

I Doubled My Crops

This story could be told by many Canadian farmers who have used a high-grade POTASH fertilizer.

One farmer in Cape Breton, N.S., doubled his crop of potatoes, in fact, has just harvested a yield of 735 bushels to the acre. If he can get such a yield, why can't you?

You surely ought to have plenty of barnyard manure to use. If so, use it in **quantities** in connection with 400 lbs. Basic Slag and 160 lbs. Sulphate of Potash to the acre; cultivate well and you can get a yield similar to his. That is what he did.

Another farmer in Cowansville, Que., obtained a yield of 1,66 bushels of mangels to the acre by using 150 lbs. Nitrate of Soda, 400 lbs. Acid Phosphate and 150 lbs. Muriate of Potash, increasing his yield 826 bushels over the plot fertilized with only Acid Phosphate and Nitrate of Soda.

IT COST THIS FARMER JUST \$3.45 TO GET 826 BUSHELS MORE OF MANGELS.

If you want to do likewise on your farm, write us and we will tell you how.

POTASH PAYS

Every crop removes from the soil so much Nitrogen, Phosphoric Acid and POTASH. This is the food the plant consumes. If you wish to raise bigger crops, you must put back into the soil the plant-food that the plant takes up in its natural growth. You probably understand this, and very likely you use some sort of fertilizer, but if you are NOT using a fertilizer containing 6% to 10% POTASH, you cannot get bigger yields of better quality. This is because a plant removes from the soil more POTASH than Phosphoric Acid. Ordinarily, low-grade fertilizers contain from 6% to 8% Phosphoric Acid and approximately 2% of POTASH. Certainly this is not more POTASH than Phosphoric Acid. You must increase this percentage to 6% to 10% POTASH. If you want to raise a bumper crop next year, do this. Insist that your dealer provide you with a 6% to 10% POTASH fertilizer. If he cannot do this, and you have to buy a low-grade fertilizer, for every ton of low-grade fertilizer you buy add 200 to 300 lbs. of Muriate or Sulphate of Potash, and this will bring it up to a high-grade fertilizer.

You can mix your own fertilizer at home if you want to. Our agricultural experts will tell you **free** how to do this. Get in touch with your fertilizer dealer **now**, so that he will be sure to have POTASH on hand for you when you need it. Send us your dealer's name, and we will send you **FREE** booklets on how to increase your yield. These booklets, we know, are instructive and are the best on the subject, being written by experts. Write us, telling the kind of crops you raise, giving us the name of your dealer, and we will see that you get a fertilizer high in POTASH.

You will have plenty of time this winter to study this all-important question, and how to proceed another year to get bigger yields of better quality from your farm. Write us **TO-DAY**.

German Kali Works, Inc., TEMPLE BUILDING, **Toronto, Can.**

Having Muriate and Sulphate of POTASH in store at St. John, N. B., Montreal and Toronto makes it easy for you to get your POTASH from us.
