

FROM OUR FACTORY

direct to your FARM

Please send me your
Big Barn Book

NAME _____
ADDRESS _____
F.A. R.R. NO. _____

Send for our Big Barn Book, giving detailed information about the Preston Service to Farmers and showing the complete line. With the book we'll send you, free, our set of Standard Designs of Rural Landscape Architecture.

THE low prices quoted on Preston Barns and Buildings are made possible by the buying power of this large industry—an industry of which you may form some idea when we tell you that we take the whole output of three large lumber mills in Northern Ontario.

The Preston Method places on your farm—direct from our factory—buildings so fabricated that they may be put up complete in a few days.

There is no need to board a big gang of barn builders half the summer—no need of a "Raising Bee," requiring the services of half the countryside.

THE barn illustrated above is the sturdiest and best-protected you can buy at any price—large enough to hold all the crops of a 150-acre farm. A Standard Preston Steel Truss Barn in this size can be supplied for \$2,780. In Style D, which is same as above, but with wood sides instead of steel, the price is \$2,400. These prices include all the materials for the barn above the foundation.

The garage is large enough to hold any standard car—or could be used as a dairy house, summer kitchen, or hen house. We make several other styles of garages, which are shown in our free catalogue, "Your Own Garage." Send for it. The Preston Steel Truss Implement Shed will give you fireproof housing for your valuable implements—a building which fire will not harm—complete protection against wind, rain, snow and lightning. The shed shown above is 20 ft. by 36 ft. The same size in the Preston I-Beam Frame Implement Shed can be supplied for \$333. Write for complete information.

RURAL LANDSCAPE ARCHITECTURE

FOR years we have been helping farmers to lay out their farm buildings on the most convenient and economical plans. Now we go a step farther and show you how to lay out your entire Farm—furnishing plans that indicate the most efficient lay-out of Fields, Lanes, Fences, Gates, Windbreaks, Orchard, and Shrubby. This service is designed to aid you in handling crops and stock economically, and includes approved directions for "Crop Rotations" on the whole farm. By utilizing our service, you not only obtain an ideal barn, but you also secure expert assistance in raising the produce that is to fill your Barn, with lightened labor and increased profits.
