

200 ATHLETES FROM 20 SCHOOLS TO COMPETE IN LONDON SATURDAY

FIVE NEW SCHOOLS ARE AMONG 1922 ENTRIES

Chatham, Dresden, Mount Brydges, Melbourne and Delaware Are "Dark Horses" At Interscholastic Meet.

The Third Annual Track Meet of the Western Ontario Secondary Schools' Association will mark another epoch in the history of the association. Five new members have joined the association, bringing the membership up to thirty-five, approximately 60 per cent of the schools with which the secretary has communicated. This is a very remarkable showing and serves to emphasize the importance attached to inter-school activities by the executive body of Western Ontario. It is particularly pleasing to the new members are: Chatham, Dresden, Mount Brydges, Melbourne and Delaware. These schools are entitled to all the privileges of the association for next academic year, including the Fourth Annual Track Meet, May 19, 1923.

Many Entries.
The entries for the meet are very satisfactory and already some twenty schools are to be represented by approximately 200 students. In a few cases entry blanks failed to reach the schools, and several telegrams were received asking for other blanks. In these cases it was decided to accept entries mailed on Tuesday. It is noted that the schools are not sending as large teams as on some occasions, but are demanding more work for their individual competitors. This factor will make the competition for individual championships much keener than usual, but the effect on the school's success in winning a trophy is problematical. As usual the entries in the sprints are large and will necessitate at least four or five heats in the 100 yards, 200 yards and 400 yards in both junior and senior events.

The trophies donated in 1920 by the chamber of commerce and the city of London have been returned to the secretary, and are on exhibition downtown. The individual shields and medals should arrive in the city tomorrow and will be engraved and put in display at once. Several gold medals have been ordered for records. Judging from the reports from various places most of our present records will be shattered.

By special request, Max Muir of St. Mary's will run a special 1,000 yards race in an attempt to lower the Canadian record for this distance. He will start 120 yards behind the seniors in the 880-yard race. Mr. Muir is not now a student, so that his showing in this race will have no effect on the standing of any other competitor or team. Mr. Muir won this race at the Toronto Exhibition last year. He has been the champion of the Ontario track and field association for several years. He is a very fast runner and is expected to make the attempt. It will be remembered that Muir set the record for the half mile for the W. O. S. A. in 1920.

The old rivals, St. Thomas, London, Collingwood, Stratford, Brantford and Windsor have sent in large entries. Chatham, Dresden and Leamington will make the other schools work harder than ever before if they carry away the silverware. The relay races have aroused more interest than ever before. Ten teams will be represented in the juniors, and seven in the seniors. Points won in the relay count in the school championship. The new members of the association are the "dark horses" and may be decisive factors in deciding the winners this year. There have been several rumors that many fast runners coming in from the country around London. There will undoubtedly be many surprises next Saturday.

IF THIS PLAY COMES UP

Here's Your Decision

If a pitcher, while not in his proper position on the rubber, delivers the ball to the batsman, and the batsman does not strike at it, the umpire should call a ball whether it passed over the plate or not, provided no one was on the bases at the time. If, with a runner on the bases, the pitcher so delivers a ball at which the batsman does not strike, it is ruled a ball, all runners being entitled to advance one base. If the batsman strikes at such an illegally delivered ball, it counts either as a strike or whatever may follow.

ADDIE JOSS.

SINCE the inception of modern baseball only three major league pitchers have ever pitched a perfect game. These three are: Charley Robertson, who for the White Sox, allowed the Tigers neither a run nor a hit during the game of April 30. In all, 27 men faced him, not one of whom reached the initial sack. Cy Young, who, in 1904, pitched a no-hit, no-run game for the Boston Americans against the Athletics. The late Addie Joss, who equaled

TIGERS STILL WIN.
WASHINGTON, May 16.—Oldham master of the situation at all stages

George Bradly Was First Perfect Pitcher

Speaking of perfect pitching, George Washington Bradley was the first man who ever did such a thing in the whole history of major baseball. "Brad" was with St. Louis then, and it was Hartford he was opposed to. His great feat came as a climax to a series of four straight shutouts on four straight days. It occurred on July 15, 1876, and long ago as it was, it gave a name to "Brad" that can never die in the memory of baseball fan.

Bradley, aged 75, is a member of the Philadelphia police department.

Today, while Detroit bunched hits on both Phillips and Erickson and easily won the opening game of the series 4 to 2, Cobb and Veach drove in all of the runs for the Tigers.

WHEN YOU SCORE A BALL GAME

REMEMBER—

The scoring of a base hit often resolves itself into purely a question of judgment. What one scorer may regard as a ball too hard to handle and score as a hit, may be considered an error by some other scorer. This question of judgment usually comes up on fast and slow hit balls.

REMEMBER—
When you score a ball game, remember that it is a great feat and that you are a great scorer.

Marked Increase in Farm Values Through Use of Automobile

"What Other Car Equals It For Low Upkeep?"

