. Macgowan has manifested a disposition toward displays of seeming independence, but at the crucial moment of a vote has always been in line. Mr. Wilson has had his differences with the govdifferences so radical as to produce his resignation from the minisbut he remains a staunch conservative nevertheless, and the government will not go out of existence through his withdrawal of allegiance to the party with which he has always been identified. Mr. Clifford's lapses from strict party control have not been such as to occasion special alarm to his leaders or to the party, nor does his disposition aphave undergone any special change. It is true that Mr. Ellison carried his objection to the government's

own constituency, and his very depart-ure from orthodox support has necessar-ily strengthened instead of weakening his position with the conservatives of the interior of British Columbia.

As to the socialists; they and the government are prepared to view with equa-nimity the seeming development of acidulated hostility, both well knowing that the government has now a sufficient majority to assure it against destruction by any hostile vote in which the socialists may join for tactical reasons. The last session in the natural life of this parliament may therefore be expected to be short and comparatively unimportant, for the liberal opposition, led by Mr. Macdonald, does not propose to waste time in academic discussion nor will it take the trouble to lay a campaign foundation in ineffective resolutions which might serve the government for form strengthening. The general cond tion of the country, its improved finan-cial status, and the absence of any pressing abuses exciting provincial indigna ion are looked to by the administration by the electorate when an appeal shall

HAD PRACTICAL RESULT

ONE OF VISITING ENGINEERS IN-VESTED IN A MINE

TOOK AN INTEREST IN THE E. PLURIBUS UNUM.

Greenwood, Sept. 17.—George Ross, Welland, Ont., one of the civil engineer who recenly visited Greenwood, took sufficient interest in the mining properties here to invest some Before leaving the city with the party he purchased a share in the E. Pluribus Unum property recently taken over by a local syndicate. Work started on the E. P. U. today. This mine, which has been shut down for some time, has shipped under previous management, over 700 tons of gold and silver leaving ore averaging \$50 to \$60 per ton repres an aggregate of \$40,000. Under the new control the mine will be thoroughly

The irrigation scheme of the Kettle River Irrigated Fruit Lands' Co. is assuming definite shape. Contracts for the earth work and rock work have been let and active operations are now in pro-gress. The land comprising several thousands acres has been sub-divide into ten and twenty acre fruit lots. to each farm. The work will be com pleted this autumn.

STRIKE ON ST. EUGENE

PROMISING NEW ORE SHOOTS ARE UNCOVERED.

BODY OF ORE IN SIGHT GREATLY AUGMENTED.

Rossland, Sept. 27.-It was learned yesterday from an authoritative source that the 1400 foot level of the St. Eugene mine at Moyie, East Kootenay, is ooking exceedingly well, as new shoot of ore have been uncovered there and they are known to be as wide as the drift. Stoping only can determine how much wider they are. Besides this a very important shoot has been found on the 1900 foot level which is very wide. On making inquiries it was learned that the mportant discoveries at the St. Euger are shoots of ore found on the main vein and south vein in the drifts extending oot But more important shoots is a cross vein on the 1900 foot level which has been discovered several hundred feet further east than the developed work on the 2000 foot level. The cross vein runs from the main vein to the south vein, a distance of 250 fee and is known to be ten feet wide. At one point where a crossuct has been run it is about 30 feet wide. It is one of the largest ore shoots yet found in the St. Eugene, and the average value of the ore that it carries is about as high as any yet found in the mine. A great deal ore will run 50 per cent lead as broken down in the face. These new ore shoo add greatly to the quantity of ore in sight in the mine, and give the best assurances possible of a long life of profit to it. The St. Eugene is certainly show-There will undoubtedly be ing itself to be a very large producer lead ore, and good as its performance tures in widely distributed public works, have been in the past in the way of pro ducing large quantities of ore, the find ing of these new shoots, in addition to the old shoots, promises that easily keep up its reputation as the larg-

est lead mine in Canada.

As the season is coming to a close there ave been a number of locations record and certificates of work issued during the last few days, showing that there is considerable activity just now in the Three locations are recorded from Craw ford bay, on Gray creek, being the Sum mit, by D. R. Brockeman, the Hills F. Z. Miner and the Sphinx by M. D. Brockeman, Certificates of work have been filed on the Bellingham by J. M. Brown and on the Superior and Gold Queen for work performed upon the Bellingham by J. M. Brown. J. L. Kane records ce tificates of work on the Careless and the Norah fraction. Ner Smith records cer-tificates of work on the Tonka and the Oro Plata. Certificates are filed on the Clyde vada by J. G. Devlin for B. Devlin and course to that extent last session that he F. P. Drummond. Certificates have been voted against them on important issues. If e was well aware, however, of what he the Sloux and Minnehaha. Also to N. END IS NOW IN SIGHT

OF POWER MACHINERY TO ARRIVE ON TUESDAY

HYDRAULIC ENGINEER EXPECTED HERE TOMORROW.

