Toshiba introduces the portable laptop computer students will graduate to.

It's called the Toshiba T1000. And when you consider how much personal computer it is, and how little money it is, you don't have to be an 'A' student to know how valuable it can be.

A mere **6.4 pounds**, the powerful T1000 is the smallest, lightest computer Toshiba has ever made. It's less than a foot square and a fraction over 2 inches high, so it fits comfortably anywhere. Especially on your lap. And its high performance level combined with its low price make it perfect for students working at home, in the library, or anywhere else.

The only big things about the T1000 are its

features and benefits. There is, as always, full MS-DOS™ operating system compatibility and it's built right into the T1000's ROM. There's a brilliantly clear Super Twist LCD 80 column by 25 line screen and when it performs, it does so for up to five hours on internal rechargeable batteries, or plugged into the continuous power of a standard AC adaptor.

With the new T1000 laptop, the best portable computers have not only become better, they've also become even smaller and less expensive.

Call Toshiba direct at 1-800-387-5645 and we'll tell you where you can pick one up... easily.
