Mr. Simpson leaves soon for Minneapolis, Minn., to study osteopathy at the Northern College of Osteopathy, one of the fore-most institutions of the kind. Some of the local musicians are arranging the testimonial, and already have a good programme. Among others will be heard the violinist Poure, the boy wonder. The congregation of St. James' and Mr. Simpson's many friends regret his leaving very much, as he is a musician of marked ability, and a capable and thoroughly conscientious teacher. However, he carries with him the best wishes of his many

STREETS MUST BE KEPT IN REPAIR

City Engineer Instructs Gas Company to That Effect.

Many complaints have been made to the city engineer about the condition in which the City Gas Company leaves the streets after putting in pipes. He has brought this to the company's attention several times—complaining particularly of Clarence, Bathurst, Pall Mall, Fullarton and Ridout streets, and he notified them that if the streets were not repaired properly he would do the work and bill them. A new superintendent has charge of the company's work new and with them. A new superintendent has charge of the company's work now, and with Mr. Graydon he drove to the places mentioned this morning. Work on some of them was being done, but not satisfactorily, and it was ordered changed. In future, the company says, the work will be done under Mr. Graydon's supervision

NEW THEATER

Mr. Graydon Thinks It Is a Splendid Piece of Work.

Building as Nearly Fireproof as Human Skill Can Make It and Exits Are Adequate.

A citizen went into the city engineer's office this morning and showed much anxiety over the new opera house, saying that the fire exits were inadequate. So Mr. Graydon went up to the handsome new building and satisfied himself that there was abso-

lutely no need for alarm. "I went all over it," he said, "and it's in first-class shape. The exits are alright, but I don't see how a fire can start there very well. The boiler house is detached from the main building; there's no gas, and the stores are separate. A fireproof wall is built between the orchestra and the stage. and the walls around the stage are fireproof and lined with asbestos. The drop curtain and scenes are of asbes-It would take an hour for a fire to eat through, if one ever started."
"It's a remarkably fine theater,

the engineer added, reflectively. "There's not a seat in it where every-thing cannot be heard. The theater's acoustics is perfect. The proscenium is made in the form of a sounding board and throws the sound over all the house. That Col. North knows his

THAT STAMP ROBBERY.

Alleged to Have Taken Place On the Midway at the "Pan" Pronounced a Fake.

Buffalo, Aug. 22.-Col. Byrne, chief of the exposition police force, denounced as a fake the story that W. Kelsey Hall, a stamp collector from Peter-Ont., was robbed of several thousand dollars worth of rare stamps while on the Midway.

"The story is not true, and the man who originated it knew it was not true," said Col. Byrne. "Mr. Hall had some valuable stamps with him, and while he was asleep at the exposition, two of his friends took the stamps for safekeeping. There never was any complaint that there had been a robbery. The stamps were returned to Mr. Hall by his friends."

BOERS ATTACK THE BRITISH BLOCKHOUSES

Yow the Situation Was Saved—Searchlighte and Armored Trains Utilized-Enemy Beaten Back.

Cape Town, Aug. 22. - The Boers made two night attacks on the blockhouses near Naauwpoort, Cape Colony. The first was ably repulsed, but subsequently Lotteer's men made a bold attack five miles north of Naauwpoort, and the blockhouses received a baptism of fire. The British troops behaved

excellently. Armored trains arrived on the scene with Maxim guns and searchlights. and strong infantry reinforcements were also sent. The searchlights played on the rugged hills, and the Maxims and rifles poured in showers of lead wherever it was thought the Boers might be lurking. The Boers were forced to retreat.

CANADA AND THE WAR. Ottawa, Aug. 22.-Canada's expenditure up to date in conection with the South African contingents has been a little over \$2,000,000, but the country has already been repaid this sum in the shape of contracts for hay and food products for the British army, and, in addition, \$2,000,000 have gone into the pockets of the people. Prof. Robertson, commissioner of agriculture, states that his department has paid out up to date \$4,000,000 for supplies which have been sent to South Africa. The department of agriculture has, of course, acted as the agent for the British Governmen in this matter. Prof. Robertson has gone to St. John, N. B., to inspect a shipload of hay, oats, etc., which is required for army pur-poses in South Africa. Two more shiploads will leave during the balance of this month, and another five shiploads will be sent in September from St. John.

THE WRECK OF THE STEAMER ISLANDER.

.essel Was On Her Proper Course-Total Death List-Less Than Forty

Victoria, B. C., Aug. 22.-The official report presented to Capt. Gaudin, local agent of marine, by Chief Officer Nerotsos, of the ill-fated Islander, gives the exact location of the disaster as six and a half miles west by south, three-quarters west, magnetic, of Point Hilda, in Stephen's Passage, Douglas Island, Alaska. He computes the approximate number of dead at 38,

and saved at 143. Arrangements are now under way for an official inquiry into the dis-aster, which will be held when instructions are given from Ottawa by the local agent of marine. The report shows that the steamer was on her

proper course.

Chief Officer Nerotsos, of the Islander, in an interview, said that the pas-sengers evidently did not know that the boats were reached from the hurrican deck, for few other than Capt. Harris, who assisted in getting them out, was up there until the last boat was being lowered over the starboard side. He is thankful that they were not up there, for he says if they had been the boats would never have been lowered. As it was they rushed the last boat, and jumped into it before it could be lowered, and almost caused the total loss of a boat which saved many lives. When they jumped in they carried away the davit, which fell into the water, and the stern of the boat went down. The boat was saved only by the presence of mind of a fireman who cut away the tackle and let the boat down.

POISON IN PORRIDGE.

Coroner's Verdict in Case of Mysterious Death at Pickering.

Pickering, ont., Aug. 21 .- The adsubstance of the verdict of the jury being: "That deceased came to his being: "That deceased came to his death by eating porridge containing arsenic, but by what means the poison got there still remains a mystery, the government analysis failing to find any trace of poison in the meal from which the porridge was made, although it was found in the contents of the stomach." Westney died some six hours after eating the food. His eldest son also eat of the poisoned food, and was very

sick for some time, but finally got well. A writ was issued Wednesday in the high court at the suit of William MacAdam, of Ottawa, against the York County Loan and Savings Company, for \$2,400, being the amount claimed to be due on twelve paid-up shares of \$200 each. Mr. MacAdam was induced, so his counsel says, to subscribe for the stock in consequence of a statement in a prospectus by the company that a saving of 25 cents a week, invested in the company, would yield a profit of \$98 in twelve months. Mr. MacAdam says he has regularly

You can scalp a turnip. You can peel it and s'ce it up and chop it into mincemeat.

But you won't get blood out

You can squeeze this old world in a vise. You can tramp all over, peek into every coal mine, and buttonhole every coal baron

But you won't get a better coal than our "Walla Walla". coal out of it.

And you'll have to do a lot of squeezing and tramping and peeking and buttonholing before you'll get even as good a coal as "Walla Walla." The only equal of a ton or

'Walla Walla" coal is another

ton of "Walla Walla" coal. And

we're the only "Walla Walla" coal dealers in London. "Walla Walla" is summermined-which means most carejourned inquest regarding the death of fully mined. It is screened three the late Stephen Westney, who died separate and distinct times beon June 28, was concluded today, the fore it reaches you. It's as clean as coal can or ever will be. It's a hard coal-hard enough to burn fifteen per cent longer than any other coal yet discovered-yet it lights quickly enough to delight even the cook. It contains no clinkers in the first place, and leaves little ashes in the last place. We're delivering 20 bags of "Walla Walla" to the tonand we're delivering it at sum. mer prices. So it's wise and economical to order your next win ter's coal supply now-and of us.