Work is once again proceeding busily ipon the site of the city power plant on Kootenay river. The Allis-Chalmers-Bullock electrical engineer, H. E. Bullis, who has been here for the past two weeks, came up from the plant yesterday having practically completed all the work he can do there for the present until the hydraulic machinery is installed. Mr. Bullis has erected the switchboard and placed all the conduits in position for stringing the wires as soon as the proper time arrives. He is now in Nelson ready to proceed upon the electrical connections at the new substation. which is in process of erection by the city alongside the old building. This is at present not complete and probably another week or ten days will elapse before Mr. Bullis can go ahead with his

part of the work.

In the meantime the hydraulic engieer is on his way, having left Milwaukee on Wednseday last. He is expected here tomorrow or Sunday and early next week the work of placing the hydraulic machinery will begin, provided it arrives n time. The last three cars were ship ped on September 15 and should be here by Tuesday or Wednesday at the latest. One car containing the draught tube is delivered opposite the power plant and today the draught tuhes will be taken cross and suspended over their proper position. They cannot be fixed until the turbine is set in its place below and for that turbine everything is now

vaiting.

It will be gathered from this that while the work is still proceeding that until the machinery is actually in Nelson there is no saying just how soon the plant can be completed. The first car arrived here in ten days from Milwaukee and the others have been now onger on their way and may arrive any

INSPECTOR IS SATISFIED

RELIEVES KOCH'S MILL IS ABSO LUTELY FIRE PROOF.

REACHES DECISION AFTER MAK-ING PRACTICAL TEST.

W. E. Koch, the millman, is the oblect of much solicitation and chaff al the hands of his friends just now, and thereby hangs an interesting narrative It seems that after Mr. Koch's dry kiln burned down last year at his mill at Koch's Siding, he put in a very effective water system by which the dry kiln could be drowned out in about a minute in case of fire. This is done by running a couple of pipes about 12 feet apart along the top of the kiln. At every foot is a contrivance for spreading a jet of rater over a circle 12 feet in diameter with a jet of water spurting into the root timbers. With some 225 of these miniature fountains in eruption, the cascade of water is likely to be great, especially when behind is a tank of 60,000 gallons under 80-lbs. pressure. But Mr. Koch had never seen the thing actually at work, only having viewed the inside of the kiln after it had been allowed to

play for a couple of minutes. Yesterday the coast underwriters' ino inspect Koch's mill. Both Koch and he inspector arrived simultaneously The former instantly invited the inspec tor to look over his system. The in spector thought the dry kiln was the first thing to be seen and both men wen in, telling the engineer to turn on the water. Awaiting the flow, the two stood at the far end. The water did not come immediately, and Koch and the inspector began to move inward. Befor they had penetrated 50 feet, they though they were in the vicinity of Grohman falls and rushed for the far end. Ther they were certain they had struck Nia gara. With equal haste the men made their way back again to the entrance thinking, as the water, striking the steam pipes, became hot, that Halcyon

was really the mark. As the inspector and the millman re-moved their outer clothing and wrung the water out of their hair, neither said anything till the insurance man made ome picturesque remarks about the colishness of insurance agents doubting the word of mountain lumbermen. There is nothing doubtful now about Koch's neurance though S A Brydges is for a spoilt agent.

CAN'T SHORTEN ROUTE

G T P Will Not Save 400 Miles Between Quebec and Winnipeg. (Special to The Daily News)

Ottawa, Sept. 27.—Chief engineer Lumsden, of the National Transcontin ental Railway commission, says that he never heard of the report published in the press that the commission was abl to shorten the line between Quebec and Winnipeg by 400 miles. He wished that is was correct, but it was not.

Rudolph Lemieux, the postmaster gen-eral, will deliver the annual address to the Caledonia society, in Montreal, on October 31, Halloween.

In addition to increasing the salaries of country postmasters, the postmaste clerks of the insepectors' office.

DIFFICULT ENGINEERING

. V. & E. Encounters Serious Obstact

race Wilkinson.

Midway, Sept. 28-The building of th Vancouver, Victoria and Eastern railway one of James J. Hill's enterprises, is, with ut doubt, the most difficult plece of raiload building in the Canadian town has an elevation of 2100 feet abo see level Molson at the summit is 370 feet above the sea level, and nine mile further on is Oroville, with an elevation only 900 feet. To connect Midway and Oro ille with a feasible fine of railway, wa the difficult task the engineers had to pe form. They have succeeded, but not with out sharp curves, heavy grades and a few switch backs. The line begins to rise here and continues along the up grade along the Kettle river valley until Myer's creek reached. The rallway continues cend touching the international boundary at McMinn's ranch. A sufficient ele vation is reached there to allow the line to turn northward to Rock creek. The slope of this turbulent stream is followed unt Baker creek is reached. The road their follows Baker creek to McBride's, 24 miles from here. The summit, with an elevation of 4100 feet is reached at Sibley. To get down from there requires a maximum grade of 21-2 per cent, and a heavy curvaure. To get down from the summit o ossibility, therefore legislation was s cured to enable the company to cross the boundary. It takes 27 miles of railroad to reach Oroville from Molson, a distance of nly nine miles as the crow flies, and the Molson, through the Similkamen the ex rineering difficulties are not so great, but not as easy as it might have been.