You can travel 5,200 miles a year in the Overland and still pay no more for running expenses than \$4 weekly. Reckoning 25 miles to the gallon of gas and 6,500 miles to the set of tires, this small outlay covers everything:

Gasoline (4 gallons).....	\$1.46
Oil (1 pint).....	.25
Distilled Water, Grease.....	.08
Tires.....	1.00
Incidentals.....	1.21
Total.....	\$4.00

It's great economy to drive an Overland. On business trips, it saves time and money in street car, railroad and taxi-cab fares. It is a convenience the whole family can enjoy. Every mile in it is comfortable.

The Overland saves money in first cost as well as upkeep. Completely equipped, the Touring Car costs only \$825. You could not make a sounder automobile investment. Let us give you a demonstration ride.

HELP SOLVE PROBLEM RURAL DEPOPULATION

Motor Cars Prove "Anchorage" to Keep Boys and Girls Contented on Farm—Of All Cars in Ontario, 37% Are Owned Now by Farmers—Wonderful Change in Rural Social Life.

The all-around usefulness of the motor car on the farm is convincingly brought out by figures presented to the Ontario Legislature at this session by the Department of Public Highways. These show that 37% of all motor vehicles in the province are owned by farmers.

An interesting corroboration of the fact is given in a booklet "What My Car Means to Me" published by Willys-Overland Limited, who, last year, instituted a "Put Canada on Wheels" contest among car-owners. Out of the 73 prize-winning letters published in this booklet, there are 17 from farmers and farmer's wives. These letters furnish emphatic evidence that the motor car is one of the most useful, the most useful, the most time-saving and indispensable pieces of machinery on the farm.

Effect on Land Values
Investigation among farmers shows that not only does the motor car promote greater efficiency and economy in farm operations, but it also increases production as well as land values.

A Millbrook farmer writes: "It was the Motor Car brought our Good Roads into the Province. Farms where the Provincial Highway passes have all increased in value."

Mr. D. D. Digges, of Harrow, Ont., who won the \$250.00 prize for the best letter from a farmer, states: "To me, my car means: greater efficiency and economy in farm operations, not only in obtaining parts and making repairs in the shortest possible time, and in rendering the surplus labor of the towns and villages more readily

available in rush hours; but also in rendering the hired man more contented and sufficiently restful excursions in the evening.

"It means increased production—the making available many of the advantages and conveniences of town and city life, with none of the disadvantages.

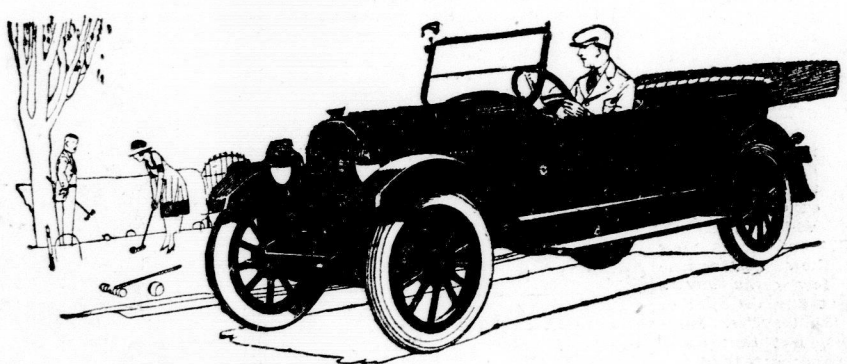

"It is the cheapest means of transportation I can find, costing only about two cents a mile.

"It gives greater monetary returns from my labor in rendering a large number of markets easily and quickly accessible."

Checking Rural Depopulation
As a check on rural depopulation, the automobile has a very special mission. The census figures show that the movement towards the cities is a serious problem. Good roads are playing a big part in the Back-to-the-Land proposals, because they remove that isolation that has handicapped the farmer. But good roads without automobiles would accomplish little. Letters written to the Overland company, indicate the place of the motor car in keeping rural youth from crowding to the cities. As one writer says: "The car is the greatest anchorage for keeping the boys and girls contented on the farm."

Farmers, as a class, will naturally continue to be the heaviest buyers of motor cars this year, according to Mr. T. A. Russell, President, Willys-Overland Limited. The number of cars on farms will be greatly increased. More and more, farmers are recognizing a car is not a luxury but an economical necessity for efficiency in production, in recreation and in citizenship.

"A Mechanic Has Never Raised The Hood"

Thousands of owners can testify to the care-free, inexpensive running of the Willys-Knight Sleeve-Valve Motor.

Again and again the Willys-Knight owner re-sets his speedometer without having had to make even a slight motor adjustment.

The Willys-Knight Sleeve-Valve Motor does away with the cams, push rods and springs of the poppet valve type of motor. It is remarkably simple and free from complica-

tion. No valve grinding. No carbon cleaning. And its power increases with the mileage.

Great economy—low upkeep—enduring quiet—minimum repairs—long service: these are the advantages that the Willys-Knight car now brings to you at a price remarkably low for the value offered.

Come in and examine this car with the motor that "Improves with Use." We will gladly demonstrate its luxurious riding qualities.
