Just to give a small warning to parents that when the tide is out there is as much danger as when running high: A small boy, 10 years of age, fell over Blenheim's wharf on Tuesday of last week and happened to turn a summer-sail before he struck the mud, going in feet first and sinking up to his head. "Considering what a newspaper man gives in intelligence, experience, training, judgment and native ability, all of them from the highest executive to the lowliest reporter are poorly paid—scandalously paid."

WHAT'S ALL THE NOISE ABOUT?

It's just as important to know what noises about a car mean nothing as to know those that are warnings of real trouble. Motorists are always running to garages with weird tales about strange noises, and they're usually puzzled just because they start in by assuming something serious is the matter.

One of the most perplexing noises a motor can make is that caused by a slipping fan belt in cold weather. The

It is anticipated that English orders for Canadian wool will exceed 1,000,000 pounds this year, which will be a considerable increase over the business of 1923, amounting to 700,000 pounds.

Definite advice has been received at Victoria, B.C., that the Japanese training squadron, consisting of the "Kishima," "Asama" and "Azuma" will visit Victoria during the winter. The squadron will leave Japan early in December, following the annual fall manoeuvres.

Approximately 60 per cent, or 1,252,604 of the population of Western Canada live on occupied farms. Of the balance, 474,516 live in its 20 cities and towns of over 2,500 and 228,962 in 3,309 small towns and villages of 2,500 or under.

The work of re-ballasting the main line of the Canadian Pacific between Montreal and Toronto (the Lake Ontario shore line) has just been completed. Nearly 2,000,000 tons of crushed rock, or about 35,000 carloads, were used in this operation. Officials state that the road-bed is now as excellent as it can be made and second to none in the world.

Successful strawberry culture 300 miles north of the international boundary has been proven possible by R. A. Gordon, of Edmonton, Alta. One hundred plants brought from Ontario wintered well, blossomed heavily and produced a prolific crop of well-formed, fine-flavored fruit with rich color and flavor. Mr. Gordon has likewise had much success with cherries, wild plums and crab apples.

Steady progress has been made by the macaroni industry in Canada during the past decade. The Bureau of Statistics reports that, whereas the Dominion imported nearly 7,000,000 pounds in pre-war days, it imported only 1,096,000 pounds and exported 2,229,000 pounds in 1923. Nine factories, with a capitalization of \$873,000, now operate in Canada, with an aggregate output approximating 11,500,000 pounds.

Whaling operations off the coast of British Columbia this season have been very successful. Four stations and six or seven whalers are working. Some of the vessels have secured 30 head so far this year. Whale oil is selling well in England, while whale meat, canned, is an established commodity in West Africa, the entire British Columbia whale meat pack of last year having been sold there.

Arrangements for the re-building of the old wing of the Chateau Lake Louise, the Canadian Pacific's charming hotel in the heart of the Canadian Rockies, are already under way. The contract has been awarded to Carter-Halls Aldinger, of Winnipeg, and Barrot and Blackader are the architects. The building will have a greater number of guest and public rooms than existed in the one which preceded it, as the hotel is now too small for the crowds which visit it. The work is to be completed in time for next season. It will be recalled that the old wing of the Chateau was destroyed by fire some months ago.

leather or the belt will slip over the metal pulleys and cause a noise that sounds like real trouble, unless you start out by assuming it isn't anything serious.

A kink in the speedometer shaft will cause a terrible racket and the remedy is often simply a matter of moving the shaft a little to one side or the other in an effort to make it run more nearly straight.

A valve stem that needs oil will often start scraping in such a way that it sounds "like the most serious kind of trouble, but the experienced driver usually finds the cause among things because he knows that some of the simplest troubles have the loudest bark."