ERITIT COMING IN I A McDonald says that he is shipping

TELEGRAMS OF THE DAY

LISH RAILROAD WRECK

ACCIDENT WAS CAUSED BY EXCES SIVE SPEED

San Francisco, Sept. 28-Eight persons were injured, four seriously, in a street car accident on Oak street last night aused, it is claimed, by a defective brake As the Mission street car was descending the Oak street hill, the brakes suddenly gave way and the car shot down the in-84.22 cline at a terrific speed. The car was so \$5.80 crowded that several persons were riding on the roof. At Scott street the car struck its driver, sustained a fracture of the skull 91.17 and internal injuries.

rect cause of his detection was a bet he made of \$3000 on a New York race, which he lost. Hitherto his bets have been more odest, but this was apparently a desper square his books.

The loss came to the ears of the city detcetive and he informed the bank authori-ties. The latter immediately took Cather ut of the teller's box and placed him at other work pending an investigation for the purpose of ascertaining if there was anything wrong. It was while in this work that Cather learned that the city detective had him under surveillance. He skipped, going at once, it is said, to New

New York, Sept. 28-The World today says: Ivan Ivanovitch Norodny, chief excutive commissioner of the Russian mililish headquarters in America for the revo lution. He comes to solicit one million signatures to a petition to the czar praying for liberty, justice and amnesty. He comes pon a mission of education to disavow the blood; act: of terrorists. A mild man-nered man is Norodny, about 40 years old, whose face tells the story of his suffering Twenty years ago a happy husband, owner of seyeral estates and a man of conse-quence in Friand, the land of his birth. oday he weeps for his wife, confined in an sylum, the victim of the brutality of the Cossacks, and prays for the repose of the soul of his eldest born, slain by the same his fortune has been confiscated by the

"I came to solicit names," he said las night, while seated in his rooms in the New Hotel Abbert. "I shall present my petition first to the five Americans best known in Russia. They are president Roosevelt, Mark Twain, William J. Bryan, Thomas A. Edison and Miss Jane Adams of Hull House, Chicago. I have here prepared a propaganda. In part it says: On behalf of 150,000,000 people I cry out for help. We require nothing but active and sympathetic moral support. Oceans of plood were spent to free the black slave Millions upon millions of my country are suffering a worse slavery. We despise anarchy and every form of violence. I wish to declare on the czar, not a war of blood, but a war of education, a war of moral suasion. The Rusian peasant hungers for education, for books, for teachers, for would wage on the czar. This is not the

Two Big Boundary Mining Concerns Are Growing Apace-New Developme and Improvements Underway

(Special to The Daily News)
Phoenix, Oct. 5—At the annual gen
meeting of the Granby Consolide
Mining, Smelting & Power Co., Ltd. the company's New York office, 52 B oway, the following financial statem was submitted to the shareholders the year ending June 30, 1906, by Ge W. Wooster, the treasurer:

PRODUCED. PRODUCED.

19,939,004 lbs. copper fine, sold average price of \$0,1778.

316,947 ounces silver, sold at average price of \$0.6468.

50,020 ounces gold, sold at average price of \$20.00.

Total amount realized, \$4,751,058.68

COSTS Vorking expenses at mines and smelter, freight, re-fining, selling and general

Cost, per ton of ore, including all penses, \$3.2988.

Net cost per pound of copper, a leducting values of gold and sil

Surplus carried over from

Explor. expenses\$ 20,753.71 Divid's paid... \$10,000.00

There has been expended in new catruction, equipment at the mines, and ter and convertor plants, etc., \$105.975. For additional mining propert \$350,485.25. A total of \$456,460.39.

Total .1.....\$16.151,641

In his address to the sharehold president Jacob Langeloth referred w deep regret to the death, which occur in February last, of John Stanton, one the board of directors of the compa He stated that the tonnage output h largely increased in the last fiscal ye amounting to an increase of over 40 cent over the previous year. Briefly referred to the chief events of the y in the operations of the company, pay in the operations of the company, pay in the operations of the company, pay in high compliment to the local manament for the way the emergency was relast winter when one of the huge crushers was burned, which was de without largely decreasing current p duction. In view of the higher price copper ruling since last fall, it had be deemed wise to mine large quantities.

copper ruling since last fall, it had be deemed wise to mine large quantities ore carrying a smaller percentage of coper than the average run of the min Active work had been going on contually and large bodies of ore had be opened up by diamond drills in the V torla and Aetna claims, where a n shaft is now being sunk and the necesary improvements installed for cruing and shipping this output, the fishipment from this outlet probably to made at the end of this year.

He stated that development of Gold Drop group, purchased a year a proved satisfactory, and for some monore shipments from this part of Granby group averaged—over 200 to per day. A tunnel is being pushed Granby group averaged over 200 to per day. A tunnel is being pushed wards the Monarch property, owned the company, also opening up satisf tory ore bodies. The length and width not yet fully determined, but indicated point to large bodies of ore, a considable portion of which will soon be averable for hoisting. These developmen Mr. Langeloth stated, have largely
