

TEN YEARS AHEAD  
OF ALL OTHER  
CREAM  
SEPARATORS

In skimming efficiency, simplicity, durability and convenience, the new 1908-1909 improved De Laval Cream Separators are fully ten years ahead of any other machine on the market to-day. Thirty years of experience, protecting patents, and many valuable improvements devised and perfected by the De Laval engineers in all parts of the world during the past three years, are responsible for this fact. Every feature of the De Laval has been improved, from the supply can to the base. The new centre-balanced bowl with its separate spindle is alone a triumph in separator construction and must be seen to be fully appreciated. Then, there is the new one-piece "anti-splash" sanitary supply can, adjustable shelves for skim-milk and cream receptacles, new frame designs, and many other but less important improvements,—all combining to make the De Laval as nearly ideal as a separator for farm and dairy use can be made. There is the proper size machine for every size dairy from the smallest to the largest and no cow owner can afford to be without one of these improved machines. It will cost you nothing to see and examine the new De Laval and right at your own home too, if you will but say the word. Our new illustrated catalog describing the De Laval improvements in detail is sent for the asking. Write us at once and you will receive this interesting book at first mail with full information as to how you may have a free demonstration of the improved De Laval in your own home. It will pay you to do so and your only regret will be that you didn't investigate sooner.

## New Eclipse Plows

The Self-Locking device on New Eclipse Plows has a double advantage.

FIRST—When your land is very hard, you can lock the Plow down, so that it will stay absolutely to its work.

SECOND—When your land is ordinary, or stony, you convert your plow—in a moment—to a

floating beam, which automatically raises over obstructions and enters the ground again.

No other plow has this device. It is patented. Let us send you printed matter, describing fully
